The Formula Luke Dormehl, 2014-04-03 What if everything in life could be reduced to a simple formula What if numbers were able to tell us which partners we were best matched with not just in terms of attractiveness but for a long term committed marriage Or if they could say which films would be the biggest hits at the box office and what changes could be made to those films to make them even more successful Or even who out of us is likely to commit certain crimes and when This may sound like the world of science fiction but in fact it is just the tip of the iceberg in a world that is increasingly ruled by complex algorithms and neural networks In The Formula Luke Dormehl takes you inside the world of numbers asking how we came to believe in the all conquering power of algorithms introducing the mathematicians artificial

intelligence experts and Silicon Valley entrepreneurs who are shaping this brave new world and ultimately asking how we survive in an era where numbers can sometimes seem to create as many problems as they solve New Trends in Database and Information Systems II Nick Bassiliades, Mirjana Ivanovic, Margita Kon-Popovska, Yannis Manolopoulos, Themis Palpanas, Goce Trajcevski, Athena Vakali, 2014-08-16 This volume contains the papers of 3 workshops and the doctoral consortium which are organized in the framework of the 18th East European Conference on Advances in Databases and Information Systems ADBIS 2014 The 3rd International Workshop on GPUs in Databases GID 2014 is devoted to subjects related to utilization of Graphics Processing Units in database environments The use of GPUs in databases has not yet received enough attention from the database community The intention of the GID workshop is to provide a discussion on popularizing the GPUs and providing a forum for discussion with respect to the GID s research ideas and their potential to achieve high speedups in many database applications The 3rd International Workshop on Ontologies Meet Advanced Information Systems OAIS 2014 has a twofold objective to present new and challenging issues in the contribution of ontologies for designing high quality information systems and new research and technological developments which use ontologies all over the life cycle of information systems The 1st International Workshop on Technologies for Quality Management in Challenging Applications TQMCA 2014 focuses on quality management and its importance in new fields such as big data crowd sourcing and stream databases The Workshop has addressed the need to develop novel approaches and technologies and to entirely integrate quality management into information system management *Red Teaming* Bryce G. Hoffman, 2017-05-16 Red Teaming is a revolutionary new way to make critical and contrarian thinking part of the planning process of any organization allowing companies to stress test their strategies flush out hidden threats and missed opportunities and avoid being sandbagged by competitors Today most if not all established corporations live with the gnawing fear that there is another Uber out there just waiting to disrupt their industry Red Teaming is the cure for this anxiety The term was coined by the U S Army which has developed the most comprehensive and effective approach to Red Teaming in the world today in response to the debacles of its recent wars in Iraq and Afghanistan However the roots of Red Teaming run very deep to the Roman Catholic Church s Office of the Devil s Advocate to the Kriegsspiel of the Prussian General Staff and to the secretive AMAN organization Israel s Directorate of Military Intelligence In this book author Bryce Hoffman shows business how to use the same techniques to better plan for the uncertainties of today s rapidly changing economy Red Teaming is both a set of analytical tools and a mindset It is designed to overcome the mental blind spots and cognitive biases that all of us fall victim to when we try to address complex problems The same heuristics that allow us to successfully navigate life and business also cause us to miss or ignore important information It is a simple and provable fact that we do not know what we do not know The good news is that through Red Teaming we can find out In this book Hoffman shows how the most innovative and disruptive companies such as Google and Toyota already employ some of these

techniques organically He also shows how many high profile business failures including those that sparked the Great Recession could easily have been averted by using these approaches Most importantly he teaches leaders how to make Red Teaming part of their own planning process laying the foundation for a movement that will change the way America does business

Defining the Fringe of Contemporary Australian Archaeology Rocco Bosco,Darran Jordan,2018-04-18 Popular culture has often presented a mythologised version of archaeology that at times misinforms the general public about broader academic intentions The fantastic and bizarre continue to capture the public imagination so that while archaeological teams excavate survey and record they occupy the same geographic locations as ghost tour operators and seekers of the supernatural Not only does archaeology operate within the same geography as modern mythology but widespread access to technology from satellite imagery to GPS data means that enthusiastic amateurs can partake in their own investigations With limited landscape identification training an enthusiasm for discovery and strange cultural biases fringe operators have utilised new technologies to justify old fallacies through variant forms of amateur archaeology This collection draws on the wealth of work currently being undertaken by contemporary archaeologists in Australia from rock art observations to art archaeology experiments and even space archaeology It explores archaeology on the edge contextualising the fringe dwellers that operate on the periphery of accepted academia It also looks at contemporary archaeological theory and practice in relation to these fringe operators developing approaches toward interaction in contrast to the more common reaction of repudiation The relationship between the accepted centre and the outer edge in contemporary archaeological practice and theory unveils much about popular misconceptions and how archaeological spaces can be overlaid with variant mythological and cultural interpretations

Educational Entrepreneurship Nicholas D. Young,Peter Bittel,2015-04-14 School superintendents business managers central office leaders elected officials industry leaders educators and aspiring practitioners in the field of education will find this book a useful resource in understanding innovative ways to stretch limited school resources or to improve the scope and quality of services and programs offered to deserving students Approaching educational entrepreneurship by leveraging public and private partnerships is the primary focus throughout the book Where available real world examples from school districts across the country are presented to provide the reader with ideas to consider and potentially emulate Appreciating that there are innumerable ways for school leadership to pursue entrepreneurialism chapters that represent a wide cross section of common areas of educational practice were selected for inclusion It should not be surprising then that such topics as

curriculum development educational technology cooperative purchasing higher education relationships grant writing foundation planning and special education service delivery were all examined as potential public private partnership opportunities Improving schools in the twenty first century will require new ways of approaching age old challenges not the least of which centers on increasingly scarce public funding In response the authors invite all readers to join the quest of applying the principles of entrepreneurship to schools to make them even stronger for the next generation
