choline containing phospholipids including the sphingolipids the non choline containing phospholipids and finally the so called minor phospholipids The latter compounds which act as agonists or lipid chemical mediators on cells form a vanguard of a new category of biologically active substances and have set the study of cellular phospholipids on a new and exiting course Most importantly this book provides a basis for further inquiry on these complicated molecules showing that although the compounds are unique with care and understanding they can be studied with ease Fusion Energy Update ,1978
