Outstanding 50 Years of “Università Politecnica delle Marche” Sauro Longhi, Andrea Monteriù, Alessandro Freddi, Lucia Aquilanti, Maria Gabriella Ceravolo, Oliana Carnevali, Mario Giordano, Gianluca Moroncini, 2020-01-02 The book describes the significant multidisciplinary research findings at the Università Politecnica delle Marche and the expected future advances. It addresses some of the most dramatic challenges posed by today's fast growing global society and the changes it has caused. It also discusses solutions to improve the wellbeing of human beings. The book covers the main research achievements in the various disciplines of the life sciences and includes chapters that highlight mechanisms relevant to all aspects of human diseases: the molecular, cellular and functional basis of therapy and its translation into the management of people's health needs. It also describes research on traditional and innovative foods to enhance quality, safety and functionality and to develop bioactive nutraceutical compounds. Further chapters address conservation and management of various environments from the forests to the oceans, describing the studies on countermeasures against climate changes and terrestrial/aquatic pollutants and on terrestrial/marine biodiversity, ecosystems and landscapes, erosion of genetic biodiversity, innovative aquaculture, feed, sustainable crop production and management of forests. Lastly, the book reports the findings of research work on different classes of biomolecules and on the molecular basis of antibiotic resistances and their diffusion. *Dentist?*

End Of A Problem! Corrado Tavelli, 2023-08-30 How nice would it be to know that you can count on a dentist serious and professional, capable of ensuring that your mouth gets all the care it needs at all times? One thing is certain: There are so many people who decide not to get treatment because of two fears: above all, the fear of the dentist and the economic fear. The result of all this? That discomfort, initially negligible, becomes more and more intense day after day until it becomes unbearable. The risk in such cases is to put a strain on the health of the mouth, consequently going to impact the quality of one's life as well. Yet to everything there is a solution. In fact, if I told you that in just a few simple moves it is possible to reduce the emotional and economic impact of dental care to almost zero while ensuring that one's teeth have the wellbeing they deserve, would you believe it? In this book, the result of more than 30 years of experience in the dental field, I will show you the exact system to save money at the dentist without compromising the quality of dental care. **INSIDE THIS BOOK YOU WILL DISCOVER:** How to choose your trusted dentist without making mistakes. The importance of always keeping your teeth clean. How to solve the problem of tooth loss in one session. The secret to starting to chew again without the need for dentures. How to capitalize on the investment in your mouth. The importance of periodically observing one's teeth using a dental mirror. The most effective way to live without the fear of the dentist. How the loss of one or more teeth also negatively impacts all the others. How to save money at the dentist without compromising the quality of dental care and much more.
