

MODULE 4

CHAPTER 6 - Supply, Demand, and Government Policies

Price Ceiling = a legal maximum on the price at which a good can be sold

** Results in shortage. Shortage of a product puts upward pressure on its price.**

Price Floor = a legal minimum on the price at which a good can be sold

** Results in surplus. Surplus of a product puts downward pressure on its price.

**

** When the government imposes a binding price ceiling on a competitive market, a shortage of the good arises, and sellers must ration the scarce goods among the large number of potential buyers **

Macroeconomics Eco201:

A Disciplinary Blueprint for the Assessment of Information Literacy Dorothy Anne Warner, 2008-06-30 Have you ever worried that literature on library instruction deals more with methods of assessing student attitude than student learning? If so, you'll be glad to know someone is doing something about it. Eight unique disciplinary modules are presented, each identifying a series of information literacy objectives developed in accordance with Bloom's Taxonomy of Cognitive Objectives. A substantive curriculum map embedded within each module lists the sequence of courses required for the disciplinary major and the level at which the course is taught (sophomore, junior, etc.) notes whether information literacy instruction is currently taught by the library for that particular course and delineates the specific information literacy learning objectives the students must master in order to fulfill the course assignments. Collaborative responsibility for teaching the information literacy skills is also outlined with specific recommendations for ways the library can strengthen its support for the specific discipline. In addition, assessment methodologies are identified, including scoring rubrics designed specifically for the disciplinary information literacy objectives. An indispensable resource for academic librarians ready to take the leap from episodic reactive response to programmatic sequenced integration into the curriculum. **Catalog**

Community College of Denver, 2009 *Rethinking Social Studies Teacher Education in the Twenty-First Century* Alicia R. Crowe, Alexander Cuenca, 2015-11-26 In this volume, teacher educators explicitly and implicitly share their visions for the purposes, experiences, and commitments necessary for social studies teacher preparation in the twenty-first century. It is divided into six sections where authors reconsider: 1. purposes, 2. course curricula, 3. collaboration with on-campus partners, 4. field experiences, 5. community connections, and 6. research and the political nature of social studies teacher education. The chapters within each section provide critical insights for social studies researchers, teacher educators, and teacher education programs. Whether readers begin to question what are we teaching social studies teachers for, who should we collaborate with to advance teacher learning, or how should we engage in the politics of teacher education, this volume leads us to consider what ideas, structures, and connections are most worthwhile for social studies teacher education in the twenty-first century to pursue. **Major Challenges Facing Higher Education in the Arab World: Quality Assurance and**

Relevance Adnan Badran, Elias Baydoun, John R. Hillman, 2019-03-25 This book focuses on two crucial issues that need to be addressed as a matter of urgency by universities in the Arab region: namely, a. conducting independent assessments of the quality of their teaching, research, administration, governance, and planning, and b. determining the relevance of their teaching, research, and societal impacts. Although well established around the world in manufacturing industries and private sector service industries, including the research and commercialisation arms of the major universities and research institutes, it is only in recent years that quality assurance (QA) assessments have started to be applied to most aspects of education. Several Arab universities are adopting various forms of QA, but some variants are little more than bureaucratic box-ticking exercises.

with minimal commitment by staff to the ultimate aim of continuing self improvement This book will be of interest to senior management at faculty and departmental level and above in all Arab universities specifically and more generally in Islamic institutions of higher education Senior management in other universities especially in the developing world will benefit from its analyses and recommendations Catalog Aims Community College, 1998 **Arab Migrant Communities in the GCC** Zahra Babar, 2017 This volume provides a series of empirically dense analyses of the historical and contemporary dynamics of Arab intra regional migration to the monarchies of the Persian Gulf and unravels the ways in which particular social and cultural practices of Arab migrants interact with the host states Among other things specific contributions allow us to consider the socioeconomic and political factors that have historically shaped the character of the Arab migratory experience the sorts of work opportunities that Arab migrants have sought in the region what their work conditions and lived experiences have been and whether we are able to discern any patterns of sociocultural integration for Arab non nationals
