Immigration And Entrepreneurship Culture Capital And Ethnic Networks:

Immigration and Entrepreneurship Parminder Bhachu, 2017-09-04 Many nations invite foreigners to work within their borders but few welcome them Those countries that do receive a torrent of immigrants create pressures that analysts expect to intensify as population growth and social unrest mount in the less developed countries of the world Immigration and Entrepreneurship now in paperback offers a comparative analysis of worldwide immigration issues while focusing more specifically on the emerging influence of entrepreneurship as a potent factor in the economic and social integration of immigrants In linking the common immigrant and settler experiences with the upsurge in self employment the contributors to this volume use California as their base of comparison The state has both a huge and varied immigrant population and an entrepreneurial economy that has facilitated the formation of immigrant owned firms The Los Angeles riots of the nineties indicated the volatility of the mix Aided by ethnic and familial networks such firms have served as a route of economic advancement Immigration and Entrepreneurship offers a comparative perspective unique in the literature of immigration by broaching the topic from both global and local perspectives Whereas most studies examine the experience of a single group or groups in a particular destination economy this volume emphasizes variations in the way different nations receive immigrants as causes of differences in immigrant behavior Among the innovative themes discussed by a range of international scholars are the entrepreneurial efforts and tensions in the garment industry in Los Angeles Paris and Berlin Koreans enterprise and identities in Los Angeles and Japan and U S immigration policies The result is a genuinely global methodology

Handbook of Research on Ethnic Minority Entrepreneurship Leo Paul Dana, 2007 Professor Dana and his colleagues have carefully and successfully put together a collection of chapters on ethnic minority entrepreneurship from all parts of the world The book comprises eight parts and 49 chapters Undoubtedly given the massive size and content of a 835 page book it is fair to ask is it value for money The answer is unequivocally yes A further comment on the content of the book should probably reassure potential readers and buyers of the book This collection is undoubtedly rich creative and varied in many respects Therefore it will be of great benefit to researchers and scholars alike I will strongly recommend this book to researchers students teachers and policy makers Aminu Mamman International Journal of Entrepreneurial Behaviour and Research The volume presents an impressive panorama of studies on ethnic entrepreneurs ranging from Dalits in India to Roma entrepreneurs in Hungary B P Corrie Choice From a focus on middle man minorities in the 1950s the study of minority ethnic entrepreneurship has evolved into a vast undertaking A major ingredient in this expansion is the massive population movements of the past thirty years that have created ethnic minority communities in almost all advanced economies From New York to San Francisco from Birmingham to Hamburg from the Chinese in Canada to the Turks in Finland to the Ghanians in South Africa to the Lebanese in New Zealand more than twenty chapters in this volume treat small scale ethnic entrepreneurship and the cultural and institutional resources which support it At the other end of the

spectrum the ethnic Chinese have created ever larger multi divisional enterprises in the host societies of Southeast Asia At the mid point of the spectrum analyzed in an elegant paper by Ivan Light is the recently identified transmigrant entrepreneur acculturated in two societies but assimilated in neither whose special endowments have provided the lynchpin for for much of the international trade expansion in the global economy over the past decade And Dana and Morris provide us with much more Afro American entrepreneurship caste and class the theory of clubs women ethnic entrepreneurs minority ethnicity and IPOs In the quality of its contributions and in the reach of its coverage this Handbook attains a very high standard Peter Kilby Wesleyan University US The new Handbook of Research on Ethnic Minority Entrepreneurship edited by L o Paul Dana constitutes a major contribution to the literature on ethnic enterprise Unlike previous work which tended to focus on one country or one region of the world this book is global in scope You will find chapters on America Europe and Asia as well as integrative essays that review important principles and concepts from the literature on ethnic entrepreneurship I particularly appreciate the historical and evolutionary framework within which the contributions are situated This book belongs on the shelf of everyone who has an interest in immigration and entrepreneurship or ethnic entrepreneurship more generally Howard Aldrich University of North Carolina US This exhaustive interdisciplinary Handbook explores the phenomena of immigration and ethnic minority entrepreneurship in light of marked changes since the mid twentieth century and the advent of easier more affordable travel and more open and integrated national economies The international contributors key experts in their respective fields illustrate that myriad ethnic minorities exist across the globe and that their entrepreneurship can and does significantly influence national economies The contributors go on to promote our understanding of which factors make for successful entrepreneurship and perhaps more importantly how negative political consequences that members of successful entrepreneurial ethnic minorities might face can be minimized This extensive collection of current research on entrepr

Immigrant Entrepreneurship Beata Glinka,Adam Jelonek,2020-06-07 Immigration is currently one of the most vivid challenges the European Union faces Ways of introducing new migrants to society and economy pose significant challenges thus some guidelines for the policy design towards migrations are in need This book points out patterns of approaches leading to entrepreneurial activities implemented by the immigrants from the Far East China Vietnam South Korea India and Philippines At these stage comparisons with other countries are both possible and necessary as many countries all over the world face challenges connected with defining migration policies From the studies included in the book readers will gain first hand knowledge about immigrant entrepreneurship in Poland against the Western European or USA background of similar processes described by researchers in other countries The areas covered in the studies include the main reasons for starting new ventures and the sources of opportunities processes of defining customers and factors influencing the choice between an ethnic and local business immigrants approaches to building market position defining success and development as well as the issues of cultural institutional legal and economic differences The studies show that

significant differences in entrepreneurial activities appear between the first and second generations of immigrants. They also depict how entrepreneurial activities help in assimilation processes as well as in building ties between the immigrants and host societies. Moreover, the study will deepen the understanding of entrepreneurial activities of immigrants in countries that are traditionally considered to be less attractive targets for migration. Thus, the processes of migration will be not only better understood and described but will also allow to provide some guidelines both for policymakers and future researchers.

Class, Ethnicity, Gender and Latino Entrepreneurship María Eugenia Verdaguer, 2009-02. Verdaguer examines first generation Latino entrepreneurs revealing not only that Latinos' strategies for access to business ownership and development are cut across class, ethnic and gender lines but also that immigrants' options and practices remain shaped by patriarchal gender relations within the immigrant family community and economy. *Handbook of Entrepreneurial Dynamics* William B. Gartner, Kelly G. Shaver, Nancy M. Carter, Paul D. Reynolds, 2004-06-21. This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics (PSED), the most comprehensive scientifically representative study to date of nascent entrepreneurs. The book is unique because the study identified individuals in the process of creating new businesses to understand how at its very source people move from considering the option of starting a new business to its actual founding. This has never been done before in the history of entrepreneurship research. I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where entrepreneurs come from and how they move from their initial idea to new venture founding. Claudia Bird Schoonhoven, University of California, Irvine. This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation. Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics (PSED), an unprecedented research program involving more than a hundred researchers from 10 countries. This Handbook is must reading for anyone interested in entrepreneurship research. Andrew H. Van de Ven, Carlson School of Management, University of Minnesota. Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well-being, much of it concentrated in new economic sectors such as information technology. Yet even though entrepreneurship has been shown to provide many benefits, it is surprising that there has not been a systematic study of the entrepreneurial process. The Handbook of Entrepreneurial Dynamics: The Process of Business Creation fills this gap by offering theories, ideas and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses. The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics (PSED). The PSED is a research program that was initiated to provide systematic, reliable and generalizable data on important features of the new business creation process. The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses, the activities and characteristics that comprise the nature of the business start-up process, and the proportion and characteristics of those business start-up efforts that actually become new businesses. The handbook also

describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation

Challenging Entrepreneurship Research Hans Landstrom, Annaleena Parhankangas, Alain Fayolle, Philippe Riot, 2016-06-10 The growth of entrepreneurship research has been accompanied by an increased convergence and institutionalization of the field In many ways this is of course positive but it also represents how the field has become mainstream with the concomitant risk that individual scholars become embedded in a culture and incentive system that emphasizes and rewards incremental research questions while reducing the incentives for scholars to conduct challenging research This book challenges this status quo from accepted theories methodologies and paradigmatic assumptions to the relevance or lack of for contemporary practice and the impact of key journals on scholars directions in entrepreneurship research An invited selection of the younger generation of scholars within the field of entrepreneurship research adopt a critical and constructive posture on what has been achieved in entrepreneurship research the main assumptions which underly it but also open up new paths for creative entrepreneurship research in the future This is a must read for all scholars educators and advanced students in entrepreneurship research

The Enigma of Ethnicity Wilbur Zelinsky, 2001-04 In The Enigma of Ethnicity Wilbur Zelinsky draws upon more than half a century of exploring the cultural and social geography of an ever changing North America to become both biographer and critic of the recent concept of ethnicity In this ambitious and encyclopedic work he examines ethnicity's definition evolution significance implications and entanglements with other phenomena as well as the mysteries of ethnic identity and performance Zelinsky begins by examining the ways in which ethnic groups and ethnicity have been defined his own definitions then become the basis for the rest of his study He next focuses on the concepts of heterolocalism the possibility that an ethnic community can exist without being physically merged and personal identity the relatively recent idea that one can concoct one's own identity In his final chapter which is also his most provocative he concentrates on the multifaceted phenomenon of multiculturalism and its relationship to ethnicity Throughout he includes a close look at African Americans Hispanics and Jews as well as such less studied groups as suburbanized Japanese Cubans in Washington Koreans Lithuanian immigrants in Chicago Estonians in

New Jersey Danish Americans in Seattle and Finns Reasonable nonpolemical and straightforward Zelinsky's text is invaluable for readers wanting an in depth overview of the literature on ethnicity in the United States as well as a well thought out understanding of the meanings and dynamics of ethnic groups ethnicity and multiculturalism Handbook on Migration and Security Philippe Bourbeau, 2017-04-28 This Handbook provides a state of the art analysis of the critically important links between migration and security in a globalising world and presents original contributions suggesting innovative and emerging frontiers in the study of the securitization of migration Experts from different fields reflect on their respective conceptualisations of the migration security nexus and consider how an interdisciplinary and multifaceted dialogue can stimulate and enrich our understanding of the securitisation of migration in the contemporary world Entrepreneurship and Religion Victoria Hyonchu Kwon, 2014-03-05 Focusing on settlement patterns among Houston's Korean immigrants this study examines in ethnographic detail the mutually beneficial relationship between the Korean business community and church groups It explores historical background and social and demographic characteristics of the group to provide a broader context in explaining their entrepreneurial and religious behaviors The study shows that economic and social changes during and after the oil boom in Houston had a direct effect on the emergence of the Korean business community Churches with a highly developed structural linkage through cell group ministry also facilitate business contacts among parishioners Embracing a majority of Korean community members as parishioners the churches perform social functions that are indispensable to the Korean immigrants *The Role of the State in Migration Control* Aoife McMahon, 2016-11-21 This research questions the seemingly ossified premise that states have an absolute discretion to control international migration Applying Max Weber's theories of legitimacy it determines that while states have certain traditionally legitimate functions migration control as distinct from the determination of citizenship is not one such function Measures of migration control must thus be justified on a rational legal basis that is on a minimal evidential basis Acknowledging the many obstacles states face in carrying out this legitimising exercise it is suggested that a supranational approach at the regional level is the most sustainable long term model with an ultimate aim of achieving inter regional cooperation on migration management on the basis of equality between regions **Diaspora Governance and Transnational Entrepreneurship** Ricard Zapata-Barrero, Shahamak Rezaei, 2021-09-13 A burgeoning literature is currently exploring the rise of a new migratory profile migrants engaged in Transnational Entrepreneurship referring to immigrants who are engaged in cross border business involving their country of origin and destination both perceived as lands of opportunity Until now little has been done in linking business studies and migration studies in this particular field of research on diaspora politics and Transnational Entrepreneurship besides the focus has mostly been on identifying the key independent variables patterns and developing hypotheses on the favourable and non favourable factors promoting migrant business involvement in the country of residence alone This book collects the main findings of the European Horizon 2020 RISE Project DiasporaLink a

multidisciplinary project that has gathered the most prominent scholars in their respective field Grounded in a variety of empirical evidences of the impact of Transnational Entrepreneurship the book aims to explore the new global social pattern of entrepreneurs doing business transnationally The chapters in this book were first published as a special issue of the Journal of Ethnic and Migration Studies **Gendered Capital** Sally Ann Davies-Netzey,2013-12-16 This book makes an important contribution by comparing the experiences of white and Latina women who own and operate businesses in the U S economy While accounting for the significance of gender ethnicity and social class Davies Netzey explores the various pathways that women take to becoming entrepreneurs and the economic social and cultural capital they use along the way

Native and Immigrant Entrepreneurship Simone Guercini,Gabi Dei Ottati,Loretta Baldassar,Graeme Johanson,2017-01-31 This book adopts a multidisciplinary approach to the issue of local liabilities drawing on close analysis of the case of Chinese migrants and the Italian industrial district of Prato in order to elucidate the problems or liabilities that derive from the separation between natives and immigrants in local systems of people and firms Insights are offered from a variety of disciplines including business and industrial economics anthropology and sociology thereby providing a framework through which to view the problems and also identifying potential pathways for their evolution and resolution The focus on local liabilities affords an original perspective on the nature of globalization and highlights salient aspects of native and immigrant entrepreneurship Globalization not only creates bridges between distant places but also changes the face of businesses and socioeconomic systems at the local level where local liabilities may emerge when two or more separate communities of persons and firms exist The greater the separation between the communities the greater the local liabilities In offering diverse perspectives on this relatively neglected aspect of globalization the book will be of interest to a wide readership **Asian American History and Culture: An Encyclopedia** Huping Ling,Allan W.
