Linguistic Diversity and Teaching Nancy L. Commins, Ofelia B. Miramontes, 2006-04-21 Linguistic Diversity and Teaching raises questions and provides a context for reflection regarding the complex issues surrounding new English learners in the schools. These issues exist within a highly charged political climate and involve not only language but also culture, class, ethnicity, and the persistent inequities that characterize our educational system. The text addresses these issues through conversations among experts, practitioners, and readers that are informed by representative case studies and by a range of theoretical approaches. It is designed to engage readers in beginning to evolve their own practical theories to help them explore and perhaps modify some basic beliefs and assumptions and to become acquainted with other points of view. Throughout, readers are encouraged to interact with the text and to develop their own perspective on the issue of linguistic diversity and teaching. This is the fourth volume in Reflective Teaching and the Social Conditions of Schooling: A Series for Prospective and Practicing Teachers, edited by Daniel P. Liston and Kenneth M. Zeichner. It follows the same format as previous volumes in the series. Part I includes four cases dealing with different aspects of the impacts of the changing demographics of public schools. Each case is followed by space for readers to write their own reactions and reflections and a set of reactions to the cases written by prospective and practicing teachers, administrators, and professors. Part II presents three public arguments representing very different views about linguistic diversity in public schools. English should be the only language of instruction; all children should receive instruction in both their first language and English; planning for instruction should be based not on absolutes but on what is realistically possible in particular settings. Part III offers the authors' own interpretations of the issues raised throughout the text, outlines a number of ways in which teachers can continue to explore these topics, and includes exercises for further reflection. A glossary and annotated bibliography are provided. This text is pertinent for all prospective and practicing teachers at any stage of their training. It can be used in any undergraduate or graduate course that addresses issues of language diversity and teaching.

Critical Issues in Early Literacy Yetta Goodman, Prisca Martens, 2020-07-24 This volume adds in important ways to understanding the power and complexity of the forces in the lives of children that impact their literacy learning. The critical issues presented emerge from interpretivist research and thinking practices that are constructivist in nature. The chapters by researchers, teacher researchers, teacher educators, and teachers are antidotes to the present political context in which political agendas are being used to define literacy, literacy teaching and learning, and literacy research in narrow ways. Providing a rich source of information about how young children come to know reading and writing as a tool of communication in a range of social and cultural contexts, this book presents current research and thinking in the field, documents research that is currently being ignored by many who make decisions about children's learning values, who children are, and what they bring with them to school. It provides a useful tool for advocacy and for social action toward improving education in ways that can make a

difference in the lives of young children and raises thoughtful issues for discussion Critical Issues in Early Literacy is essential reading for early childhood teachers and prospective teachers for teacher educators for literacy researchers including teacher researchers for special educators for those working with English language and foreign language learners and for early childhood education administrators advocates and policy makers

Inquiries Into Literacy Learning and Cultural Competencies in a World of Borders Tonya Huber, Philip S. Roberson, 2018-04-01 The vision of this book has been to represent the work of educators and scholars invested in moving education beyond insular models of language study and cultural awareness to more globally representative and inclusive interactions that range from the studied word to the lived experience and from reading the word to read the world Freire Macedo 1987 A fundamental aspect of this vision is to recognize the living nature of language and its intricate role in culture Culture is mediated through language Hauerwas Skawinski Ryan 2017 p 202 and the linguistic experience of difference is essential for developing cultural competence beyond surface culture considerations The editors of this volume are committed to a closer bond between literacy learning and cultural competencies particularly when literacy practices and education are often characterized by quantifiable standards and accountability restraints Readers of this volume will find meaningful and practical approaches to engage with learners from their earliest encounter with language s through adolescence and adulthood and across ever changing local and global communities
