The Taste of Nostalgia Amy Cox Hall, 2024-11-26 An exploration of gender race and food in Peru in the 1950s and 1960s and today From the late 1940s to the mid 1960s Peru s rapid industrialization and anti communist authoritarianism coincided with the rise of mass produced cookbooks the first televised cooking shows glossy lifestyle magazines and imported domestic appliances and foodstuffs Amy Cox Hall s The Taste of Nostalgia uses taste as a thematic and analytic thread to examine the ways that women race and the kitchen were foundational to Peruvian longings for modernity both during the Cold War and today Drawing on interviews personal stories media images and archival and ethnographic research Cox Hall considers how elite European descended women and the urban home were central to Peru s modernizing project and finds that all women who labored within the deeply racialized and gendered world of food helped set the stage for a Peruvian food nationalism that is now global in the twenty first century Cox Hall skillfully connects how the sometimes unsavory tastes of the past are served again in today s profitable and pervasive gastronostalgia that helps sell Peru and its cuisine both at home and abroad

Body Horror and Shapeshifting: A Multidisciplinary Exploration Jessica Folio, Holly Luhning, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 The body is unveiled not as a terra incognita but as terra to be rediscovered The authors whose diverse origins echo the multiple media used to convey their ideas establish a link between bodily metamorphosis and psychological fissures The body is a locus of paradoxes deformed infected monstrosized or negated but at the same time fascinating intimate or sensual Here readers will open the door of disruption They will explore the flesh or the inner processes of the body the idea of its degeneration even its perception as a gaping wound The authors in this volume question the very notion of identity as they embark on a journey to reflect on the self Life itself is a shapeshifting dance we unknowingly join in its myriad of colours and moves

In Defense of Processed Food Robert L. Shewfelt, 2016-11-23 It has become popular to blame the American obesity epidemic and many other health related problems on processed food Many of these criticisms are valid for some processed food items but many

statements are overgeneralizations that unfairly target a wide range products that contribute to our health and well being In addition many of the proposed dangers allegedly posed by eating processed food are exaggerations based on highly selective views of experimental studies We crave simple answers to our questions about food but the science behind the proclamations of food pundits is not nearly as clear as they would have you believe This book presents a more nuanced view of the benefits and limitations of food processing and exposes some of the tricks both Big Food and its critics use to manipulate us to adopt their point of view Food is a source of enjoyment a part of our cultural heritage a vital ingredient in maintaining health and an expression of personal choice We need to make those choices based on credible information and not be beguiled by the sophisticated marketing tools of Big Food nor the ideological appeals and gut feelings of self appointed food gurus who have little or no background in nutrition Watch Rick James,2017 To be asleep is to be oblivious to being oblivious The danger of sleep is the danger of carbon monoxide it s colorless and odorless and you re anesthetized before you know it before you ever hit the floor And for the follower of Jesus it s just as dangerous because the Christian who is asleep is spiritually unreceptive If anything will be our undoing sleep will In this thoughtful engaging challenging book Rick James dives deep into the New Testament s teachings on spiritual wakefulness calling Christ followers to defy the darkness and remain awake as they await Christ s return Because being awake continually in prayer watchful for God s will expectant of open doors cautious of sin desiring to serve eager to repent continuously giving thanks willing to witness embracing of humility overflowing with kindness persevering in obedience changes everything Summary and Analysis of Stiff: The Curious Lives of Human Cadavers Worth Books,2017-02-07 So much to read so little time This brief overview of Stiff tells you what you need to know before or after you read Mary Roach s book Crafted and edited with care Worth Books set the standard for quality and give you the tools you need to be a well informed reader This short summary and analysis of Stiff The Curious Lives of Human Cadavers by Mary Roach includes Historical context Chapter by chapter summaries Profiles of the characters and places Important quotes Fascinating trivia Glossary of terms Supporting material to enhance your understanding of the original work About Stiff The Curious Lives of Human Cadavers by Mary Roach Acclaimed journalist Mary Roach s bestselling book Stiff offers an inside look through the through the weird world of human cadavers This globe spanning story is deeply informative surprisingly funny and occasionally disgusting These superheroes as Roach refers to them brave high speed car crashes gunshots decomposition in the sun and other indignities all in the name of advancing science and making life better for the living The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction *Oregon Wine Country Stories: Decoding the Grape* Kenneth Friedenreich,2018-04-09 Just fifty years ago Oregon had no wine industry of consequence Today the state teems with a wine culture that matches the fecundity of its land and the vital spirit of its people The pioneers who dared that tradition into being from astrophysicists to cherry farmers to harpsichord makers stand poised to pass on their legacy to an eager new

generation The bold experimentation of urban wineries now joins the steady contributions of outstanding producers like Bethel Heights Cerulean Skies Eyrie and Honeywood Kenneth Friedenreich a noted Oregon wine writer and an equally ardent Oregon wine devotee seizes this moment of transition to probe the state's fascinating oenological frontiers and evaluate the repercussions of the industry's dramatic success Based on dozens of interviews and even more glasses of wine this drinking companion volume traverses the full range of Oregon's viticultural areas providing useful AVA maps historical photos and extensive winery listings

The Ancient Emotion of Disgust Donald Lateiner, Dēmos G. Spatharas, 2017 The study of emotions and emotional displays has achieved a deserved prominence in recent classical scholarship The emotions of the classical world can be plumbed to provide a valuable heuristic tool Emotions can help us understand key issues of ancient ethics ideological assumptions and normative behaviors but more frequently than not classical scholars have turned their attention to social emotions requiring practical decisions and ethical judgments in public and private gatherings The emotion of disgust has been unwarrantedly neglected even though it figures saliently in many literary genres such as iambic poetry and comedy historiography and even tragedy and philosophy This collection of seventeen essays by fifteen authors features the emotion of disgust as one cutting edge of the study of Greek and Roman antiquity Individual contributions explore a wide range of topics These include the semantics of the emotion both in Greek and Latin literature its social uses as a means of marginalizing individuals or groups of individuals such as politicians judged deviant or witches its role in determining aesthetic judgments and its potentialities as an elicitor of aesthetic pleasure The papers also discuss the vocabulary and uses of disgust in life Galli actors witches homosexuals and in many literary genres ancient theater oratory satire poetry medicine historiography Hellenistic didactic and fable and the Roman novel The Introduction addresses key methodological issues concerning the nature of the emotion its cognitive structure and modern approaches to it It also outlines the differences between ancient and modern disgust and emphasizes the appropriateness of projective or second level disgust vilification as a means of marginalizing unwanted types of behavior and stigmatizing morally condemnable categories of individuals The volume is addressed first to scholars who work in the field of classics but since texts involving disgust also exhibit significant cultural variation the essays will attract the attention of scholars who work in a wide spectrum of disciplines including history social psychology philosophy anthropology comparative literature and cross cultural studies

What's Making Our Children Sick? Michelle Perro,Vincanne Adams,2017 Exploring the links between GM foods glyphosate and gut health With chronic disorders among American children reaching epidemic levels hundreds of thousands of parents are desperately seeking solutions to their children s declining health often with little medical guidance from the experts What s Making Our Children Sick convincingly explains how agrochemical industrial production and genetic modification of foods is a culprit in this epidemic Is it the only culprit No Most chronic health disorders have multiple causes and require careful disentanglement and complex treatments But what if toxicants in our foods are a major culprit one that if corrected could lead to tangible results and increased health Using patient accounts of their clinical experiences and new medical insights about pathogenesis of chronic pediatric disorders taking us into gut dysfunction and the microbiome as well as the politics of food science this book connects the dots to explain our kids ailing health What s Making Our Children Sick explores the frightening links between our efforts to create higher yield cost efficient foods and an explosion of childhood morbidity but it also offers hope and a path to effecting change The predicament we now face is simple Agroindustrial innovation in a previous era hoped to prevent the ecosystem disaster of DDT predicted in Rachel Carson s seminal book in 1962 Silent Spring However this industrial agriculture movement has created a worse disaster a toxic environment and consequently a toxic food supply Pesticide use is at an all time high despite the fact that biotechnologies aimed to reduce the need for them in the first place Today these chemicals find their way into our livestock and food crop industries and ultimately onto our plates Many of these pesticides are the modern day equivalent of DDT However scant research exists on the chemical soup of poisons that our children consume on a daily basis As our food supply environment reels under the pressures of

industrialization via agrochemicals our kids have become the walking evidence of this failed experiment What s Making Our Children Sick exposes our current predicament and offers insight on the medical responses that are available both to heal our kids and to reverse the compromised health of our food supply
