the air vehicle design process using the principles of systems engineering Due to the high cost and the risks associated with
development complex aircraft systems have become a prime candidate for the adoption of systems engineering
methodologies This book presents the entire process of aircraft design based on a systems engineering approach from
conceptual design phase through to preliminary design phase and to detail design phase Presenting in one volume the
methodologies behind aircraft design this book covers the components and the issues affected by design procedures The
basic topics that are essential to the process such as aerodynamics flight stability and control aero structure and aircraft
performance are reviewed in various chapters where required Based on these fundamentals and design requirements the
author explains the design process in a holistic manner to emphasise the integration of the individual components into the
overall design Throughout the book the various design options are considered and weighed against each other to give
readers a practical understanding of the process overall Readers with knowledge of the fundamental concepts of
aerodynamics propulsion aero structure and flight dynamics will find this book ideal to progress towards the next stage in
their understanding of the topic Furthermore the broad variety of design techniques covered ensures that readers have the
