Annales des mines, ou Recueil de mémoires sur l'exploitation des mines, et sur les sciences qui s'y rapportent, 1874 *Annales des mines*, 1874 , *British Museum Catalogue of printed Books*, 1881 *Chroniques d'une frontière à l'Epoque Contemporaine* Serge Guiboud-Ribaud, 2017-10-10. Ce second volume poursuit sur la période allant de la Révolution française au déclenchement de la Première Guerre mondiale. L'histoire passionnante et tumultueuse des deux villes de Pont de Beauvoisin au destin singulier. Dès le début de la Révolution ces cités jumelles alors situées dans deux tats différents la France et la Sardaigne voient défiler sur le pont frontalier qui les sépare migrants religieux et soldats jusqu'à l'invasion française de 1792. Sous la souveraineté française après une période agitée les deux bourgs retrouvent une situation plus calme. À la chute du Premier Empire deux invasions autrichiennes successives occupent les rives du Guers et ravivent les tensions. En 1814 et après les Cent Jours en 1815 la ville savoyarde retourne dans le royaume de Sardaigne. Durant la première moitié du XIXe siècle l'économie locale est essentiellement basée sur la douane et le transit des marchandises et des voyageurs. Auberges, douanes, garnisons. C'est l'âge d'or des diligences. Les nombreux touristes de passage laissent des descriptions détaillées et parfois des croquis. Ces témoignages donnent une vision vivante des hommes, des événements et de leur environnement. Dans la seconde moitié du XIXe siècle avec la révolution industrielle puis la cession par le royaume de Sardaigne de la Savoie à la France les deux bourgs perdent leurs activités traditionnelles et une partie de leurs habitants. Suit alors une transformation radicale avec la montée en puissance de l'industrie de la soierie de la culture du tabac ainsi que le

balbutiement de l'artisanat du meuble. Durant cette période, les deux villes respectivement dans les départements de l'Isère et de la Savoie n'arrivent cependant pas à fusionner malgré quatre tentatives. **"Visions of the Industrial Age, 1830-1914"**

Amy Woodson-Boulton, 2017-07-05. Providing a comprehensive interdisciplinary assessment and with a particular focus on expressions of tension and anxiety about modernity, this collection examines visual culture in nineteenth-century Europe as it attempted to redefine itself in the face of social change and new technologies. Contributing scholars from the fields of history, art literature, and the history of science investigate the role of visual representation and the dominance of the image by looking at changing ideas expressed in representations of science, technology, politics, and culture in advertising, art periodicals, and novels. They investigate how during the period, new emphasis was placed on the visual with emerging forms of mass communication: photography, lithography, newspapers, advertising, and cinema, while older forms as varied as poetry, the novel, painting, interior decoration, and architecture became transformed. The volume includes investigations into new innovations and scientific development such as the steam engine, transportation, and engineering, the microscope, spirit photography, and the orrery, as well as how this new technology is reproduced in illustrated periodicals. The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science, technology, and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin, Auguste Rodin, Gustave Caillebotte, and Camille Pissarro in colonial nineteenth-century novels, in design manuals, in museums, and in the decorations of domestic interior spaces. **Visions of the Industrial Age, 1830-1914** offers a thorough exploration of both the nature of modernity and the nature of the visual. **Mathematical Amazements and Surprises** Alfred S. Posamentier, Ingmar

Lehmann, 2010-03-19. With many entertaining examples of mathematical curiosities, educators Posamentier and Lehmann have created the perfect introduction to the wonders of mathematics for the general reader requiring only a high school background in the subject. *Bulletin mensuel des récentes publications françaises* Bibliothèque nationale (France), 1882

Railways and the Western European Capitals M. Nilsen, 2008-10-13. This book looks at the effect of railways on London, Paris, Brussels, and Berlin, focusing on each city as a case study for one aspect of implantation.
