Monthly Catalog of United States Government Publications United States. Superintendent of Documents, 1991
Monthly Catalogue, United States Public Documents, 1992 Monthly Catalog of United States Government Publications, 1991 A Review of the Forest Service Remote Automated Weather Station (RAWS) Network John Zachariassen, 2003 The RAWS network and RAWS data use systems are closely reviewed and summarized in this report RAWS is an active program created by the many land management agencies that share a common need for accurate and timely weather data from remote locations for vital operational and program decisions specific to wildland and prescribed fires A RAWS measures basic observable weather parameters such as temperature relative humidity wind speed wind direction and precipitation as well as fuel stick temperature Data from almost 1 900 stations deployed across the conterminous United States Alaska and Hawaii are now routinely used to calculate and forecast daily fire danger indices components and adjective ratings Fire business applications include the National Fire Danger Rating System NFDRS fire behavior and fire use Findings point to the fact that although the RAWS program works and provides needed weather data in support of fire operations there are inefficiencies and significant problem areas that require leadership attention at the National level General Technical Report RMRS, 1998 **Wildland Recreation** William E. Hammitt, David N. Cole, Christopher A. Monz, 2015-02-03 The authoritative guide to understanding and managing the ecological impacts of recreational activities in wildlands This third edition provides an updated and thorough examination of the ecological impacts of recreational use on wildlands and the best management practices to employ in places where recreation and preservation of natural conditions are both important and often conflicting objectives Covering the latest research this edition provides detailed information about the environmental changes that result from recreational use It describes spatial patterns of impact and trends over time then explores the factors that determine magnitude of impact including amount of use type and behavior of use and environmental durability Numerous examples drawn from parks and recreation areas around the world give readers insight into why certain areas are more heavily damaged than others and demonstrate the techniques available to mitigate damage The book incorporates both the first hand experience of the authors and an exhaustive review of the world s literature on the subject Boxes provide quick access to important material and further resources are referenced in an extensive bibliography Essential reading for all park and protected area management professionals this book is also a useful textbook for upper division undergraduate and graduate students on recreation ecology and recreation management courses

Restoring Western Ranges and Wildlands Stephen B. Monsen, 2004 *Restoring western ranges and wildlands*, 2004 **Nuclear Science Abstracts**, 1975-07 Trail Planning, Construction, and Maintenance Jean Albrecht, 1996
Federal Register, 2006-03 **Handbook of Wood Chemistry and Wood Composites** Roger M. Rowell, 2005-02-18
The degradable nature of high performance wood based materials is an attractive advantage when considering

environmental factors such as sustainability recycling and energy resource conservation The Handbook of Wood Chemistry and Wood Composites provides an excellent guide to the latest concepts and technologies in wood chemistry and bio based composites The book analyzes the chemical composition and physical properties of wood cellulose and its response to natural processes of degradation It describes safe and effective chemical modifications to strengthen wood against biological chemical and mechanical degradation without using toxic leachable or corrosive chemicals Expert researchers provide insightful analyses of the types of chemical modifications applied to polymer cell walls in wood emphasizing the mechanisms of reaction involved and resulting changes in performance properties These include modifications that increase water repellency fire retardancy and resistance to ultraviolet light heat moisture mold and other biological organisms The text also explores modifications that increase mechanical strength such as lumen fill monomer polymer penetration and plasticization The Handbook of Wood Chemistry and Wood Composites concludes with the latest applications such as adhesives geotextiles and sorbents and future trends in the use of wood based composites in terms of sustainable agriculture biodegradability and recycling and economics Incorporating over 30 years of teaching experience the esteemed editor of this handbook is well attuned to educational demands as well as industry standards and research trends
