Doobay-Persaud, Tracy L. Rabin, Tomlin Paul, Jessica Evert, Benedicta Ayiedu Mensah, 2024-10-01 Global Health a field of study research and practice defined in 2009 with precursors in international health and development is currently reckoning with itself The field has well intended goals emphasizing collaboration and dialogue between population health public health clinical care and other disciplines to address socioeconomic determinants of health and employing interdisciplinary approaches to address health inequities wherever they exist Despite these lofty ideals there are concerns that the field itself has historically served to reinforce rather than deconstruct colonialism and power imbalances At this point in time the field has evolved toward a vision of a community of practice between institutions across the income spectrum HIC LMIC LIC working in bidirectional and multidirectional ways to develop staff staff space systems and strategies to eliminate health disparities However with deeply rooted colonial assumptions racism elitism and other forms of bias underlying institutions and individuals initiatives operating under the auspices of Global Health are all too often antithetical to the pursuit itself

Relational Mindfulness Roberto Aristegui,Javier Garcia Campayo,Patricio Barriga,2021-03-25 This book proposes a new approach to mindfulness based interventions presenting them not as individual but as relational practices In the last decades mindfulness has exerted a growing influence on many fields of research and activity but always as an individual practice The authors in this volume believe that the strong development of mindfulness today implies considering a dialogue between this individualistic approach and the perspective of relational mindfulness based on social constructionism The volume is organized in two parts The first part focuses on the theoretical foundations of relational mindfulness The second part presents possibilities of applications of relational mindfulness in clinical and organizational settings to promote mental health and personal development Relational Mindfulness Fundamentals and Applications will be of interest to a wide range of professionals interested in applying mindfulness based interventions in mental health care and productive organizations such as clinical and health psychologists public health professionals and human resources analysts and consultants among others It is true that the metaphor of mindfulness has been enormously fruitful in its invitation to innovate By removing meditative practices from their ancient roots practitioners were free to create practices especially relevant to context At the same time there was also a recognizable loss in the profoundly rich heritage that was left behind For many of us the greatest loss resulted from the absorption of such practices into Western individualism What had once been an orientation to practice emphasizing our fundamental inter being had become a gateway to silent separation It is in this context that the present volume bursts into significance With special appreciation to the editors of this book we are treated to a multi dimensional exploration into the relational dimensions of mindfulness practices Bringing ideas experience and wisdom from across professions and across continents the contributors open an exciting path to the future Excerpt from the Foreword by Kenneth J Gergen
