

# SpeedRake® Wheel Rakes

## SR 108 - SR 112

### SR 100 SERIES SPEEDRAKES

The Kuhn SR 100 series corral wheel rakes are the clear choice for hay producers who demand the ultimate in performance and rugged durability. The strong, all-welded chassis folds flat, making it compact for improved handling and easy transport between fields or farms. The raised frame, high-clearance wheel pins, and progressive roller wheel suspension provide unmatched capacity and raking performance. In a crowded field, many have tried to reproduce the exclusive features and patented design, yet the SpeedRake is still accepted as the clear market leader.

#### Optional Equipment

The optional hydraulic-controlled corner roller wheel turns the hay in the center of the windrow and can easily be folded out when not in use.

#### Easy Adjustments

Rake settings are simple and straight forward. The cross telescopic is easily set to the raking width using the pins, and the rake angle is quickly adjusted to suit the windrow width by adjusting the verticillates.

#### High Clearance

The raised frame and high-clearance roller pins provide more uniform crop flow, which is essential for clean raking and evenly formed windrows.

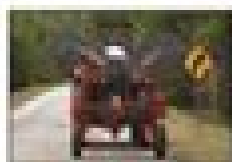

#### Superior Suspension

The unique suspension system adapts the flexure of the roller wheels to changing speed and ground conditions for more consistent raking. This also reduces the wear and protects the crop yields.

### INNOVATIVE KUHN FEATURES

#### Heavy-Duty corral wheel rake

- Raking wheels fold flat and over center. The compact, patented design provides excellent transport stability and a convenient, single-point transport lock ensures safety in transport.
- The heavy-duty frame is fully welded. The large joint pins and wheel mounts are robustly welded for precision and strength, providing exceptional durability.
- Large 11" tires and a wide wheelbase are ideal for difficult field conditions and provide outstanding stability when moving long distances between farms or fields.
- The fast-lay system synchronizes and stabilizes the rake when raised, for quick turning on headlands and when working on side hills.
- Folding "V" raking angle pins allow for the transport position to enable low lay by simply moving the fast-lay mechanism down pins and multiple folds, spread of lower rakes, are allowed.

Fast and Effective Hay Raking!
