GRID AND CLUSTER COMPUTING C. S. R. PRABHU, 2008-02-14 Grid Computing and Cluster Computing are advanced topics and latest trends in computer science that find a place in the computer science and information technology curricula of many engineering institutes and universities today Divided into two parts Part I Grid Computing and Part II Cluster Computing this compact and concise text strives to make the concepts of grid computing and cluster computing comprehensible to the students through its fine presentation and accessible style Part I of the book enables the student not only to understand the concepts involved in grid computing but also to build their own grids for specific applications Similarly as today supercomputers are being built using cluster computing architectures Part II provides an insight into the basic principles involved in cluster computing and equips the readers with the knowledge to build their own clusters in house Diagrams are used to illustrate the concepts discussed and to enable the reader to actually construct a grid or a cluster himself The book is intended as a text for undergraduate and postgraduate students of computer science and engineering information technology B Tech M Tech Computer Science and Engineering IT and post graduate students of computer science information technology M Sc Computer Science and M Sc IT Besides practising engineers and computer science professionals should find the text very useful

CLOUD COMPUTING RAO, M.N., 2015-05-21 Cloud Computing has grown popular as a new prototype for providing services over the Internet This introductory textbook on Cloud Computing is suitable for undergraduate students of computer science engineering and for postgraduate students of computer science and computer applications It teaches both the basic concepts and cloud technologies by adopting a straightforward approach of presenting theoretical concepts and cloud models Several Cloud providers of distinct types are discussed here with their advantages and disadvantages Different cloud services are also covered in this book The book advances on the cloud architecture and cloud examples that are latest in market Salient Features Clear and concise explanations Discussion on cloud models with diagrams In depth analysis of various cloud architectures Numerous case studies Several questions from previous question papers

Advances in Grid and Pervasive Computing Song Wu, Laurence Tianruo Yang, Tony Li Xu, 2008-05-13 Welcome to the proceedings of the 2008 International Conference on Grid and Pervasive Computing GPC 2008 which was held in Kunming Yunnan China May 25 28 2008 Grid computing presents a new trend in distributed computing for coordinating large scale heterogeneous resource sharing and problem solving in dynamic multi institutional virtual organizations Grid computing not only can be used for distributed supercomputing massive data

processing but can also be a common platform and way for utility and service computing. It covers mainframes, supercomputers as well as more powerful personal computers and even small and smart devices ranging from personal digital assistants to unseen chips in our cars, appliances and telephones. Projecting this trend into the future, we envision an explosion of interconnected high performance computers and smart devices that can make our research and daily lives easier and more productive.

Grid and Pervasive Computing GPC is an annual international conference on the emerging areas of merging grid computing and pervasive computing. GPC provides a high profile leading edge forum for researchers and engineers alike to present their latest research in the field of grid computing and pervasive computing.

Cloud, Grid and High Performance Computing: Emerging Applications Udoh, Emmanuel, 2011-06-30. This book offers new and established perspectives on architectures, services and the resulting impact of emerging computing technologies including investigation of practical and theoretical issues in the related fields of grid, cloud and high performance computing. Provided by publisher.

Cloud computing is the current most trendy and social technology that has been launched on the network world which can also be called as a reincarnation or evolution of Grid computing so the Clouds are considered as a new generation of Grid computing. These Clouds consist of data centres which are owned by individual institute organisations or companies. The homogeneity within each data centre in the infrastructure is the main feature for the cloud computing compared to grid computing. Cloud Computing has become another most used word on internet after Web 2.0. There are many definitions for Cloud computing and there seems to be no consensus on what a Cloud is. Cloud Computing is not a completely new concept; it has intricate connection to the relatively new but thirteen year established Grid Computing paradigm and other relevant technologies such as utility computing, cluster computing and distributed systems when we go through the structure and working of a Cloud.

Grid, Cloud, and Cluster Computing Hamid R. Arabnia, Leonidas Deligiannidis, Fernando G. Tinetti, 2019-03-21. This book contains the proceedings of the 2018 International Conference on Grid, Cloud and Cluster Computing GCC 18. GCC is an international conference that serves researchers, scholars, professionals, students and academicians who are looking to both foster working relationships and gain access to the latest research results.

Grid Computing - GRID 2000 Rajkumar Buyya, Marc Baker, 2003-07-31. Welcome to GRID 2000 the first annual IEEE ACM international workshop on grid computing sponsored by the IEEE Computer Society's Task Force

on Cluster Computing TFCC and the Association for Computing Machinery ACM The workshop has received generous sponsorship from the European Grid Forum eGrid the EuroTools SIG on Metacomputing Microsoft Research USA Sun Microsystems USA and the Centre for Development of Advanced Computing India It is a sign of the current high levels of interest and activity in Grid computing that we have had contributions to the workshop from researchers and developers in Australia Austria Canada France Germany Greece India Italy Japan Korea The Netherlands Spain Switzerland UK and USA It is our pleasure and honor to present the first annual international Grid computing meeting program and the proceedings The Grid A New Network Computing Infrastructure The growing popularity of the Internet along with the availability of powerful computers and high speed networks as low cost commodity components are helping to change the way we do computing These new technologies are enabling the coupling of a wide variety of geographically distributed resources such as parallel supercomputers storage systems data sources and special devices that can then be used as a unified resource and thus form what is popularly known as the Grids
