## Macoma Oil:

*Mill & Factory*, 1962      *Rheology and Elastohydrodynamic Lubrication* B.O. Jacobson, 1991-07-24 This book gives a thorough overview on recent developments in lubricant rheology elastohydrodynamic lubrication and the effects of surface roughness and particulate contamination in the lubricant on the overall behaviour of a heavily loaded lubricated contact One of the aims of the book is to make clear to the reader that a Newtonian model for the lubricant behaviour does not have enough degrees of freedom to be able to describe the friction traction behaviour of heavily loaded lubricated contacts or the oil film build up and collapse under surface asperities for rough surfaces The book contains quite a lot of experimental data of lubricants at high pressures both solidification pressures compressibilities and shear strength increase coefficients which make it possible to estimate the friction and power loss in heavily loaded lubricated contacts for different pressures temperatures sliding speeds and lubricant types This is the first time that data of this type has been included in a textbook and it is hoped that the questions highlighted will serve to initiate and guide future research in this field      *Fate and Effects of Petroleum Hydrocarbons in Marine Ecosystems and Organisms* Douglas A. Wolfe, 2013-09-24 Fate and Effects of Petroleum Hydrocarbons in Marine Organisms and Ecosystems is a collection of papers presented at the international symposium by the same title held at the Olympic Hotel in Seattle Washington on November 10 12 1976 This book is organized into three parts encompassing 46 chapters Part I deals with the inputs and physical transport processes influencing the distribution and composition of petroleum hydrocarbons in marine systems Part II discusses the bioaccumulation and metabolism of hydrocarbons by marine organisms Part III contains papers that tackle the biological and ecological effects of petroleum exposure in marine systems This book is of great value to marine and environmental scientists and researchers

and toxicological effects of heavy metals and other cations on marine species The book also describes the impact of PCBs and pesticides on the estuarine environment and how more specialized and less persistent chemicals affect the development and reproduction of nontarget organisms such as Crustacea This book will be a valuable resource for marine scientists ecologists and students , **Mill and Factory** ,1962 **Ecological Research Series** ,1976 **Species Profiles** Kenneth K.
