**Analysis in the Classical Tradition** James C W Ahiakpor, 2021-03-22 Macroeconomic Analysis in the Classical Tradition explains how the influence of Keynes s macroeconomics including his changed definitions of some key macroeconomic concepts has impeded many analysts ability to readily resolve disputes in modern macroeconomics Expanding on his earlier work Macroeconomics without the Errors of Keynes 2019 the author delves into more aspects of macroeconomic theory and argues for a revision of Keynes s contribution to the field Attention is given to theories and concepts such as Say s Law the quantity theory of money the liquidity trap the permanent income hypothesis 100% money and the Phillips curve analysis The chapters work to build a careful critique of Keynes s economics and make the case that the classical macroeconomics of Smith Say Ricardo Mill and others could help resolve present day policy disagreements and redefine macroeconomic priorities This book provides essential reading for advanced students and scholars with an interest in the foundations of Keynes s theories and current debates within macroeconomic policy **Macroeconomics** Olivier Blanchard, 2009 Blanchard

**Regulation and Economic Analysis** R.L. Gordon, 1994-04-30. *Regulation and Economic Analysis: A Critique Over Two Centuries* argues that long experience with the practice of regulation creates a broad anti-intervention consensus among economists. This consensus is based on comparison of real intervention to real markets rather than an ideological preconception. It is shown that economic theory can support all possible positions on intervention. Much theory is too abstract to support any policy position; many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized. Many theories illustrate the drawbacks of intervention. The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument. *Regulation and Economic Analysis* seeks to show the depth of the discontent, develop interpretations of economic theory that follow from skepticism about statism, and provide selected illustrations. The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior. International trade issues, transaction costs, property rights, economic theories of government, the role of special institutions such as contracts, the defects of macroeconomic and equity arguments for regulating individual markets, environmental economics, and the defects of public land management policies are examined.

This paper tests uncovered interest parity (UIP) using interest rates on longer maturity bonds for the Group of Seven countries. These long horizon regressions yield much more support for UIP: all of the coefficients on interest differentials are of the correct sign and almost all are closer to the UIP value of unity than to zero. The paper also analyzes the decision by a government facing electoral uncertainty to implement structural reforms in the presence of fiscal restraints similar to the Stability and Growth Pact.
