Latino/a Popular Culture Michelle Habell-Pallan, Mary Romero, 2002-06 While the presence of Latinos and Latinas in mainstream news and in popular culture in the United States buttresses the much heralded Latin Explosion the images themselves are often contradictory Latino a Popular Culture brings together scholars from the humanities and social sciences to analyze representations of Latinidad in a diversity of genres

Language Mixing and Code-Switching in Writing Mark Sebba, Shahrzad Mahootian, Carla Jonsson, 2012-05-22 Code switching or the alternation of languages by bilinguals has attracted an enormous amount of attention from researchers However most research has focused on spoken language and the resultant theoretical frameworks have been based on spoken code switching This volume presents a collection of new work on the alternation of languages in written form Written language alternation has existed since ancient times It is present today in a great deal of traditional media and also exists in newer less regulated forms such as email SMS messages and blogs Chapters in this volume cover both historical and contemporary language mixing practices in a large range of language pairs and multilingual communities The research collected here explores diverse approaches including corpus linguistics Critical Discourse Analysis literacy studies ethnography and analyses of the visual textual aspects of written data Each chapter based on empirical research of multilingual writing presents methodological approaches as models for other researchers New perspectives developed in this book include analysis specific to written rather than spoken discourse approaches from the new literacy studies treating mixed language literacy from a practice perspective a focus on both traditional and new media types and the semiotics of both text and the visual environment

Funds of Knowledge Norma Gonzalez, Luis C. Moll, Cathy Amanti, 2006-04-21 The concept of funds of knowledge is based on a simple premise people are competent and have knowledge and their life experiences have given them that knowledge The claim in this book is that first hand research experiences with families allow one to document this competence and knowledge and that such engagement provides many possibilities for positive pedagogical actions Drawing from both Vygotskian and neo sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching This book accomplishes three objectives It gives readers the basic methodology and techniques followed in the contributors funds of knowledge research it extends the boundaries of what these researchers have done and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work In a time when national educational discourses focus on system reform and wholesale replicability across school sites this book offers a counter perspective stating that instruction must be linked to students lives and that details of effective pedagogy should be linked to local histories and community contexts This approach should not be confused with parent participation programs although that is often a fortuitous consequence of the work described It is also not an attempt to teach parents how to do school

although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working class or poor communities by viewing their households primarily in terms of their strengths and resources. Their defining pedagogical characteristics. *Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms* is a critically important volume for all teachers and teachers to be and for researchers and graduate students of language, culture, and education. *Narrative and Experience in Multicultural Education* JoAnn Phillion, Ming Fang He, F. Michael Connelly, 2005-03-23. *Narrative and Experience in Multicultural Education* provides compelling stories that raise questions, advance understandings, and promote insight into the challenges and hopes of teaching for diversity and democracy. The works contained are compelling for the stories they tell and as such there is value in their presence. That the thoughtful reader can glean important lessons with respect to multicultural education and the value of narrative inquiry as academic disciplines is intellectual icing on the cake. Francisco Rios, University of Wyoming. This work is a very exciting, important, and badly needed piece of scholarship offered by some of the most leading edge professors in the field. The diversity and diverse viewpoints it presents are unparalleled in the field of education. Cheryl J. Craig, University of Houston. The narratives in this book allow readers to put a human face to an issue related to multicultural education. A reflective reader will begin to see himself/herself in the narratives of the text. Edmundo F. Litton, Loyola Marymount University. The inclusion of chapters that deal with classroom realities elevates the text for education teacher candidates above those existing volumes that tend to deal with multi-cultural issues in the abstract. One of the strengths of this volume is that it will resonate with new and experienced classroom practitioners. Jon G. Bradley, McGill University. *Narrative and Experience in Multicultural Education* explores the untapped potential that narrative and experiential approaches have for understanding multicultural issues in education. The research featured in the book reflects an exciting new way of thinking about human experience. The studies focus on the lives of students, teachers, parents, and communities, highlighting experiences seldom discussed in the literature. The authors are diverse and their inquiries are far ranging in terms of content, ethnic groups studied, and geographic locations. They also bring their personal experience to the inquiries, actively participate in the lives of the people with whom they work, care deeply about the concerns of their participants, and search for ways to act upon these concerns. Most importantly, the work emphasizes the understanding of experience and transforming this understanding into social and educational significance. **Key Features**
