issues that arise This book starts by exploring what it means to be intercultural from different theoretical standpoints before contrasting ways in which people do or do not become intercultural in both tutored and untutored ways inside and outside the classroom The main purpose of this book is to introduce the concept of interculturality to examine how it can emerge in an unplanned way and to consider ways in which it can be more systematically addressed through education particularly through foreign language education

Modeling and Measuring Competencies in Higher Education Sigrid Blömeke,Olga Zlatkin-Troitschanskaia,Christiane Kuhn,Judith Fege,2013-04-20 Measuring competencies acquired over the course of higher education is an area of research that largely has been neglected This deficit can be attributed to the complexity of academic competencies since the variety of institutions programs occupational fields and job requirements render it difficult to define and even harder to measure outcomes Thus

assessing the preconditions for and effects of competency development is a challenge methodologically In this book a comprehensive review of the international state of research on modeling and measuring competencies in higher education across several academic disciplines is presented along with an evaluation of the field's strengths and weaknesses Renowned experts share insight into the most important recent research projects and point out controversies and challenges Competencies are regarded as context specific dispositions acquired and required to cope successfully with domain specific situations and tasks However the range of these dispositions is controversial Should only cognitive facets be included or is it important to consider attitudes as well Insufficient response rates and panel attrition are further challenges as are the limitations of paper and pencil approaches to the complex measurement of higher education outcomes Thus this book may serve as a platform for the exchange of research experiences and perspectives and hopefully will instigate improvements in research into higher education
