Handbook Of Value Perspectives From Economics Neuroscience Philosophy Psychology And Sociology:

Handbook of Value Tobias Brosch, David Sander, 2015-10-29 What is value Where does it come from How does it impact our emotions motivations decisions and experiences Value is involved in practically every aspect of human life whether we decide whom to marry or which political candidate to elect whether we choose between consumer goods whether we ask ourselves what is morally right or beautiful or sacred value plays a crucial role Today the investigation of value is central to many disciplines interested in human thinking feeling and behavior such as economics neuroscience philosophy psychology or sociology Interestingly while these disciplines all investigate value they use different definitions and focus on different aspects of the phenomenon The Handbook of Value combines the forces of the many disciplines involved in value research by integrating the perspectives of distinguished scholars from the different disciplines To allow for a high degree of interdisciplinarity the editors assembled a panel of eminent associate editors representing the different disciplines Professor Ernst Fehr economics Professor Patrik Vuilleumier neuroscience Professor Julien Deonna philosophy and Professor Fabrice Clement sociology Contributions cover conceptual issues such as definitions of value psychological and neurological mechanisms underlying value computation and representation types and taxonomies of value interindividual and intercultural value differences the role of value in emotion moral judgment decision making and behavior as well as case studies of individual varieties of value The volume contributes to an interdisciplinary dialogue and integration by providing a common reference point that will serve as a resource for disciplinary excellence and interdisciplinary cross fertilization At the same time the volume provides an excellent overview of the academic state of the art for more practically oriented readers for example from a business background who want to understand the determinants of value **Handbook of Value** Tobias Brosch, David Sander, Fabrice Clément, Julien A. Deonna, Ernst Fehr, Patrik Vuilleumier, 2016 This Handbook combines the forces of the many disciplines involved in value research and covers issues such as definitions of value and the role of value in emotion The book contributes to an interdisciplinary dialogue by providing a common reference point to serve as a resource for disciplinary excellence and interdisciplinary cross fertilization

Memory Sites and Conflict Dynamics Karina V. Korostelina, 2024-10-21 This book explores the ways in which memory sites contribute to the dynamics of identity based conflicts fueling fears and sharpening divisions or promoting commonalities and reducing violence Through an analysis of the dynamics of identity based conflicts the book shows how memory sites become intertwined with the transformations of social boundaries and perceptions of relative deprivation outgroup threat collective axiology and power relations It posits that these two sets of factors the functioning of collective memory as an ideological construct and the transformation of conflictual social relations define the role and influence of memory sites in the dynamics of identity based conflicts Through multiple case studies representing different dynamics dealing with fascist and communist pasts in Italy post colonial relations between South Korea and Japan ethnic conflict in Kosovo and tribal acknowledgment for Native American Nations the book

discusses how memory sites contribute to competition over ownership fights for legitimacy claims of entitlements and negative portrayals of the Other In doing so it outlines four major functions of memory sites enhancing ascribing interacting and legitimizing and shows how they contribute to and shape the structure and dynamics of conflict Concentrating on the linkages between memory sites violence prevention and reconciliation the book proposes solutions for promoting peace including the focus on plurality of heritage recognition of fluidity of meanings and resistance to singular interpretations and manipulations by identity entrepreneurs This volume will be of much interest to students of peace and conflict studies memory studies and International Relations in general

The VaKE Handbook ,2022-04-04 Values without knowledge are blind while knowledge without values is irresponsible This principle underlines the motivation to write this book It presents VaKE Values and Knowledge Education a theoretical model based on constructivist learning theories and many examples for its practical implementation in diverse educational fields Thanks to its extensive theoretical foundation the model opens up almost unlimited possibilities to tailor the course to the needs of the participants and to the dynamics of a process The justification of ethical values is attributed a general importance for the development of personality as well as for the thriving and flourishing living with each other in a society School education aims at providing respective knowledge However this knowledge is separated from the subject matters whereas for its application in daily life both knowledge on facts as well as on values are necessary and indispensable for evaluation assessment and decision making

Psychology in Southeast Asia Grant Rich,Jas Laile Jaafar,David Barron,2020-04-16 Despite diverse rich cultural traditions and abundant economic opportunity there has been a paucity of research on psychology in Southeast Asia This book aims to fill that gap with a series of well written theoretical and empirical chapters by PhD psychologists in SE Asia along with respected international colleagues and co authors from around the globe In particular this book focuses upon critical sociocultural clinical and health issues and perspectives in psychology in Southeast Asia Overviews help contextualize the cultural data permitting nuanced examination of significant psychological issues in nations such as Malaysia Indonesia Thailand Singapore and more Psychologists and mental health professionals with interests in Asia will find this book to be a must read as will other readers seeking to deepen their cultural and international understanding

Transforming food systems: ethics, innovation and responsibility Donald Bruce,Ann Bruce,2023-08-14 Feeding the world s growing population in ways that are effective ethical and socially just and protect the natural systems on which all life depends is one of the greatest challenges facing humanity It forms the theme of this book of papers of the 2022 Edinburgh conference of the European Society for Agricultural and Food Ethics EURSAFE The dramatic increases in the cost of energy scarcities in resources and people stemming from the COVID 19 pandemic and international conflict have brought home the vulnerability of our interlinked human systems at all levels Climate change poses deeper longer term threats Global competition drives fine tuned and efficient systems but time proven local practices may show better resilience in such uncertain futures The book reflects the

sheer diversity of approaches and responses to these challenges across a wide range of academic disciplines provoking us to look at the issues in new ways They reflect the varied standpoints of producers retailers regulators farmers vets communities and citizens The challenge to reach net zero carbon is addressed in papers assessing livestock systems grasslands land use and rewilding food choices meat eating and alternatives Innovations such as genome editing uses of seaweed and the use of data pose both possibilities and challenges Animal ethics is a prominent theme with a range of papers on animal human relations animal use in research and veterinary ethics *The Political Economy of Sustainability* Fred P. Gale, 2018-07-27

This theoretical and practical book builds on the knowledge that sustainability's value pluralism cannot be reconciled with the value monism of classical neoclassical nationalist or socialist political economy Developing the concept of sustainability value SV which requires integrating economic exchange social labour environmental intrinsic and cultural use values in all processes of extraction manufacturing trade consumption and disposal the book reformulates our understanding of key political economy topics such as trade investment preference formation corporate governance and the role of the state The book illustrates how SV is being realised via multi stakeholder networks which forming at the community national and global levels enable the required cross value deliberation

The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects

Understanding Game-based Approaches for Improving Sustainable Water Governance Wietske Medema, Chengzi Chew, Jan Franklin Adamowski, Igor Mayer, Arjen

Wals,2020-04-28 The sustainable governance of water resources relies on processes of multi stakeholder collaborations and interactions that facilitate knowledge co creation and social learning Governance systems are often fragmented forming a barrier to adequately addressing the myriad of challenges affecting water resources including climate change increased urbanized populations and pollution Transitions towards sustainable water governance will likely require innovative learning partnerships between public private and civil society stakeholders It is essential that such partnerships involve vertical and horizontal communication of ideas and knowledge and an enabling and democratic environment characterized by informal and open discourse There is increasing interest in learning based transitions Thus far much scholarly thinking and to a lesser degree empirical research has gone into understanding the potential impact of social learning on multi stakeholder settings The question of whether such learning can be supported by forms of serious gaming has hardly been asked This Special Issue critically explores the potential of serious games to support multi stakeholder social learning and collaborations in the context of water governance Serious games may involve simulations of real world events and processes and are challenge players to solve contemporary societal problems they therefore have a purpose beyond entertainment They offer a largely untapped potential to support social learning and collaboration by facilitating access to and the exchange of knowledge and information enhancing stakeholder interactions empowering a wider audience to participate in decision making and providing opportunities to test and analyze the outcomes of policies and management solutions Little is known about how game based approaches can be used in the context of collaborative water governance to maximize their potential for social learning While several studies have reported examples of serious games there is comparably less research about how to assess the impacts of serious games on social learning and transformative change *Enjoyment as Enriched Experience*

Nathaniel F. Barrett,2023-02-22 This book has two main tasks 1 to call attention to the special challenges presented by our experience of affect all varieties of pleasure and pain and 2 to show how these challenges can be overcome by an enrichment approach that understands affect as the enrichment or deterioration of conscious activity as a whole This enrichment approach draws from Alfred North Whitehead as well as the pragmatists John Dewey and William James all of whom thought of affect as a fundamental aspect of experience rather than a special class of feelings It also draws from recent scientific research that suggests that the dynamic repertoire of consciousness can change effectively expanding and contracting our capacity to feel Weaving these perspectives together the book develops a theory that accounts for the peculiar phenomenology of affect and sheds new light on a diverse range of experiences from everyday pleasures and pains to the special satisfactions of the arts and religious festivity At the same time it presents a fresh and distinctively affect centered perspective on the nature of consciousness Kant's Theory of Value

Christoph Horn,Robinson dos Santos,2022-10-03 In explicit form Kant does not speak that much about values or goods The reason for this is obvious the concepts of values and goods are part of the eudaimonistic tradition and he famously criticizes eudaimonism for its flawed material approach to

ethics But he uses on several occasions the traditional teleological language of goods and values Especially in the Groundwork and the Critique of Practical Reason Kant develops crucial points on this conceptual basis Furthermore he implicitly discusses issues of conditional and unconditional values subjective and objective values aesthetic or economic values etc In recent Kant scholarship there has been a controversy on the question how moral and nonmoral values are related in Kant's account of human dignity This leads to the more fundamental problem if Kant should be seen as a prescriptivist antirealist or as subscribing to a more objective rational agency account of goods This issue and several further questions are addressed in this volume Transdisciplinarity for Small-Scale Fisheries Governance Ratana

Chuenpagdee, Svein Jentoft, 2018-10-15 The importance of small scale fisheries for sustainable livelihoods and communities food security and poverty eradication is indisputable With the endorsement of the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries FAO member states recognize that governments civil society organizations and research communities all have a role to play in helping small scale fisheries achieve these goals This book argues that policies targeting small scale fisheries need to be based on a solid and holistic knowledge foundation and support the building of governance capacity at local national and global levels The book provides rich illustrations from around the world of why such knowledge production needs to be transdisciplinary drawing from multiple disciplinary perspectives and the knowledge that small scale fisheries actors have in order to identify problems and explore innovative solutions Transdisciplinarity for Small Scale Fisheries Governance Analysis and Practice edited by Ratana Chuenpagdee and Svein Jentoft successfully demonstrates how small scale fisheries are important and what social and political conditions are conducive to their wellbeing The volume contributes tremendously to building capacity of fisheries communities and policy makers to make the ideals of small scale fisheries a reality It establishes the ecological social and economic sense behind small scale fisheries A milestone reference for all those who believe in small scale fisheries and are keen to defend them with quality evidence Sebastian Mathew Executive Director International Collective in Support of Fishworkers ICSF The Small Scale Fisheries Guidelines guiding principles call for holistic and integrated approaches for their implementation This book will help a new generation of scientists policy makers and small scale fisheries actors make the fundamental connections between different disciplines in science traditional knowledge and policy to guide a collective process towards sustainable small scale fisheries The book contains an inspiring collection of practical cases from around the world complemented by deep dives into dimensions of small scale fisheries like food security stewardship climate change and gender which all call for transdisciplinary approaches Nicole Franz Fisheries and Aquaculture Department Food and Agriculture Organization of the United Nations FAO Rome Italy **A Philosophy for the Science of Animal Consciousness** Walter Veit, 2023-06-16 This book attempts to advance Donald Griffin's vision of the final crowning chapter of the Darwinian revolution by developing a philosophy for the science of animal consciousness It advocates a Darwinian bottom up approach that treats consciousness as

a complex evolved and multidimensional phenomenon in nature rather than a mysterious all or nothing property immune to the tools of science and restricted to a single species The so called emergence of a science of consciousness in the 1990s has at best been a science of human consciousness This book aims to advance a true Darwinian science of consciousness in which its evolutionary origin function and phylogenetic diversity are moved from the field s periphery to its very centre thus enabling us to integrate consciousness into an evolutionary view of life Accordingly this book has two objectives i to argue for the need and possibility of an evolutionary bottom up approach that addresses the problem of consciousness in terms of the evolutionary origins of a new ecological lifestyle that made consciousness worth having and ii to articulate a thesis and beginnings of a theory of the place of consciousness as a complex evolved phenomenon in nature that can help us to answer the question of what it is like to be a bat an octopus or a crow A Philosophy for the Science of Animal Consciousness will appeal to researchers and advanced students interested in advancing our understanding of animal minds as well as anyone with a keen interest in how we can develop a science of animal consciousness

Foundations of the Psychological Intervention Sergio Salvatore, Barbara Cordella, 2024-04-03 *Foundations of the Psychological Intervention* presents a new General Theory for Psychological Intervention GTPI delving into how its methodology can be applied across diverse psychological contexts Rooted in semiotic cultural psychology and guided by the GTPI framework this book offers a cohesive perspective of psychology addressing the prevailing fragmentation evident in various domains of psychology such as health sports forensic organisational and clinical psychology The framework establishes a foundation of methods and techniques that render psychological interventions applicable across various domains substantiated by concrete examples from different areas With chapters revolving around theories of action change and the client dynamics this groundbreaking work provides both a conceptual and methodological structure to underpin domain specific theories and methodologies thereby strengthening the conceptual links among distinct domains of psychology As one of the first works to develop a theory and method of intervention across multiple psychological domains this book will be of interest to postgraduate students and researchers specialising in cultural psychology clinical psychology health psychology and the philosophy of psychology Moreover it serves as a useful reading for practising psychologists and psychology professionals

Paradise Understood T. Ryan Byerly, Eric J. Silverman, 2017-03-17 *Paradise Understood* New Philosophical Essays about Heaven systematically investigates heaven or paradise as conceived within theistic religious traditions such as Rabbinic Judaism Christianity and Islam It considers a variety of topics concerning what life in paradise would could or will be like for human persons The collection offers novel approaches to questions about heaven of perennial philosophical interest and breaks new ground by expanding the range of questions about heaven that philosophers have considered The contributors wrestle with questions about human life in paradise that span the spectrum of the major subfields of philosophical enquiry By employing both historical and contemporary philosophical resources the volume makes a pioneering contribution toward answering pressing
