serving as the host Nine papers were presented in the oral sessions and there were five poster presentations This monograph which is intended to provide a bird s eye view of recent trends in studies of the venous system is an outgrowth of the Gifu Workshop While it is not exactly the Proceedings of that workshop materials in the monograph were developed from ideas presented there 田中, 1950-1975 田中, 2005 Thermotherapy for Neoplasia, Inflammation, and Pain M. Kosaka, T. Sugahara, K.L. Schmidt, E. Simon, 2013-04-17 This book provides a comprehensive overview of the multitude of different forms of thermotherapy in connection with aspects of thermal physiology and cell biology The aim is to elucidate the scientific background of therapeutic actions and to promote effective new applications at the beginning of the 21st century Significant to these purposes is cooperation between experts in the fields of thermal biology hyper thermic oncology rheumatology and balneology as represented by the editors Emphasis has been placed on a balanced choice of contributions in the hope that this will enable the reader to draw helpful connections between the principles and practice of thermotherapy It is apparent that a wealth of published data exists concerning thermotherapy on the one hand and thermal physiology on the other However in the former field empirical aspects of therapeutic usefulness prevail while in the latter aspects of basic science are in the foreground Accordingly the sources where published data may be found are quite different and as a consequence many findings of potential mutual interest published in medical journals have gone unnoticed by readers of physiological journals and vice versa It is hoped that this book will bridge the gap and encourage researchers efforts to integrate the available knowledge to attain optimal coordination of clinical and theoretical aspects
