Confidence Culture Shani Orgad,Rosalind Gill,2021-12-06 In Confidence Culture Shani Orgad and Rosalind Gill argue that imperatives directed at women to love your body and believe in yourself imply that psychological blocks rather than entrenched social injustices hold women back Interrogating the prominence of confidence in contemporary discourse about body image workplace relationships motherhood and international development Orgad and Gill draw on Foucault s notion of technologies of self to demonstrate how confidence culture demands of women near constant introspection and vigilance in the service of self improvement They argue that while confidence messaging may feel good it does not address structural and systemic oppression Rather confidence culture suggests that women along with people of color the disabled and other marginalized groups are responsible for their own conditions Rejecting confidence culture s remaking of feminism along individualistic and neoliberal lines Orgad and Gill explore alternative articulations of feminism that go beyond the confidence imperative

The Age of Fitness Jürgen Martschukat,2021-01-22 We live in the age of fitness Hundreds of thousands of people run marathons and millions go jogging in local parks work out in gyms cycle swim or practice yoga The vast majority are not engaged in competitive sport and are not trying to win any medals They just want to get fit Why this modern preoccupation with fitness In this new book Jürgen Martschukat traces the roots of our modern preoccupation with fitness back to the birth of modern societies in the eighteenth century showing how the idea of fitness was interwoven with modernity s emphasis on perpetual optimization and renewal But it is only in the period since the 1970s he argues that the age of fitness truly emerged as part and parcel of our contemporary neoliberal era Neoliberalism enjoins individuals to work on themselves to cultivate themselves in body and mind Fitness becomes a guiding principle of social life an era defining network of discourses and practices that shape individuals actions and self conceptions The pursuit of fitness becomes a cultural repertoire that is deeply ingrained in our institutions and way of life This wide ranging book shows how deeply fitness is inscribed in modern societies and how important fitness has become to success or failure recognition or exclusion in a society that sets great store by self responsibility performance market and competition It will be of great value not only to those interested in sport and fitness but also to anyone concerned with the conditions of success and failure in our societies today

FemTech Lindsay Anne Balfour,2023-12-23 This edited collection draws from cultural studies and Feminist Science and Technology Studies to offer a timely and exciting intervention into the growing

field of women's digital health. It explores the intersection of gender and embodied computing with particular attention to access barriers and the forms of biometric surveillance that operate in wearables, ingestibles and embeddables marketed to women, the industry generally known as FemTech. While the most utilized and profitable FemTech products include ovulation and fitness trackers, reproductive technologies, contraceptive microchips and smart pills, this only represents a fraction of health concerns affecting women. This volume aims to explore FemTech within the context of Feminist Science and Technology Studies whereby the entanglements of race, class, gender, ability, sexuality and other social and cultural identities are brought to the fore. By addressing the gaps in FemTech research and socio-cultural barriers to access, this volume critiques the forms of knowledge and experience produced through medical and cultural discourses regarding women's bodies to both highlight the inequalities in women's digital health and imagine alternative models which optimise technology for women in a way that is safe, accessible and inclusive.

Digital Femininities Frankie Rogan, 2022-07-01. *Digital Femininities: The Gendered Construction of Cultural and Political Identities Online* examines the role of new media technologies in the production of girls' cultural and political identities. The book argues that the varied and complex spaces which make up our social media should be conceptualised as important terrains upon which neoliberal and postfeminist subjectivities can be both reproduced and subverted. In doing so, the book explores many key issues underpinning current debates around gender politics and digital media, including gendered spatial politics, visibility, surveillance and regulation, beauty politics and civic and political engagement and activism. Over the last decade, the position of girls and young women within the digital landscape of social media has been a topic of much debate. On the one hand, girls' social media practices are presented as a key site of concern wherein new digital technologies are said to have produced an intensification of individualised neoliberal and postfeminist identities. Conversely, others have championed access to social media for young people as a potentially useful political tool enabling previously marginalised political subjects such as girls to access and participate within new and exciting political cultures. Locating itself at the intersection of these two approaches, this book offers a fresh contribution to these debates. Based upon the findings from focus groups with girls and young women aged between 12 and 18 in England, the book offers an in-depth analysis of the digital cultures that emerged from the study. This timely book will be essential reading for anyone interested in contemporary femininity and feminism and the role of digital media in the production of cultural, political and gendered identities.

Postfeminism and Body Image Sarah Riley, Adrienne Evans, Martine Robson, 2022-07-29. *Postfeminism and Body Image* is a groundbreaking work that provides a poststructuralist and psychosocial analysis of key issues at the intersections of body image psychology and media. The book outlines the theoretical framework through the work of renowned philosophers Michel Foucault and Gilles Deleuze and their use in feminist scholarship to address body image issues and challenges in the context of a postfeminist sensibility. The authors rethink body image, calling into question assumptions and obligations that affect recent issues related to social media.

use body positivity the transformation imperative body shaming and muscular masculinity The analysis shows the advantage of seeing body image as a form of non linear warfare structured by contradiction confusion and critique where attempts to challenge oppressive body image practices are appropriated under the guise of positive alternatives to maintain that oppression Through real world examples these nuanced concepts are made relatable and comprehensible to the readers The book also offers a number of affirmative and hopeful ways forward This is an indispensable resource for students and professionals of Gender studies Health Psychology Social Psychology and Media and Cultural Studies It is also ideal for anyone exploring body image self image postfeminism and poststructuralism **Social Media Marketing** Tracy L.
