Een kwestie van lange adem Geert Verbong,2001 *Kernfysica in Leuven* Mark Huyse,2025-10-06 De ontwikkeling van de kernfysica in België gaat terug tot de eerste helft van de twintigste eeuw en is aanvankelijk nauw verbonden met de koloniale exploitatie van Congo De ontdekking van uitzonderlijke ertsen in Congo leverde de Belgische universiteiten radioactieve bronnen die cruciaal waren voor de groei van zowel het kernfysisch onderzoek als de nucleaire geneeskunde Na de Tweede Wereldoorlog investeert België sterk in fundamenteel en toegepast kernfysisch onderzoek grotendeels gefinancierd met een taks geheven op het uranium geleverd aan de Verenigde Staten Met deze middelen bouwen in 1947 de Franstalige kernfysici in Leuven het eerste Belgische cyclotron een circulaire deeltjesversneller een machine die een revolutionaire rol speelde in de kernfysica Pas na 1959 kunnen ook Vlaamse studenten doctoreren in de kernfysica eerst aan het cyclotron in Heverlee later aan de cyclotrons in Louvain la Neuve Dit zorgde ervoor dat de Vlaamse afdeling in Heverlee zich verder specialiseerde en uitgroeide tot het Instituut voor Kern en Stralingsfysica een hoofdrolspeler in Europees kernfysisch onderzoek Vandaag worden in de laboratoria van het instituut innovatieve technieken ontwikkeld die vervolgens leiden tot experimenten aan de grootste versnellerscentra wereldwijd Die technieken zijn niet enkel van belang voor fundamenteel onderzoek maar kunnen we ook niet langer wegdenken uit de nucleaire geneeskunde *New Serial Titles* ,1989 A union list of serials commencing publication after Dec 31 1949 *Sixty Years Of Double Beta Decay: From Nuclear Physics To Beyond Standard Model* Hans Volker Klapdor-kleingrothaus,2001-04-30 Nuclear double beta decay is one of the most promising tools for probing beyond the standard model physics on beyond accelerator energy scales It is already now probing the TeV scale on which new physics should manifest itself according to theoretical expectations Only in the early 1980s was it known that double beta decay yields information on the Majorana mass of the exchanged neutrino At present the sharpest bound for the electron neutrino mass arises from this process It is only in the last 10 years that the much more far reaching potential of double beta decay has been discovered Today the potential of double beta decay includes a broad range of topics that are equally relevant to particle physics and astrophysics such as masses of heavy neutrinos of sneutrinos as SUSY models compositeness leptoquarks left right symmetric models and tests of Lorentz symmetry and equivalence principle in the neutrino sector Double beta decay has become indispensable nowadays for solving the problem of the neutrino mass spectrum and the structure of the neutrino mass matrix together with present and future solar and atmospheric neutrino

oscillation experiments Some future double beta experiments like GENIUS will be capable to be simultaneously neutrino observatories for double beta decay and low energy solar neutrinos and observatories for cold dark matter of ultimate sensitivity This invaluable book outlines the development of double beta research from its beginnings until its most recent achievements and also presents the outlook for its highly exciting future

Nuclear Power in Britain and Germany: Culture, Emotions, and Rationality Christian Götter,2025-07-28 Split into two volumes volume 1 is a cultural history of technology that provides new insights into the international history of nuclear energy by examining the perspectives of six nuclear power plants host communities in Britain and Germany from the 1950s to the late 1980s Based upon a continuous qualitative analysis of the public debates in these communities this book demonstrates that the societal conflicts about atomic power were never confined to the risks of one exceptional energy technology Instead they were shaped by larger societal issues which they in turn heavily influenced Therefore the local discourses about nuclear energy provide an insight into transformations the British and German societies underwent during the Cold War The book will be of value for scholars and students interested in the history of technology environmental political and contemporary history as well as science and technology studies It will be of interest to researchers and members of the public interested in the local history of Biblis Hinkley Point Lingon Oldbury on Severn Stade and Torness as well as the wider public interested in the ongoing debates about nuclear power as a source of energy and a potential answer to the challenges of climate change
