Gunboats Of World War I New Vanguard:

Gunboats of World War I Angus Konstam, 2015-04-20 Naval action in World War I conjures up images of enormous dreadnoughts slugging it out in vast oceans Yet the truth is that more sailors were killed serving on gunboats and monitors operating far from the naval epicentre of the war than were ever killed at Jutland Gunboat engagements during this war were bloody and hard fought if small in scale Austrian gunboats on the Danube fired the first shots of the war whilst German British and Belgian gunboats fought one of the strangest most intriguing naval campaigns in history in far flung Lake Tanganyika From the Mediterranean to the Black Sea from the Balkans to Mesopotamia gunboats played an influential part in the story of World War I This detailed technical guide to the gunboats of all the major navies of the war means that for the first time the story can be told

Soviet Motor Gunboats of World War II Przemyslaw Budzbon, 2023-11-23 A compelling account of the heavily armed and highly mobile Soviet river gunboats which took on the Germans during World War II Russia's enormous river system has long been its highway and as early as 1908 the Tsar's armies were developing armoured riverboats that brought tank like mobility firepower and survivability to Russian battlefields This book the first history of these vessels in English explains how this concept led to one of the most remarkable naval weapons of World War II the Soviet river tank or Armoured Motor Gun Boat AMGB Highly mobile capable of carrying up to 20 infantrymen directly into action and providing immediate firepower from their tank turrets machine guns or Katyusha rockets their military value was widely recognized They were versatile enough to be used in naval landing operations off the Gulf of Finland the Azov Sea and the Black Sea and their capabilities were prized by local commanders Using meticulously researched new colour profiles rare photos and spectacular artwork this book uncovers the history of river warfare on the Eastern Front and the boats that played such a key part in the fighting

Nile River Gunboats 1882-1918 Angus Konstam, 2016-10-20 For more than 30 years the Nile river gunboat was an indispensable tool of empire policing the great river and acting as floating symbols of British imperial power They participated in every significant colonial campaign in the region from the British invasion of Egypt in 1882 to the Battle of Omdurman in 1898 when Britain finally won control of the Sudan After that the gunboats helped maintain British control over both Egypt and the Sudan and played a key role in safeguarding British interests around the headwaters of the Nile a region hotly contested by several European powers Featuring specially commissioned artwork this comprehensive volume offers a detailed analysis of the Nile river gunboats entire career from policing British colonial interests along the great river to defending Egypt against the Ottoman Turks in World War I

Mississippi River Gunboats of the American Civil War 1861-65 Angus Konstam, 2013-01-20 At the start of the American Civil War neither side had warships on the Mississippi River and in the first few months both sides scrambled to gather a flotilla converting existing riverboats for naval use These ships were transformed into powerful naval weapons despite a lack of resources trained manpower and suitable vessels The creation of a river fleet was a miracle of ingenuity improvisation and logistics

particularly for the South This illustrated history describes their design development and operation throughout the American Civil War Yangtze River Gunboats 1900-49 Angus Konstam,2012-12-20 From the end of the 19th century through the first half of the 20th most Western powers maintained a naval presence in China These gunboats protected traders and missionaries safeguarded national interests and patrolled Chinese rivers in search of pirates It was a wild lawless time in China as ruthless warlords fought numerous small wars to increase their power and influence This book covers the gunboats of all the major nations that stationed naval forces in China including America Britain France Germany Italy Portugal and Japan and looks at such famous incidents as the Japanese bombing of the USS Patay and the dramatic escape of the HMS Amethyst from Communist forces in 1947 which marked the end of the gunboat era **German Commerce Raiders**

1914-18 Ryan K. Noppen,2015-11-20 This is the story of Germany s commerce raiders of World War I the surface ships that were supposed to starve the British Isles of the vast cargoes of vital resources being shipped from the furthest reaches of the Empire To that end pre war German naval strategists allocated a number of cruisers and armed fast ocean liners as well as a complex and globe spanning supply network to support them known as the Etappe network This book drawing on technical illustrations and the author s exhaustive research explains the often overlooked role that the commerce raiders played in World War I Whilst exploring the design and development of the ships it also describes their operational history how they tied up a disproportionate amount of the British fleet on lengthy pursuits and how certain raiders such as the SMS Emden were able to wreak havoc across the oceans *US Navy Gunboats 1885-1945* Brian Lane Herder,2021-04-15 A study of the history of the US Navy s gunboats and their role in building a worldwide American naval presence abroad and in combat from the Yangtze era through to World War II For more than half a century American gunboats were the ships often responsible for policing small crises and provided deterrence and fast response capabilities around the world showing the flag landing armed parties patrolling river and littoral areas and protecting ex pats They were often the United States most visible and constant military presence in far flung foreign lands and were most closely associated with the Far East particularly the Philippines and China Most famous of course was the multinational Yangtze Patrol Many US gunboats were built purchased or reassembled overseas where they usually served out their entire careers never coming within 7 000 miles of the national homeland which they served Numerous gunboats were captured from the Spanish during the 1898 war many being raised from shallow graves refurbished and commissioned into USN service The classic haunt of US gunboats was the Asiatic Station of China and the Philippines Gunboat service overseas was typically exotic and the sailors lives were often exciting and unpredictable The major operational theatres associated with the US gunboats were the pre 1898 cruises and patrols of the earliest steel gunboats the Spanish American War of 1898 both the Philippines and the Caribbean the guerilla wars of the early 20th century Philippines and Latin America the Asiatic Fleet and Yangtze Patrol of the 1890s 1930s and finally World War II which largely entailed operations in China the Philippines the Dutch East Indies Alaska and on convoy

routes It was Japan's sudden 1941-1942 Centrifugal Offensive that effectively spelled the beginning of the end not just of most American gunboats but also the century old world order in Asia that had provided US gunboats with their primary mission

Uncommon Valor on Iwo Jima James H Hallas, 2023-06-14 The epic Battle of Iwo Jima is recounted through the stories of twenty eight American soldiers who showed uncommon valor during one of WWII's most bitter conflicts When the smoke cleared on Iwo Jima in March of 1945 nineteen thousand American Marines had been wounded and seven thousand were dead a casualty rate of nearly thirty nine percent Lasting over a month Iwo was the Marines bloodiest battle of the Second World War and the only Pacific battle in which a US landing force suffered more casualties than it inflicted It was also the most highly decorated single engagement in Marine Corps history This volume captures the bravery of those who fought in that epic battle through the stories of twenty two Marines and five Navy personnel who received the Medal of Honor in recognition of their gallantry under fire

The Timberclads in the Civil War Myron J. Smith, Jr., 2008-10-07 In the most detailed history ever of Union warships on the western waters of the Civil War the author recounts the exploits of the timberclad ships Lexington Tyler and Conestoga Converted to warships from commercial steamboats at the beginning of the conflict the three formed the core of the North's Western Flotilla later the Mississippi Squadron The book focuses on the activities of these wooden warriors while providing context for the greater war including accounts of their famous commanders their roles in both large and small battles ship to ship combat and support for the armies of Gen U S Grant and Gen William T Sherman

British Motor Gun Boat 1939-45 Angus Konstam, 2013-03-20 Motor Gun Boats were the Spitfires of the Seas of the Royal Navy Bristling with small calibre guns and machine guns they served in a variety of roles during the War In the early war period they battled against German E boats in the English Channel then went on the offensive searching the enemy shore for targets of opportunity At other times they ran support for Motor Torpedo Boats and were used to deliver commandos on various raids Naval Warfare expert Angus Konstam tells the story of these small but destructive boats beginning with their design and development and carrying through to their operational use in both the European and Mediterranean theatres of World War II

The Fight for the Yazoo, August 1862-July 1864 Myron J. Smith, Jr., 2014-01-10 Following the loss of the CSS Arkansas in early August 1862 Union and Confederate eyes turned to the Yazoo River which formed the developing northern flank for the South's fortress at Vicksburg Mississippi For much of the next year Federal efforts to capture the citadel focused on possession of that stream Huge battles and mighty expeditions were launched Chickasaw Bayou Yazoo Pass Steele's Bayou from that direction but the city guarded by stout defenses swamps and motivated defenders could not be turned Finally Union troops ran down the Mississippi and came up from the south and the river defenses and the bastion itself were taken from the east From July 1863 to August 1864 sporadic Confederate resistance necessitated continued Federal attention This book recounts the whole story

M103 Heavy Tank 1950-74 Kenneth W Estes, 2013-03-20 The T43 design represented the pinnacle of US Army tank engineering of the late 1940s The

heavy tank proved fairly popular with its crews who above all respected the powerful armament it carried The outbreak of war in Korea brought a rush order in December 1950 which led to a complete production run of 300 vehicles After 1951 the Marine Corps alone retained confidence in the heavy tank program investing its scarce funds in the improvements necessary to bring about its fielding after a hurried production run in midst of the tank crisis of the year 1950 51 The eventual retirement of the M103 in 1972 over 20 years after manufacture and after 14 years of operational service demonstrated the soundness of its engineering It may have been the unwanted ugly duckling of the Army which refrained from naming the M103 alone of all its postwar tanks For the Marine Corps it served the purpose defined for it in 1949 until the automotive and weapons technology of the United States could produce viable alternatives

Imperial Japanese Navy Destroyers

1919-45 (2) Mark Stille,2013-09-20 During the Pacific War the most successful component of the Imperial Japanese Fleet was its destroyer force These ships were larger and in most cases better equipped than their Allied counterparts Armed with a powerful long ranged torpedo these ships proved formidable opponents Initially they were instrumental in an unbroken string of Japanese victories but it was not until the Guadalcanal campaign that these ships fully demonstrated their power In a series of daring night actions they devastated Allied task forces with their deadly torpedoes This volume details the history weapons and tactics of the Japanese destroyers built just before and throughout the war including the famous Kagero and Yugumo classes the experimental destroyer Shimakaze that boasted a top speed of almost 40 knots and 15 torpedo tubes and the Matsu class that represented the Japanese equivalent to an Allied destroyer escort These ships were designed to be built quickly and cheaply but proved to be very tough in combat

Imperial Japanese Navy Destroyers 1919-45 (1) Mark

Stille,2013-03-20 A detailed illustrated look at the earliest seven classes of destroyer fielded by the Imperial Japanese Navy of World War II Several classes of Japanese destroyer were built before the war This includes the famous Fubuki class called Special Type by the Japanese which were when completed in the late 1920 s the most powerful class of destroyers in the world This design forced all other major navies to follow suite and provided the basic design for the next many classes of Imperial Navy destroyers This book also examines the three classes built before the Special Type which were based on a German World War I design as well as two classes built afterward Pacific War expert Mark Stille evaluates the success of these designs from the first battles of the Pacific War up until the death sortie of the superbattleship Yamato and compares them to similar Allied destroyer designs

M3 Infantry Half-Track 1940-73 Steven J. Zaloga,2013-06-20 As armoured warfare tactics matured mechanised infantry became a key ingredient in what is now called combined arms doctrine For the US Army of World War 2 the most important technical aspect of infantry mechanisation was the development of the M3 half track personnel carrier Steven Zaloga explores the early 1930s development of the half track its first deployment in action in the Philippines in 1941 and its varied and vital role in international deployments since World War 2 This authoritative text also examines the operators of half tracks and the troops that they carried

T-72 Main Battle Tank 1974-93 Steven J.

Zaloga,2013-08-20 The Russian T 72 Ural tank was the most widely deployed main battle tank of its generation Used by the armies of the former Warsaw pact and Soviet Union it has also been exported in large numbers to many of the states in the Middle East This book reveals the previously secret history behind the tank Steven J Zaloga examines the conditions under which the T 72 was designed and produced Technical aspects of the weapon are also discussed including its EDZ reactive armour which when it first appeared in December 1984 gave NATO a nasty shock *BMP Infantry Fighting Vehicle 1967-94*

Steven J. Zaloga,2013-06-20 The Russian BMP infantry fighting vehicle IFV was one of the most significant innovations in infantry tactics in the latter half of the 20th century Built in response to the threat of nuclear warfare it was the world s first IFV providing the infantry squad with unprecedented firepower mobility and protection With over 55 000 manufactured since 1966 the BMP is also numerically one of the most important armoured vehicles ever built This richly illustrated book examines the development and design of the BMP detailing its armaments performance in combat and variants *M7 Priest 105mm Howitzer Motor Carriage*

Steven J. Zaloga,2013-07-20 Based upon the ubiquitous Grant Sherman tank the M7 Priest is the iconic Allied self propelled howitzer This compact illustrated guide explores the most widely manufactured vehicle of its type in World War II utilized by the US British Canadian and Free French forces Its combat debut was with Montgomery s Eighth Army at El Alamein and it fought subsequently in every major campaign through Sicily Italy Normandy and the final battles in Germany In addition to covering all variants of the Priest this book also looks at the major derivatives including the British Canadian Sexton and the US M12 155mm GMC **British Battleships 1914-18 (1)** Angus Konstam,2013-05-20

The launch of HMS Dreadnought in 1906 changed the face of naval warfare The first half dozen dreadnoughts were all improvements of the basic Dreadnought design all carrying ten 12 inch guns It was only in 1911 with the launch of HMS Neptune that the layout of this powerful armament was altered as a result of practical experience Two more versions of the Neptune entered service later that same year These nine improved dreadnoughts formed the core of the British High Seas Fleet This book the first of two volumes covering these famous warships uncovers the full story of the British battleships of World War I It examines their revolutionary design the 12 inch guns that provided them with their firepower and the way these guns were fired in anger *Tanks of Hitler's Eastern Allies 1941-45*

Steven J. Zaloga,2013-04-20 The titanic armor battles of the Russian Front are widely known but the role of Germany s eastern allies is less so Romania and Hungary manufactured their own tanks as well as purchasing tanks from Germany older obsolete types such as the PzKpfw 35 t all the way up to the latest and best German vehicles including the Tiger I and Hetzer These tanks played a frequent role in the battles in southern Russia and Ukraine and were especially prominent in the disaster at Stalingrad where the Red Army specifically chose the weaker Romanian and Hungarian salients for their critical envelopment operation Ideal for modellers and armor enthusiasts this is a broad survey of the various and colorful tanks used in these battles As well as the largest of these Axis tank forces the book features coverage of the many smaller and lesser known forces including the Italian

contingent in Russia the Finnish armored force and the small but interesting armored forces of the Russian Vlasov RONA
Croatian Bulgarian and Slovakian armies
