*Understanding China's Economy* Gregory C. Chow, 1994 In the early 1990s the world began to recognize China as a rising economic power. To reckon with China's economy is dynamic, her human and natural resources are plentiful, and her economic growth has been well sustained over the last 16 years. In fact, some have predicted that by the year 2020 China's economic output will be close to half that of the US. It is undeniable that China will be an economic giant if she is not already one today. In this book, the author has traced China's economic development over the last 16 years. The steps and characteristics of China's economic reform are detailed. The prospects for China's economic growth are studied. The author also attempts to analyze topical issues pertaining to China's economic relations with the US and her integration with the

other Asian economies This book provides the interested reader with a bird s eye view of the Chinese economy over the last 16 years Most chapters are written for the general reader while a few are for professional economists For the questions it answers or for those that it raises this is an important book to read      **A Chinese Economist's Journey** Fengbo Zhang,2008 Author has been intruding western economics helping the Chinese top leaders in policy making since 1980s He represented top Japanese companies for the rapid investment boom in the USA in 1990 In the world largest Bank he defeating World Financial Storm also experienced 9 11 tragedy Now he continued success during the USA mortgage crisis at Citigroup This book truly recorded his legendary life      *The Chinese Economy in Transition* Kang Chen,1995 Will China be able to preserve the momentum of its economic reform in the post Deng Xiaoping era Will her rising regionalism lead to internal chaos and warlordism Is China s central government capable of acquiring the much needed policy instruments to maintain macroeconomic stability This book seeks to answer these questions by adopting the Public Choice approach to analyse the complex ways in which China s political processes affect economic outcomes during its transition towards the market The author describes how macro level policy initiatives affect the behaviour of micro level actors such as households enterprises and localities and how micro level behaviour changes in large numbers become unorganised yet powerful collective actions which in turn send strong signals to macro level policy makers and thus change the state s policy orientations and result in new state society relationships The author argues that new incentives are thereby created and new interest groups are generated to sustain those changes and demand further reform thus making the market transition an irreversible process BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
