Hannah Arendt And Human Rights Hannah Arendt And Human Rights:

Hannah Arendt and Human Rights Peg Birmingham, 2006-09-29 Hannah Arendt's most important contribution to political thought may be her well known and often cited notion of the right to have rights In this incisive and wide ranging book Peg Birmingham explores the theoretical and social foundations of Arendt's philosophy on human rights Devoting special consideration to questions and issues surrounding Arendt's ideas of common humanity human responsibility and natality Birmingham formulates a more complex view of how these basic concepts support Arendt's theory of human rights Birmingham considers Arendt's key philosophical works along with her literary writings especially those on Walter Benjamin and Franz Kafka to reveal the extent of Arendt's commitment to humanity even as violence horror and pessimism overtook Europe during World War II and its aftermath This current and lively book makes a significant contribution to philosophy political science and European intellectual history

Hannah Arendt and Human Rights Peg Birmingham, 2006-09-29 The author explores the theoretical and social foundations of Arendt's philosophy on human rights Questions and issues surrounding Arendt's ideas of common humanity human responsibility and natality are described

Cultural Heritage and Human Rights Helaine Silverman, D. Fairchild Ruggles, 2008-10-14 Is there a universal right to the free expression and preservation of cultural heritage and if so where is that right articulated and how can it be protected No corner of today's world has escaped the effects of globalization for better or worse This volume addresses a deeply political aspect of heritage preservation and management as it relates to human rights

Intersectionality and Human Rights Law Shreya Atrey, Peter Dunne, 2020-12-10 This collection of essays analyses how diversity in human identity and disadvantage affects the articulation realisation violation and enforcement of human rights The question arises from the realisation that people who are severally and severely disadvantaged because of their race religion gender age disability sexual orientation class etc often find themselves at the margins of human rights their condition seldom improved and sometimes even worsened by the rights discourse How does one make sense of this relationship between the complexity of people's disadvantage and violation of their human rights Does the human rights discourse based on its universal and common values have tools methods or theories to capture and respond to the difference in people's lived experience of rights Can intersectionality help in that quest This book seeks to inaugurate this line of inquiry

Hannah Arendt and Cosmopolitanism Angela Taraborrelli, 2024-09-05 Hannah Arendt and Cosmopolitanism presents the first comprehensive study of Hannah Arendt's cosmopolitanism Challenging the common belief that cosmopolitanism is a negligible or incompatible element of Arendt's thought it unpacks various key elements of her philosophy such as her critique of human rights the defence of the right to have rights as a right to belong to a particular political community the scepticism towards the establishment of a world government as a solution to the problem of statelessness and the importance she attached to the passport Through this the text argues that Arendt is a theorist of cosmopolitanism in her own right by reconstructing as systematically as possible an

issue that is relatively neglected in the secondary literature Taraborrelli shows how Arendt anticipates and develops cosmopolitanism in four main forms moral political institutional judicial cultural and how in her thought there is no insuperable contradiction between cosmopolitanism and belonging to a political community or between cosmopolitanism and the conditions of political action

Human Rights Darren O'Byrne, 2014-06-06 Human Rights An Introduction is an important text that provides a comprehensive overview of human rights and related issues from a social science perspective First this book does more than discuss theory it uses case studies and personal testimonies in the debate Human rights as an area of academic interest cannot be easily divorced from human rights struggles and the reality of contemporary conditions Second the book is aimed at what is an emerging and growing cross disciplinary field of study Human rights issues are increasingly coming to the fore in a number of academic debates Whereas the study of human rights has traditionally been included in departments of law international relations and philosophy a number of courses are now being set up in departments of sociology and anthropology Consequently there is an increasing need to bring these disparate approaches together

The Right to Have Rights Stephanie DeGooyer, Alastair Hunt, Lida Maxwell, Samuel Moyn, 2018-02-13 Five leading thinkers on the concept of rights in an era of rightlessness Sixty years ago the political theorist Hannah Arendt an exiled Jew deprived of her German citizenship observed that before people can enjoy any of the inalienable Rights of Man before there can be any specific rights to education work voting and so on there must first be such a thing as the right to have rights The concept received little attention at the time but in our age of mass deportations Muslim bans refugee crises and extra state war the phrase has become the center of a crucial and lively debate Here five leading thinkers from varied disciplines including history law politics and literary studies discuss the critical basis of rights and the meaning of radical democratic politics today

Human Rights and the Reinvention of Freedom Nick Stevenson, 2016-10-04 This volume seeks to propose a reinvention of freedom under contemporary conditions of globalization cross border mobility and neo liberal dominance There are currently two predominant myths circulating about freedom The first is that in a global age growing numbers of citizens are less concerned with freedom than they are with security Secondly there is the presumption that freedom only refers to market freedom and consumerism implying that the ideas of choice and consumption are interchangeable with ideas of freedom Stevenson argues that while these arguments are significant they are deeply misleading More authentic ideas of freedom such as self realisation participating in politics and seeking a meaningful life of self reflection have not been entirely displaced but have instead become reinvented in our global times The cries of freedom can still be heard in a multitude of places from the Arab Spring to the Occupy Movement and from the protests against European austerity to the current popularity of human rights Stevenson also argues that the idea of freedom has become increasingly mobile in our interconnected and transnational society The spaces and places of civil society are more complex in this global age pushing ideas of freedom far beyond the usual arena of national politics This volume brings together a diverse range of cultural interpretations in respect of freedom related to the idea of the commons cosmopolitanism contemporary documentary cinema and the history of jazz music Exploring the ways in which notions of freedom are being re made within the context of the present and looking more precisely at the current threats to freedom it will be of interest to students and scholars of globalization human rights and cultural sociology

The Limits of Human Rights Bardo Fassbender, Knut Traisbach, 2019-11-21 What are the limits of human rights and what do these limits mean This volume engages critically and constructively with this question to provide a distinct contribution to the contemporary discussion on human rights Fassbender and Traisbach along with a group of leading experts in the field examine the issue from multiple disciplinary perspectives analysing the limits of our current discourse of human rights It does so in an original way and without attempting to deconstruct or deny human rights Each contribution is supplemented by an engaging comment which furthers this important discussion This combination of perspectives paves the way for further thought for scholars practitioners students and the wider public Ultimately this

volume provides an exceptionally rich spectrum of viewpoints and arguments across disciplines to offer fresh insights into human rights and its limitations

Denationalisation and Its Discontents Christian Prener, 2022-12-19 Over the past two decades denationalisation the controversial practice of revoking citizenship from unwanted citizens has re entered Western law and politics with astonishing haste In this book Christian Prener traces this remarkable development in the United Kingdom Denmark France and the United States and offers a timely and critical examination of the legal moral and political acceptability of citizenship revocation in response to acts of misconduct or disloyalty Through an exploration of contemporary practices caselaw and theory the book distils some of the hard questions posed by the Western revival of denationalisation within international human rights law moral philosophy and political theory as it probes the lawfulness efficacy and political legitimacy of revoking citizenship in the 21st century

Human Rights Austin Sarat, Thomas R. Kearns, 2001 DIVBrings together essays that examine contestation and contingency in today s human rights politics div CiviC Disobedience Claire Moulin-Doos, 2015-05-21 The book offers a counter model to the classical liberal theories of civil disobedience as developed by authors such as John Rawls and Ronald Dworkin Based on a strict opposition between liberalism and democracy it proposes a new perspective for the understanding of political disobedience As an alternative to civil disobedience the author proposes the idea of civic disobedience With reference to authors such as Chantal Mouffe Jacques Ranci re and Stanley Fish and in opposition to liberal concepts of democracy the outlines of a new novel theory of democracy become visible

The Idea of Human Rights Revisited David Álvarez, João Cardoso Rosas, 2022-08-18 This volume takes stock of the seminal contribution of Charles Beitz to the so called political turn in the philosophy of human rights whose origins are in the work of the late Rawls In his already classic book *The Idea of Human Rights* 2009 Beitz proposes that human rights are better understood from the vantage point of their practice in the contemporary world Instead of looking at these rights as legal and political instantiations of fully justified moral rights Beitz reconstructs the idea of human rights as being part of a global discursive practice that can only be understood in the framework of the international system of states in which we live In this system of interdependent states with the consequent dispersion of political authority human rights constitute an array of internal justifications and criticisms rather than a blueprint of the ideal society All the chapters in this volume draw on these fundamental ideas elaborated by Beitz and propose to extend them further in their connection with humanistic accounts of human rights with the plurality of contexts in which the practice of human rights takes place and finally with the interconnections between these rights and global justice or intergenerational justice The chapters in this book were originally published as a special issue of *Critical Review of International Social and Political Philosophy*

Avramopoulou,2025-02-26 This book presents a novel approach to the study of contemporary social movements and activism Based on extensive ethnographic research of the life and politics of feminist LGBTQI and women s religious groups in Istanbul from 2007 to 2015 it explores the affects meanings and interpretations these groups express in their activism in particular their strategic use of human rights language to claim institutional and social legitimacy and their reinterpretation of gender queer theory across politics of difference to make sense of global dynamics that affect their everyday lives Chapters interweave personal accounts and life histories of individual activists with specific historical events to demonstrate the activists dissidence regarding the conditions that have defined their differently marginalised positions in Turkey and the significance of the formation of unexpected alliances The ambivalent yet inescapable bargaining tool of rights is analysed as a demand over affective democratic visions citizenship and a life worth living and thus the right to have rights as it is argued pushes us to reflect on how power works when the political and affective surplus value invested in the need to rethink of rights even beyond human rights themselves lies both in the search for ways of institutionalising and implementing rightful demands as well as in outlining more affective visions of political resistance By arguing that activism is a performative and affective language that is defined by intersectional hopes desires and dreams as much as it engages with legal battles that define who or what might appear as being broken under specific historical and social settings *Affective Activisms* employs gender and sexuality as analytical tools to make sense of local and transnational politics of resistance in the face of the re emergence of authoritarian regimes sexual harassment gender violence homo trans phobia and Islamophobia in Turkey and worldwide It will be of interest to students and scholars across the fields of women s gender and sexuality studies queer theory critical human rights and political theory sociology and social anthropology **Statelessness** Mira L.

Siegelberg,2020-10-06 The story of how a much contested legal category statelessness transformed the international legal order and redefined the relationship between states and their citizens Two world wars left millions stranded in Europe The collapse of empires and the rise of independent states in the twentieth century produced an unprecedented number of people without national belonging and with nowhere to go Mira Siegelberg s innovative history weaves together ideas about law and politics rights and citizenship with the intimate plight of stateless persons to explore how and why the problem of

statelessness compelled a new understanding of the international order in the twentieth century and beyond In the years following the First World War the legal category of statelessness generated novel visions of cosmopolitan political and legal organization and challenged efforts to limit the boundaries of national membership and international authority Yet as Siegelberg shows the emergence of mass statelessness ultimately gave rise to the rights regime created after World War II which empowered the territorial state as the fundamental source of protection and rights against alternative political configurations Today we live with the results more than twelve million people are stateless and millions more belong to categories of recent invention including refugees and asylum seekers By uncovering the ideological origins of the international agreements that define categories of citizenship and non citizenship Statelessness better equips us to confront current dilemmas of political organization and authority at the global level Employment and Human Rights Richard L. Siegel,1994 Intellectual history is placed in the broadest possible contexts of economic political and social contexts
