Aging and Human Longevity M.-F. Schulz-Aellen,2012-12-06 The proportion of elderly people continues to increase in the western world nearly a quarter of the population will be over 65 years by the year 2050 Since aging is accompanied by an increase in diseases and by a deterioration in well being finding solutions to these social medical and psychological problems is necessarily a major goal for society Scientists and medical practitioners are therefore faced with the urgent task of increasing basic knowledge of the biological processes that cause aging More resources must be put into this research in order to achieve better understanding of the cellular mechanisms that underlie the differences in life span between species and to answer the

difficult questions of why some individuals age more quickly than others and why some develop liver problems some have heart problems and others brain problems The results of such a wide program of research will provide important information about the causes of many life threatening and or debilitating diseases of old age it will help find ways to prevent some of the ailments that result from aging and it may well lead to discoveries enabling the prolongation of human life **Assessments,**

Aging is a natural phenomenon that is peculiar to all living things However accumulating findings indicate that senescence could be postponed or prevented by certain approaches Substantial evidence has emerged supporting the possibility of radical human health and lifespan extension in particular through pharmacological modulation of aging A number of natural dietary ingredients and synthetic drugs have been assumed to have geroprotective potential In the development of anti aging therapeutics several cell insect and animal models may provide useful starting points prior to human studies This book provides an overview of current research aimed to search for life extending medications and describes pharmacological aspects of anti aging medicine Readers are introduced to the fascinating historical background of geroprotection in the first chapter In depth information on models for investigating geroprotective drugs precedes a section covering anti aging properties of pharmaceutical compounds such as calorie restriction mimetics autophagy inducers senolytics and mitochondrial antioxidants Finally strategies to translate discoveries from aging research into drugs and healthcare policy perspectives on anti ageing medicine are provided to give a complete picture of the field A timely and carefully edited collection of chapters by leading researchers in the field this book will be a fascinating and useful resource for pharmacologists gerontologists and any scientifically interested person wishing to know more about the current status of research into anti aging remedies challenges and opportunities *The Death of Death* José Cordeiro,David

Wood,2023-06-29 Is death inevitable Until now the history of mankind has been marked by this fatal fact Religions borders

and progress are born from an ancient fear of death comfort from this fear man often found only in religious paradigms But according to Jos Luis Cordeiro and David Wood the incontrovertible fact of death is no longer an absolute certainty science and technology are preparing to tear down the final frontier that of immortality This accessible book provides insight into recent exponential advances in artificial intelligence tissue regeneration stem cell treatment organ printing cryopreservation and genetic therapies that for the first time in human history offer a realistic chance to solve the problem of the aging of the human body In this book Cordeiro and Wood not only present all the major developments initiatives and ideas for eternal life they also show why there are a number of good arguments for seeing death for what it is the last undefeated disease Enter any drugstore or bookstore and we confronted with a mountain of nonsense concerning the aging process Society seems obsessed with aging That is why The Death of Death is such a refreshing delight able to cut through the hype and reveal a balanced authoritative and lucid discussion of this controversial topic It summarizes the astonishing breakthroughs made recently in revealing how science may one day conquer the aging process Michio Kaku theoretical physicist and author of The God Equation The Quest for a Theory of Everything We are entering a Fantastic Voyage into life extension crossing different bridges that will take us to indefinite life spans The Death of Death explains clearly how we might soon reach longevity escape velocity and live long enough to live forever Ray Kurzweil co author of Fantastic Voyage Live Long Enough to Live Forever and co founder of Singularity University The Death of Death is a truly revolutionary book This is a visionary book that confronts us with the terrible reality of aging and its authors are friends and connoisseurs of the subject I believe that the authoritative and exhaustive description of this crusade that Jos and David make in this excellent book will accelerate this process Forward Aubrey de Grey founder of LEV Longevity Escape Velocity Foundation and co author of Ending Aging
