World Yearbook of Education 2005 David Coulby, Evie Zambeta, 2005-01-14 This volume deals with two major and apparently opposing forces within education and society globalization and nationalism Globalization is often considered in economic terms of continued growth of international trade and a concentration of wealth in corporate hands yet it also encompasses technological political and cultural change The World Yearbook of Education 2005 explores the role of the education sector in our globalized knowledge economy and considers the political implications of this in terms of monopolarity and the cultural consequences of homogenization and Americanization The other strand of this study nationalism remains a persistent force within education and society in all parts of the world and this volume examines the extent to which it can fuel conflict at all levels through prejudice and intolerance Concentrating on the epistemological consequences of nationalism leading international thinkers

examine the extent to which it is reflected in the curricula of schools and universities around the world Finally the complex relationship between globalization and nationalism is explored and contributors explore the part that educational institutions and practices play in forming both agendas A wide range of perspectives are employed including post colonial discourse classical economics and sociological theory Nationalism and globalization are both ongoing processes and this volume makes a case for the central role of education in both through its potential to influence change and to act as benevolent force in shaping a global community *Sociological Analysis* ,1987 **The First African American Samurai** Tyrone R. Aiken MSPM,2024-05-17 When John Womble a young US Army Ranger arrived at his posting at Camp Wood in Kumamoto Japan in 1954 his perception of Japan and its people had been molded by the post WWII racially charged portrayals of the Land of the Rising Sun in American media However he quickly realized that the way American media had portrayed them was not the truth just like the stereotypical and racist depictions of Black Americans never mirrored reality Interested in learning more about the country and its traditions Womble often ventured outside the base and into the small city which housed a striking 400 year old castle that had been the battleground of the great feudal lords of ancient Japan Drawn more and more into Japanese history and culture he took the time to learn the language and code of ethics One day he attended a boxing match where he witnessed a Samurai quickly knock out an American boxer That s when his life changed forever Determined to become a Samurai he was selected to attend the prestigious School of Samurai where the training was rigorous So rigorous in fact that most students quit But not Womble He trained hard physically handled the mental and emotional toll that the discipline imposed upon him and eventually succeeded in becoming a Samurai After being discharged from the military Womble went back home no longer as the na ve teenager who left but as the first African American Samurai He committed his life to using his Samurai training to serve his community helping inner city youth to strive despite all the difficulties they faced from poverty and gun violence to racism and lack of opportunities This book written by one of his students is the ultimate testament to the long lasting legacy and impact he had on those lucky enough to call him sensei Voices of Diversity Pat Andrews,1995 *Coping with Cultural and Racial Diversity in Urban America* Wallace Lambert,Donald M. Taylor,1990-02-08 The authors state at the beginning of this provocative new book that one of the most distinctive features of the American persona is a preoccupation and underlying concern in the United States with what is or is not American How far can an ethnic group in the United States go to maintain its identity before it trespasses into what is perceived as un American terrain This is the underlying theme of Lambert and Taylor s community based investigation which studies the attitudes of Americans toward ethnic diversity and intergroup relations Directed toward social psychologists sociologists anthropologists and ethnic scholars this study deals with the peculiar U S dichotomy of cultural diversity and assimilation The research is conducted in a metropolitan area among working class adults some are established mainstream citizens others are newcomers but all experience ethnic and racial diversity as a daily fact of life The authors examine the

perspectives of mainstream White Americans and Black Americans They interview ethnic immigrant groups Polish Arab Albanian Mexican and Puerto Rican Americans in two urban settings and offer insight to the reality as well as the exciting possibilities of multiculturalism Students and scholars of all the social sciences will find *Coping with Cultural and Racial Diversity in Urban America* as a source of stimulating ideas Unity from Diversity Laura Lynn Neitzel,1995

strategies for addressing challenging issues It will give readers an opportunity to explore truths about the diverse human experience from both the past and present for a brighter future Publisher description Diversity and Its Discontents Neil J. Smelser, Jeffrey C. Alexander, 2021-04-13 Never before has the legitimacy of a dominant American culture been so hotly contested as over the past two decades Familiar terms such as culture wars multiculturalism moral majority and family values all suggest a society fragmented by the issue of cultural diversity So does any social solidarity exist among Americans In Diversity and Its Discontents a group of leading sociologists political theorists and social historians seek to answer this question empirically by exploring ideological differences theoretical disputes social processes and institutional change Together they present a broad yet penetrating look at American life in which cultural conflict has always played a part Many of the findings reveal that this conflict is no more or less rampant now than in the past and that the terms of social solidarity in the United States have changed as the society itself has changed The volume begins with reflections on the sources of the current culture wars and goes on to show a number of parallel situations throughout American history some more profound than today's conflicts The contributors identify political vicissitudes and social changes in the late twentieth century that have formed the backdrop to the wars including changes in immigration marriage family structure urban and residential life and expression of sexuality Points of agreement are revealed between the left and the right in their diagnoses of American culture and society but the essays also show how the claims of both sides have been overdrawn and polarized The volume concludes that above all the antagonists of the culture wars have failed to appreciate the powerful cohesive forces in Americans' outlooks and institutions forces that have in fact institutionalized many of the radical changes proposed in the 1960s Diversity and Its Discontents brings sound empirical evidence theoretical sophistication and tempered judgment to a cultural episode in American history that has for too long been clouded by ideological rhetoric In addition to the editors the contributors are Seyla Benhabib Jean L. Cohen Reynolds Farley Claude S. Fischer Frank F. Furstenberg Jr. John Higham David A. Hollinger Steven Seidman Marta Tienda David Tyack R. Stephen Warner Robert Wuthnow and Viviana A. Zelizer

Exploring the Link Between Diversity and Ethnic-American Associations, 2015 As the United States becomes even more ethnically diverse Americans are increasingly faced with negotiating the benefits as well as the concerns engendered by this increasing diversity From a social psychological perspective this presents a unique context in which to study lay ideas about the interrelationship between ethnic and national identities Previous research suggests that although people's ideas about which ethnic groups embody the national identity tend to be inclusive there exists a persistent and automatic tendency to link the American identity more strongly with White Americans than with other ethnic groups Although there is ample research on the relationship between immersion in diversity and prejudicial attitudes and behavior there is little research examining whether the influence of diversity extends to implicit intergroup biases The goal of the current work was to explore how three different aspects of environmental diversity the salience of White Americans the salience of Asian

Americans and the salience of multiple ethnic groups were correlated with the extent to which individuals implicitly and explicitly grant the American identity to Asian Americans and White Americans. Additionally, this work assessed the relationship between environmental diversity and individuals' lay definitions of the boundaries of the American identity. To empirically test these research questions, we utilized ethnic demographic data from the U.S. Census Bureau as well as individual-level implicit and explicit ethnic American associations collected via Project Implicit. With zip code as the geographical unit of analysis, we analyzed the relationships between environmental diversity and implicit and explicit ethnic American associations using hierarchical linear modeling. Over and above individual-level demographic information, we found significant relationships between environmental diversity and implicit ethnic American associations. Interestingly, further analyses indicated that some of these relationships were moderated by racial identity. In contrast, we found no meaningful relationships between environmental diversity and individuals' explicit ethnic American associations. Given the increasing diversity in the U.S. as well as research suggesting that individuals' implicit intergroup biases are predictive of behavior, the current work represents a pioneer exploration of the relationship between environmental diversity and intergroup bias.

Debating Diversity Ronald T. Takaki, 2002. In the nineteenth century, Herman Melville wrote, "America was settled by peoples of all nations. You cannot spill a drop of American blood without spilling the blood of the whole world. We are not a narrow tribe." At the beginning of the twenty-first century, America is more ethnically diverse than ever before. Will we fear this expanding diversity as the disuniting of America, or will we embrace a more inclusive redefinition of our national identity? As the nation's preeminent scholar of multicultural studies, Ronald Takaki invites us to address this question by debating diversity. The overarching theme of his new anthology is the clash of perspectives over the master narrative of American history: the powerful but mistaken story that this country was settled by European immigrants and that Americans are white. The collection opens with the lively intellectual exchange between Nathan Glazer and Ronald Takaki on ethnicity versus race; it then turns to the contrasting interpretations of the frontier by Frederick Jackson Turner and Takaki. Other debates include Samuel P. Huntington and Elizabeth Martinez on the diversity of civilizations; Irving Kristol and William Julius Wilson on inner-city blacks; Robert J. Samuelson and Gregory Defreitas on Mexican immigration; Governor Pete Wilson and Chancellor Changlin Tien on affirmative action; and James Q. Wilson and Elliott Currie on crime and punishment. The anthology closes with a debate between Arthur Schlesinger Jr. and Takaki on whether we as Americans should pursue a vision of our society as a melting pot or as a multicultural democracy. Embedded in all of the essays is the question: Originating from different shores, can we become one people of the United States of America? An ideal text for diversity courses in Ethnic Studies, Political Science, American Studies, History, Sociology, Anthropology, and Education, *Debating Diversity* will stir students to think critically about who we have been and who we are as Americans.
