Recarbonizing global soils – A technical manual of recommended management practices Food and Agriculture  
Organization of the United Nations,Intergovernmental Technical Panel on Soils,2021-09-08 During the last decades soil  
organic carbon SOC attracted the attention of a much wider array of specialists beyond agriculture and soil science as it was  
proven to be one of the most crucial components of the earth s climate system which has a great potential to be managed by  
humans Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15  
Protect restore and promote sustainable use of terrestrial ecosystems sustainably manage forests combat desertification and  
halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1 This  
technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil  
management practices on SOC content in a wide array of environments including the advantages drawbacks and constraints  
This manual presents different sustainable soil management SSM practices at different scales and in different contexts  
supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful  
experiences of SOC sequestration in practical field applications Volume 4 includes 51 case studies dealing with cropland  
grassland integrated systems and farming approaches Directions of Development of Transport Networks and Traffic  
Engineering Elżbieta Macioszek,Grzegorz Sierpiński,2018-07-30 This book offers a collection of valuable guidelines for  
making decisions concerning the future development of transport networks and traffic engineering The decision making  
support systems described here will certainly attract the interest of those who face the challenge of finding solutions to  
problems concerning modern transport systems on a daily basis Consequently the book is chiefly intended for local  
authorities involved in planning and preparing development strategies for specific transport related areas in both urban and  
regional contexts as well as for representatives of business and industry who are directly engaged in the implementation of  
traffic engineering solutions The guidelines provided in the respective chapters help to address the given problem soundly  
and to simplify the selection of an appropriate strategy The topics covered include increasing the competitiveness of public  
transport the status quo of electric vehicle infrastructures worldwide methods for calming urban traffic as an element of

sustainable transport development speed traffic zones and electric buses car sharing systems in Poland a method for deconstructing the regional travel demand model monitoring urban traffic using floating car data problems of deliveries in urban agglomeration distribution systems estimating the number of threatened people in case of fire in road tunnels and road pavement evaluation using advanced tools Since the book also considers new approaches to theoretical models including traffic flow surveys and measurements transport behaviors human factors in traffic engineering and road condition modeling it will also appeal to researchers and scientists studying these problems The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering Silesian University of Technology in Katowice Poland on September 17 19 2018
