Making Global Health Care Innovation Work Standardization And Localization:

Making Global Health Care Innovation Work N. Engel, I. Van Hoyweghen, A. Krumeich, Ine Van Hoyweghen, 2014-10-23

Global Health involves among many things the intensified travelling of people resources technologies knowledge standards and ideas This book describes what happens when innovations are transferred to new settings What work is needed to make them work but also how they change the setting into which they are introduced *Compound Solutions* Susan

Craddock, 2017-02-21 Claiming 1.5 million lives in 2015 tuberculosis is the world's most deadly infectious disease Because of the population it overwhelmingly affects however pharmaceutical companies are uninterested in developing better drugs for the disease *Compound Solutions* examines Product Development Partnerships PDPs which arose early in the twenty first century to develop new drugs and vaccines for infectious diseases in low income countries Here for the first time is a sustained examination of PDPs the work they do the partnerships they form their mission and their underlying philosophy of addressing global health needs with implications that extend well beyond tuberculosis Focusing on two PDPs for tuberculosis the Global Alliance for TB Drug Development TB Alliance and Aeras a nonprofit focused on vaccine development Susan Craddock argues that PDPs do much more than product development As innovative sites of humanitarian pharmaceutical production they are contravening mainstream pharmaceutical production by tying drug and vaccine research to global health needs rather than shareholder demand In largely untethering the profit incentive from pharmaceutical production Craddock shows PDPs exhibit more creative and efficient scientific practices reshaping regulatory norms and implementing more ethical forms of clinical trials that enhance community engagement and capacity building An unparalleled interdisciplinary analysis of PDPs as politically socially scientifically and economically innovative sites of pharmaceutical production

Compound Solutions is a must for readers in the fields of public health science and technology studies and medical social science

Cooking Data

Cal (Crystal) Biruk, 2018-04-04 In *Cooking Data* Cal Biruk offers an ethnographic account of research into the demographics of HIV and AIDS in Malawi in which she rethinks how quantitative health data is produced by showing how data production is inevitably entangled with the lives of those who produce it *'A Truly Golden Handbook'*

Veerle Achten, Geert Bouckaert, Erik Schokkaert, 2016-09-26 What would the ideal society of the future look like In 1516 the eminent English humanist Thomas More tried his hand at imagining a perfect society on a distant island His *Utopia* was published in the Flemish town of Leuven home of a university that was established almost a century earlier 500 years later scholars of this university revisit More's best known work and reflect on the ideal society of the future using the scientific insights of today including perspectives which More could never have imagined What will our cities look like a hundred years from now How will stem cell research and 3D printing change the world Will we be able to cure all diseases Will we be traveling to other planets Will computers take over Or will humanity find a way to improve the quality of life for everyone and feed a growing world population In *A Truly Golden Handbook* more than fifty KU Leuven scholars share their science based

Wireless Independent Living for a Greying Population Lara Srivastava,2022-09-01 It is widely known today that not only are the aged ageing or the old getting older but they are also increasing in number the world over At the same time proper care and support for our aged is increasingly at risk Without some form of support the quantitative extension of life cannot be matched by a qualitative one This may mean that the opportunity provided by a longer life is squandered and life itself of course is nothing if not opportunity Societies find that self sufficiency and independence not only contribute to individual well being but are also economically desirable due to the resultant increase in productivity The challenges of daily living for a growing population of the aged form the basis of the independent living platform the AGE HOME platform which is described in this book The platform combines both existing and emerging technologies suitable for the home Its use and application is considered in the wider context of Web 2 0 the internet of things and other elements of the burgeoning digital world It is time that a holistic and multi disciplinary approach to this constantly enlarging area of human existence is taken This book is written for researchers and designers of wireless tools analog and digital circuits as well as academics who are active in the various fields of Human Sciences ForewordThis book appears at the right moment when several developments have made age and its consequences an important element of human existence It makes for informative reading being based on considerations related to independence for the aged and

the application of emerging technologies to enhance this independence From the foreword by Houlin Zhao Deputy Secretary General of the International Telecommunication Union **Innovative and Creative Behaviours in the Modern**

Workplace: Causes and Consequences Mike James Mustafa, Mathew Hughes, Delia Virga, 2025-08-22 In light of ongoing globalization and the post pandemic recovery period organizational innovativeness is becoming a strategic necessity for many organizations to survive and thrive in contemporary business environments In achieving innovativeness organizations have become reliant on the discretionary and non conformity extra role behaviors of their employees that go beyond employee role expectations Employee creativity and innovativeness represent two such behaviors deemed critical for organizational innovativeness Employee creativity can be viewed as the cognitive and behavioral processes applied when attempting to generate novel ideas and employee innovativeness as the processes applied when attempting to implement new ideas A particular challenge for organizations is understanding how behaviors emerge and how they can be sustained through appropriate structures and processes Such challenges are even more profound given that employees may not be willing to engage in such behaviors due to often significant personal costs associated with engaging in them Given the growing importance of employee creative and innovative behaviors to organizational success and survival numerous studies have examined their antecedents in order to develop theoretical models and evidence based guidance for enhancing employee creativity and innovativeness A fundamental issue among such studies is that they have mainly focused on specific elements of organizational cultures and or leadership styles This has often resulted in an incomplete understanding of how such complex behaviors actually emerge **Business Periodicals Index** ,2008 *Medical Law: Text, Cases, and*
