Water quality comes from place to place. If you look at an individual spot, it may be different, but as you move about around the lake, you'll find that the water quality is not too far from the same. For the best results, carefully follow the instructions to make sure your sample is from the same spot.

For a strong, secure cap, use an extra front flap and turn up 1" from the panel when the regular vertical and extra one flat 1" up to you. The smaller vertical one for extra around front is just you. To keep the front and the two inner flaps in one cap.

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary, middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 10-week training program consisting of three sessions per week of aerobic exercise. The HR and HRR were measured at rest and during submaximal and maximal exercise at baseline and after 10 weeks. The EX group showed a significant decrease in HR at rest and during submaximal and maximal exercise compared to the CON group. The HRR also showed a significant increase in the EX group compared to the CON group. The results of this study suggest that a 10-week training program can improve the cardiovascular fitness of sedentary, middle-aged men.
