Global Objects Edward S. Cooke, 2022-09-13 A bold reorientation of art history that bridges the divide between fine art and material culture through an examination of objects and their uses Art history is often viewed through cultural or national lenses that define some works as fine art while relegating others to the category of craft Global Objects points the way to an interconnected history of art examining a broad array of functional aesthetic objects that transcend geographic and temporal boundaries and challenging preconceived ideas about what is and is not art Avoiding traditional binaries such as East versus West and fine art versus decorative art Edward Cooke looks at the production consumption and circulation of objects made from clay fiber wood and nonferrous base metals Carefully considering the materials and process of making and connecting process to product and people he demonstrates how objects act on those who look at use and acquire them He reveals how objects retain aspects of their local fabrication while absorbing additional meanings in subtle and unexpected ways as they move through space and time In emphasizing multiple centers of art production amid constantly changing contexts Cooke moves beyond regional histories driven by geography nation state time period or medium Beautifully illustrated Global Objects traces the social lives of objects from creation to purchase and from use to experienced meaning charting exciting new directions in art history

Amerasia Elizabeth Horodowich,Alexander Nagel,2023-09-05 A connected world as imagined by early modern European artists mapmakers and writers where Asia and the Americas were on a continuum America and Asia mingled in the geographical and cultural imagination of Europe for well over a century after 1492 Through an array of texts maps objects and images produced between 1492 and 1700 this compelling and revelatory study immerses the reader in a vision of a world where Mexico really was India North America was an extension of China and South America was marked by a variety of biblical and Asian sites It asks further What does it mean that the Amerasian worldview predominated at a time when Europe itself was coming into cultural self definition Each of the chapters focuses on a particular artifact map image or book that illuminates aspects of Amerasia from specific European cultural milieus Amerasia shows how it was possible to inhabit a

world where America and Asia were connected either imaginatively when viewed from afar or in reality when traveling through the newly encountered lands Readers will learn why early modern maps regularly label Mexico as India why the Amazonas region was named after a race of Asian female warriors and why artifacts and manuscripts that we now identify as Indian and Chinese are entangled in European collections with what we now label Americana Elizabeth Horodowich and Alexander Nagel pose a dynamic model of the world and of Europe's place in it that was eclipsed by the rise of Eurocentric colonialist narratives in the nineteenth and twentieth centuries To rediscover this history is an essential part of coming to terms with the emergent polyfocal global reality of our own time

An Object of Seduction Xiaolin Duan, 2022-02-07. The first book-length English language study focusing on the early modern export of Chinese silk to New Spain from the sixteenth to the seventeenth century. *An Object of Seduction* compares and contrasts the two regions from perspectives of the sericulture development, the widespread circulation of silk fashion, and the government attempts at regulating the use of silk. Xiaolin Duan argues that the increasing demand for silk on the worldwide market, on the one hand, contributed to the parallel development of silk fashion and sericulture in China and New Spain, and on the other hand, created conflicts on imperial regulations about foreign trade and hierarchical systems. Incorporating evidence from local gazetteers, correspondence, manual books, illustrated treatises, and miscellanies, this book explores how the growing desire for and production of raw silk and silk textiles empowered individuals and societies to claim and redefine their positions in changing time and space, thus breaking away from the traditional state control.

Picturing Commerce in and from the East Asian Maritime Circuits, 1550-1800 Tamara H. Bentley, 2025-10-01. Combining strikingly new scholarship by art historians, historians, and ethnomusicologists, this interdisciplinary volume illuminates trade ties within East Asia and from East Asia outwards in the years 1550 to 1800. While not encyclopedic, the selected topics greatly advance our sense of this trade picture. Throughout the book, multi-part trade structures are excavated; the presence of European powers within the Asian trade nexus features as part of this narrative. Visual goods are highlighted, including lacquerwares, paintings, prints, musical instruments, textiles, ivory sculptures, unfired ceramic portrait figurines, and Chinese, Japanese, Korean, and Southeast Asian ceramic vessels. These essays underscore the significance of Asian industries producing multiples and the rhetorical charge of these goods shifting in meaning as they move. Everyday commodities are treated as well; for example, the trans-Pacific trade in contraband mercury used in silver refinement is spelled out in detail. Building reverberations between merchant networks, trade goods, and the look of the objects themselves, this richly illustrated book brings to light the Asian trade engine powering the early modern visual cultures of East and Southeast Asia, the American colonies, and Europe.
