Pathology and Surgery Boyd Samuel, Gutierrez Angela Maria, McCulley James P., Actualizaciones en el diagnóstico y tratamiento del queratocono Dra. Gracia Castro de Luna, Dr. Antonio Pérez Rueda, 2021-07-29 La importancia del diagnóstico y tratamiento precoz del queratocono viene dada por su alta incidencia y prevalencia en pacientes de temprana edad y su carácter evolutivo siendo la primera causa de trasplante de córnea en España. Además, el sureste de la península ibérica es un área endémica de la enfermedad. La exposición a agentes alérgicos y a radiación ultravioleta podrán acelerar su aparición y progresión. En etapas avanzadas de la enfermedad existe un importante compromiso de la agudeza visual del paciente afectando gravemente a la calidad de vida del mismo. Existen una gran cantidad de tratamientos que han demostrado frenar la evolución de la enfermedad: crosslinking y mejorar la calidad visual de los pacientes: anillos corneales intraestromales los cuales podrán evitar la realización final de una queratoplastia. El estudio mediante topografía corneal de estos pacientes es imprescindible para realizar un diagnóstico precoz y evitar cirugías refractivas corneales futuras. Es de gran interés conocer las normas básicas de interpretación de la topografía corneal y los índices diagnósticos de queratocono que ayudarán a anticiparse al diagnóstico en etapas clínicas. En este libro se presentan los últimos avances en el diagnóstico y tratamiento del queratocono.

Distrofías y Degeneraciones Corneales Samuel Boyd, 2012-11 Esta publicación es un texto práctico y útil que ayudará a comprender mejor las patologías corneales así como el planeamiento ya sea terapéutico o quirúrgico. El estudio de esta entidad es verdaderamente fascinante ya que por su relativa poca incidencia en la población muchas veces se carece de la experiencia a la hora de diagnosticarlas e identificarlas apropiadamente.

Atlas y Texto de Patología y Cirugía Corneal Samuel Boyd, 2012-10 Lo último en el manejo clínico y quirúrgico de las enfermedades corneales ha sido presentado en este Volumen. Temas esenciales sobre Infecciones e Inflamaciones Corneales y Desórdenes de la Superficie Ocular tales como conjuntivitis bacteriana y viral, queratitis bacteriana y no bacteriana, procedimientos diagnósticos en las Queratitis infecciosas, etiología y manejo del ojo seco, deficiencia lagrimal acuosa y síndrome Sjögren, epifora, blefaritis crónica y epiescleritis, etiología y manejo del pterigium, afecciones de la córnea relacionadas con los lentes de contacto.
