 María Munar, Cathy H.C. Hsu, 2023-03-21 This book examines the relationship between gender and sustainability in tourism  
 Whilst an extensive body of work exists in the areas of gender and sustainability these two fields of knowledge are seldom  
 combined to examine tourism phenomena When we look at the evolution of tourism we see that sustainability has become an  
 essential element in educational programmes policy making and strategic considerations for organisations and destinations  
 Whilst the beginnings of tourism sustainability were challenging presently its relevance is seldom questioned However this  
 situation is not the case with gender research Although gender theorising and research have existed for over a century and a  
 rich legacy of knowledge exists on this topic meaningful and respectful engagement with this line of scholarship is thus far  
 peripheral in tourism studies The aim of this book is to reflect on and rethink the intersection of gender and tourism  
 sustainability through the lens of gender theory and feminist epistemology to stay with the trouble and devise pathways for  
 sustainability gender knowledge This book will be of great interest to students researchers and academics in tourism gender

and sustainability as well as tourism management The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism
