Women in the fisheries and livestock sectors were also interviewed to better understand women's contributions to food systems and climate change resilience. The study analyses the linkages between women's livelihoods, nutrition, literacy, and child protection issues vis-à-vis rural women's understandings of well-being, protection, and economic security. By examining these issues, the study seeks to shed light on the kind of policy reforms, technical assistance, and departmental coordination required to address protection issues that affect women in agriculture.

*Embattled Saints* Kenneth P. Lizzio, 2014-05-22  
Winner of the 2015 Benjamin Franklin Silver Award. In the West, Islam has replaced Communism as the new bugbear, while Sufism, Islam's mystical dimension, is often dismissed as the delusions of an irrational and backward people. Ken Lizzio corrects such misperceptions in this firsthand account of the year he spent in 1991 living with the head of the Naqshbandis, Afghanistan's largest Sufi order. He presents the order in all its dimensions: social, economic, political, and spiritual at a pivotal moment in history. He also gives a rare glimpse of everyday life in an Afghan Sufi school and of how the school has coped with the upheavals in its country. Poignantly, the Naqshbandi way of life faces threats to its very existence. One threat lies in the creeping secularization of Islamic society; another in the dismissal of Sufism by various fundamentalist Islamic sects claiming the franchise on truth. But historically, Lizzio points out, Sufism has always been Islam's wellspring for spiritual revival. And because Sufis deal in matters that transcend time and cultures, they help outsiders understand not only the true nature of Islam but the deeper meaning of all religions. The sound of that meaning echoes throughout this eloquent and fascinating memoir.

*A Handbook for Travellers in India, Pakistan, Burma and Ceylon*, 1920      **Handbook of Climate Change Impacts on River Basin Management** Saeid Eslamian, Mir Bintul Huda, Nasir Ahmad Rather, Faezeh A. Eslamian, 2024-08-29  
Climate change not only involves rising temperatures but it can also alter the hydro-meteorological parameters of a region and the corresponding changes emerging in the various biotic or abiotic environmental features. One of the results of climate change has been the impact on the sediment yield and its transport. These changes have implications for various other environmental components, particularly soils, water bodies, water quality, land productivity, sedimentation processes, glacier dynamics, and risk management strategies, to name a few. This volume provides an overview of the fundamental processes and impacts of climate change on river basin management and examines issues related to soil erosion, sedimentation, and contaminants, as well as rainfall runoff modeling and flood mitigation strategies. It also includes coverage of climate change fundamentals as well as chapters on related global treaties and policies.
