## **Growing Readers Units Of Study In The Primary Classroom:**

**Growing Readers** Kathy Collins, 2023-10-10 Primary grade teachers face an important challenge teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini lessons and reading conferences. There are also four Getting Ready sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include print and comprehension strategies, reading in genres such as poetry and nonfiction, connecting in school reading and out of school reading, developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read and we want them to love to read. To do this, we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens.

**Growing Readers** Kathy Collins, 2023      **Catching Readers Before They Fall** Pat Johnson, Katie Keier, 2023-10-10 Every teacher of reading plays a vital role in helping to catch those readers for whom learning to read does not come easily. Through examples from both adults and children, the authors explain and describe the complex, integrated network of strategies that go on in the minds of proficient readers—strategies that struggling readers have to learn in order to construct their own reading processes. This book is essential reading for all who work with struggling readers in any context and contains a wealth of resources, including a thorough explanation of all the sources of information readers use to solve words, examples and scenarios of teacher-student interactions, prompts to use with struggling readers, lessons on modeling, and assessment guidelines.

**Reading for Real** Kathy Collins, 2008 Just as adults join clubs to share and talk about common interests, reading clubs allow kids to immerse themselves in topics and ideas they care about, whether it's turtles, fairy tales, a beloved author, a favorite new series, or the desire to get better at reading aloud to a baby brother or sister. While they are reading and talking about their interests and passions, students in reading clubs are also orchestrating all of the reading skills and strategies they've learned and applying them in real-life ways. While Kathy presents ideas for implementing reading clubs during reading workshop in a balanced literacy framework, the information she provides will be helpful for any teacher who wants to foster the joy of reading by offering students support and opportunities to read for authentic purposes and to have conversations about topics that

interest and engage them After all we don't just want kids to learn to read we want them to love to read **BOOK JACKET**

**Center** Dorothy Barnhouse, 2023-10-10 Every teacher wants and expects his or her students to be reading increasingly complex texts yet sometimes the gap between our expectations and our students abilities seems wide and deep It s tempting to look at that gap and step in to fill it for them but then we d be doing most of the heavy lifting the understanding analysis and interpretation that our students should be learning for themselves So how can teachers reverse this trend and ensure that our students are fully entering absorbing and experiencing texts How can we make sure they re making complex meaning independently and proficiently as the Common Core State Standards require **Readers Front** and why we need to put students at the front and center of our teaching **Raising Literacy Achievement in High-Poverty Schools** Eithne
