Comparative Archaeologies Ludomir R. Lozny, 2011-04-06. Archaeology as with all of the social sciences has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data. In order to fulfill local/regional expectations, different goals have been assigned to the practitioners of Archaeology in different regions. These goals might be entrenched in local politics or social expectations behind cultural heritage research. This comprehensive book explores regional archaeologies from a sociological perspective to identify and explain regional differences in archaeological practice as well as their existing similarities. This work covers not only the currently dominant Anglo-American archaeological paradigm but also Latin America, Western and Eastern Europe, Asia, and Africa, all of which have developed their own unique archaeological traditions. The contributions in this work cover these alternative archaeologies in the context of their own geographical, political, and socio-economic settings as well as the context of the currently accepted mainstream approaches.

European Archaeology Abroad S.J. van der Linde, 2013-10-01. What are European archaeologists doing abroad? What have they been doing there for the past three to four centuries? Are they doing things differently nowadays? To address these questions, this book explores the scope, impact, and ethics of European archaeological policies and practices in the Mediterranean area, the Near East, sub-Saharan Africa, Asia, and Latin America. Acknowledging that international and transcultural projects have a range of different stakeholders, the first part of this book aims to identify some of the values and motivations behind different European archaeologies abroad. This is done by providing thorough historical overviews on a range of European countries including France, Spain, Germany, Belgium, the Netherlands, and Poland. But how are these values translated through socio-political, theoretical, and administrative frameworks unto local circumstances in host countries? And how are these archaeological activities received locally? The second part of this book attempts to answer these questions through a range of historical and contemporary case studies in Africa, in Asia, in South America, in the Near East, and in Europe. The third part of the book offers several critical reflections on European values, motivations, and collaboration projects as perceived by archaeological heritage professionals based in and/or working in Senegal, Sudan, Somaliland, Colombia, and the Near East. This collection of historical overviews, contemporary case studies, and critical reflections focuses on the challenging relationships between archaeological

practices and policies including the requirements and wishes of archaeologists of local communities and of other stakeholders in Europe and in the host countries In addition to researchers and students this book should be of interest to practicing archaeologists heritage professionals and policy makers the world over as they seek to reach better informed decisions regarding archaeological projects and international collaboration This publication was produced in the framework of the ACE project Archaeology in Contemporary Europe Professional Practices and Public Outreach with the support of the Culture 2007 2013 programme of the European Commission

The Discovery of Historicity in German Idealism and Historism Peter Koslowski, 2006-03-30 German Idealism develops its philosophy of history as the theory of becoming absolute and as absolute knowledge Historism also originates from Hegel's and Schelling's discovery of absolute historicity as it turns against Idealism's philosophy of history by emphasizing the singular and unique in the process of history German Idealism and Historism can be considered as the central German contribution to the history of ideas Since Idealism became most influential for modern philosophy and Historism for modern historiography they are analyzed in this volume in a collaboration of philosophers and historians German Idealism is presented in Schelling and its critics Schlegel Baader and Nietzsche Historism in Ranke Droysen Burckhardt and Treitschke The volume further presents the impact of Idealism and Historism on present German approaches to the philosophy of history and outlines the debates on the possibility of a philosophy of history and on the methodology of the historical sciences

Remains of the Past in Old English Literature Jan-Peer Hartmann, 2025-02-11 Argues for a new understanding of Old English responses to materiality and historical change Human communities have interacted with the material remains of earlier periods for millennia Such archaeological objects including bones coins weapons building materials and architectural landmarks were physically handled reused transformed and reinterpreted they were also depicted in literature This book examines how Old English texts imagine such human encounters with the remnants of the past It explores Elene's perspective on the discovery of the True Cross as a narrative of political spiritual and epistemic translatio and the multiple ways in which *The Wanderer* and *The Ruin* use images of ruins and the poetic formula work of giants to construct an unknown and unrecoverable past it also considers the engagements with untimely objects in *Beowulf* and the Anonymous Old English Legend of the Seven Sleepers and how the *Ruthwell Cross Poem* and *The Dream of the Rood* play off figural against literal history As this study demonstrates Old English texts combined and creatively adapted a broad variety of ways of conceptualizing not merely history but indeed the very processes by which historical thought operates Its careful readings show that these texts not only display a deep and conflicted understanding of the philosophical implications of viewing history and temporality through the prism of material objects but also exhibit a powerful capacity for expressing such an understanding through aesthetic strategies

Philosophy of Nature Paul K. Feyerabend, 2016-09-13 Philosopher physicist and anarchist Paul Feyerabend was one of the most unconventional scholars of his time His book *Against Method* has become a modern classic Yet it is not well known that Feyerabend spent

many years working on a philosophy of nature that was intended to comprise three volumes covering the period from the earliest traces of stone age cave paintings to the atomic physics of the 20th century a project that as he conveyed in a letter to Imre Lakatos almost drove him nuts Damn the Naturphilosophie The book s manuscript was long believed to have been lost Recently however a typescript constituting the first volume of the project was unexpectedly discovered at the University of Konstanz In this volume Feyerabend explores the significance of myths for the early period of natural philosophy as well as the transition from Homer s aggregate universe to Parmenides uniform ontology He focuses on the rise of rationalism in Greek antiquity which he considers a disastrous development and the associated separation of man from nature Thus Feyerabend explores the prehistory of science in his familiar polemical and extraordinarily learned manner The volume contains numerous pictures and drawings by Feyerabend himself It also contains hitherto unpublished biographical material that will help to round up our overall image of one of the most influential radical philosophers of the twentieth century
