## The Key Principles of Economics

### Chapter Summary

---

Chapter 2 introduces the key principles that are central to all economic theory:

- The *principle of opportunity cost* states that the opportunity cost of something is what you sacrifice to get it. Opportunity costs in production are generally increasing, and thus, the production possibilities curve is bowed outward.
- The *marginal principle* states that any activity should be increased as long as the marginal benefits of the additional activity exceed the marginal costs.
- The *principle of voluntary exchange* states that a voluntary exchange between two people makes both people better off.
- The *principle of diminishing returns* states that, in the short run, if use of one input is increased while all others are held constant, production will eventually increase at a decreasing rate.
- The *real-nominal principle* states that what matters to people is the real value or purchasing power of money or income, not its face or nominal value.

Learning Objectives:

1. The Principle of Opportunity Cost: Apply the principle of opportunity cost.
2. The Marginal Principle: Apply the marginal principle.
3. The Principle of Voluntary Exchange: Apply the principle of voluntary exchange.
4. The Principle of Diminishing Returns: Apply the principle of diminishing returns.
5. The Real-Nominal Principle: Apply the real-nominal principle.
