time the fossil fuel industry has doubled down economically and politically on business as usual We face an unprecedented situation a radical situation As an individual of conscience how will you respond In 2010 journalist Wen Stephenson woke up to the true scale and urgency of the catastrophe bearing down on humanity starting with the poorest and most vulnerable everywhere and confronted what he calls the spiritual crisis at the heart of the climate crisis Inspired by others who refused to retreat into various forms of denial and fatalism he walked away from his career in mainstream media and became an activist joining those working to build a transformative movement for climate justice in America In *What We're Fighting for Now Is Each Other* Stephenson tells his own story and offers an up close on the ground look at some of the remarkable and courageous people those he calls new American radicals who have laid everything on the line to build and inspire this fast growing movement old school environmentalists and young climate justice organizers frontline community leaders and Texas tar sands blockaders Quakers and college students evangelicals and Occupiers Most important Stephenson pushes beyond easy labels to understand who these people really are what drives them and what they're ultimately fighting for He argues that the movement is less like environmentalism as we know it and more like the great human rights and social justice struggles of the nineteenth and twentieth centuries from abolitionism to civil rights It's a movement for human solidarity This is a fiercely urgent and profoundly spiritual journey into the climate justice movement at a critical moment in search of what climate justice at this late hour might yet mean

Depression Susan J. Noonan, 2016-06 Following on the success of *Managing Your Depression* Susan Noonan s new book is for
 family members and friends of people with depression or bipolar disorder A certified peer specialist at McLean Hospital a
 comprehensive psychiatric hospital affiliated with Harvard University Susan draws on her experiences providing support and
 education for those living with or caring for a person who has a mood disorder A family member who has a mood disorder
 affects the entire family Further family members and close friends are often the first to recognize the subtle changes and
 symptoms of depression and they are also the people who provide daily support to their loved ones often at great personal
 price Caring for someone with a mood disorder differs from caring for someone with a physical medical disorder in ways that
 complicate the caregiving role A concise and practical guide to the daily management of depression and bipolar depression
 written for the caregiver the book explains how to reinforce lessons the patient has been taught in therapy how to role model
 resilience skills and how caregivers can and must care for themselves It describes effective communication strategies and
 advises how to find appropriate professional help Its many tables and worksheets convey much needed information in an
 accessible way References Resources and a Glossary complete the package Overall the book helps readers navigate the
 depression or bipolar disorder of someone close to them providing readers with words to say and things to do as they try to
 help someone change the course of a sometimes confounding and often disabling illness *Psychodynamic*
Psychopharmacology David Mintz, M.D., 2022-02-10 The troubling increase in treatment resistance in psychiatry has many
 culprits the rise of biomedical psychiatry and corresponding sidelining of psychodynamic and psychosocial factors the
 increased emphasis on treating the symptoms rather than the person and a greater focus on the electronic medical record
 rather than the patient all of which point to a breakdown in the person centered prescriber patient relationship
 Psychodynamic Psychopharmacology illuminates a new path forward It examines the psychological and interpersonal
 mechanisms of pharmacological treatment resistance integrating research on evidence based prescribing processes with
 psychodynamic insights and skills to enhance treatment outcomes for patients who are difficult to treat The first part of the
 book explores the evidence base that guides how rather than simply what to prescribe It describes precisely what

psychodynamic psychopharmacology is and why its emphasis on combining the often neglected psychosocial aspects of medication with biomedical considerations provides a more optimized approach to addressing treatment resistance Part II delves into the psychodynamics that contribute to pharmacological treatment resistance both when patients ambivalence about their illness the medication itself or their prescriber manifests in nonadherence and when medications support a negative identity or are used as replacements for healthy capacities Readers will gain basic skills for addressing the psychological and interpersonal dynamics that underpin both scenarios and will be better positioned to ameliorate interferences with the healthy use of medications The final section of the book offers detailed technical recommendations for addressing pharmacological treatment resistance It tackles issues that include countertransference driven irrational prescribing primitive dynamics such as splitting and projective identification and the overlap between psychopharmacological treatment resistance and the dynamics of treatment nonadherence and nonresponse in integrated and collaborative medical care settings By putting the individual patient back at the center of the therapeutic equation psychodynamic psychopharmacology as outlined in this book offers a model that moves beyond compliance and emphasizes instead the alliance between patient and prescriber In doing so it empowers patients to become more active contributors in their own recovery
