Modeling and Measuring Competencies in Higher Education Sigrid Blömeke, Olga Zlatkin-Troitschanskaia, Christiane Kuhn, Judith Fege, 2013-04-20 Measuring competencies acquired over the course of higher education is an area of research that largely has been neglected This deficit can be attributed to the complexity of academic competencies since the variety of institutions programs occupational fields and job requirements render it difficult to define and even harder to measure outcomes Thus assessing the preconditions for and effects of competency development is a challenge methodologically In this book a comprehensive review of the international state of research on modeling and measuring competencies in higher education across several academic disciplines is presented along with an evaluation of the field's strengths and weaknesses Renowned experts share insight into the most important recent research projects and point out controversies and challenges Competencies are regarded as context specific dispositions acquired and required to cope successfully with domain specific situations and tasks However the range of these dispositions is controversial Should only cognitive facets be included or is it important to consider attitudes as well Insufficient response rates and panel attrition are further challenges as are the limitations of paper and pencil approaches to the complex measurement of higher education outcomes Thus this book may serve as a platform for the exchange of research experiences and perspectives and hopefully will instigate improvements in research into higher education

Sahbi Hidri, 2018-01-12 This book presents an overview of revisiting the assessment of language abilities. It also showcases how the measurement of such constructs can result in negative or positive washback and how outcomes might be conducive to repercussions that decide on the future of many stakeholders. The 23 chapters were selected among tens of chapters received from different contexts that addressed the issue of revisiting the assessment of language abilities such as Tunisia, Ukraine, Algeria, Russia, KSA, Sudan, Egypt, Canada, Kurdistan, UK, USA, Iran, Turkey, etc. These contexts have highlighted the necessity to revisit the different constructs which should be assessed with a clear and straightforward foundation on students' learning objectives and their actual language ability. To do so, most of the chapters present hands-on use of relevant statistical tests that might serve in revisiting the construct definition both theoretically and operationally. Perhaps the sole and intricate question that the authors of these contributions ask is what it means to revisit the assessment of the construct of individualized language ability and how. In addition, the book accentuates the momentousness and significance of reflecting on test fairness and validation as the mainspring and backbone for democratization of assessment. This book appeals to a broad readership such as English Language Teaching (ELT) practitioners, language teachers, students, testing organizations, policy makers, test designers, writers of test specifications, testing experts, researchers, program evaluators, especially in the Middle East and North Africa (MENA) as well as other international contexts.

Classroom Assessment Techniques

Thomas A. Angelo, Todd D. Zakrajsek, 2024-06-11 Classroom Assessment Techniques: Formative Feedback Tools for College and University Teachers. A practical research-based handbook for using assessment to improve learning. This completely revised and updated third edition of Classroom Assessment Techniques provides a research-based, engaging guide to assessing student learning where it matters most: at course and classroom levels. Informed by the latest international educational research and 30 years of classroom assessment practice, this practical handbook is designed for postsecondary teachers from all disciplines, faculty and academic developers, and assessment professionals. It offers field-tested guidance, tools, and advice for planning, designing, and implementing formative assessment in face-to-face, hybrid, and fully online classrooms; analyzing resulting data; and using that data to improve student learning. Classroom Assessment Techniques, 3rd Edition is a practical, clearly written handbook for busy professionals. It contains a wealth of useful resources, including 50 plus CATs, classroom assessment techniques, flexible formative assessment tools easily adaptable for use in a wide range of disciplines and contexts. Case studies and examples illustrate how college and university faculty have applied these techniques to improve learning. A new Course Learning Outcomes Inventory (CLOI), a self-assessment tool for identifying and prioritizing the most relevant learning outcomes to assess. The original Teaching Goals Inventory (TGI), which offers an alternate teaching-focused approach to setting assessment priorities. Multiple ways to quickly find the most appropriate tool. CATs are indexed by discipline. Examples of Bloom's Taxonomy, Biggs and Tang's SOLO Taxonomy, the CLOI, and the TGI. Brief chapters explaining what formative assessment is, how it can improve student learning, how to gather and provide formative

feedback how to link classroom assessment with broader other assessment efforts and how to collaborate with students and colleagues Each CAT provides a brief self contained recipe including a description steps for implementation dos and don ts and relevant references
