*European Expansion and Representations of Indigenous and African Peoples*  
Ignacio Gallup-Díaz, 2020-03-31 This book presents a bold, multifaceted interpretation of early English imperial actions by examining the ways in which English empire builders and travelers interacted with Indigenous and African peoples during the long process of colonization in the Americas. Ignacio Gallup-Díaz argues that early English imperial actors were primarily motivated by practical concerns rather than abstract ideologies, from reacting to learning from and avoiding the ongoing Spanish and Portuguese imperial projects to the dynamic collision of English imaginings of empire with the practical realities of governing non-European peoples. The text includes an appendix of primary sources that allows students and instructors to engage with English imperial thinking directly. Readers are encouraged to critically examine English accounts of this period in an attempt to see the Indigenous and African peoples who are embedded in them.

*European Expansion and Representations of Indigenous and African Peoples* provides an invaluable new framework for undergraduate students and instructors of early American history, Atlantic history, and the history of race and imperialism more broadly.

**Empires of Coal**  
Shellen Xiao Wu, 2015-04-22 From 1868-1872, German geologist Ferdinand von Richthofen went on an expedition to China. His reports on what he found there would transform Western interest in China from the land of porcelain and tea to a repository of immense coal reserves. By the 1890s, European and American powers and the Qing state and local elites battled for control over the rights to these valuable mineral deposits. As coal went from a useful commodity to the essential fuel of industrialization, this vast natural resource would prove integral to the struggle for political control of China. Geology served both as the handmaiden to European imperialism and the rallying point of Chinese resistance to Western encroachment. In the late nineteenth century, both foreign powers and the Chinese viewed control over mineral resources as the key to modernization and industrialization. When the first China Geological Survey began work in the 1910s, conceptions of natural resources had already shifted, and the Qing state expanded its control over mining rights, setting the precedent for the subsequent Republican and People's Republic of China regimes. In *Empires of Coal*, Shellen Xiao Wu argues that the changes

specific to the late Qing were part of global trends in the nineteenth century when the rise of science and industrialization destabilized global systems and caused widespread unrest and the toppling of ruling regimes around the world

The Politics of Latin Literature Thomas N. Habinek, 2001-11-13 This is the first book to describe the intimate relationship between Latin literature and the politics of ancient Rome Until now most scholars have viewed classical Latin literature as a product of aesthetic concerns Thomas Habinek shows however that literature was also a cultural practice that emerged from and intervened in the political and social struggles at the heart of the Roman world Habinek considers major works by such authors as Cato Cicero Horace Ovid and Seneca He shows that from its beginnings in the late third century b c to its eclipse by Christian literature six hundred years later classical literature served the evolving interests of Roman and more particularly aristocratic power It fostered a prestige dialect for example it appropriated the cultural resources of dominated and colonized communities and it helped to defuse potentially explosive challenges to prevailing values and authority Literature also drew upon and enhanced other forms of social authority such as patriarchy religious ritual cultural identity and the aristocratic procedure of self scrutiny or existimatio Habinek's analysis of the relationship between language and power in classical Rome breaks from the long Romantic tradition of viewing Roman authors as world weary figures aloof from mundane political concerns a view he shows that usually reflects how scholars have seen themselves The Politics of Latin Literature will stimulate new interest in the historical context of Latin literature and help to integrate classical studies into ongoing debates about the sociology of writing

*Reading for Realism* Nancy Glazener, 1997 Reading for Realism presents a new approach to U S literary history that is based on the analysis of dominant

reading practices rather than on the production of texts Nancy Glazener's focus is the realist novel the most influential literary form of the nineteenth and twentieth centuries a form she contends was only made possible by changes in the expectations of readers about pleasure and literary value By tracing readers' collaboration in the production of literary forms *Reading for Realism* turns nineteenth century controversies about the realist romance and sentimental novels into episodes in the history of readership It also shows how works of fiction by Rebecca Harding Davis Henry James Nathaniel Hawthorne and others participated in the debates about literary classification and reading that in turn created and shaped their audiences Combining reception theory with a materialist analysis of the social formations in which realist reading practices circulated Glazener's study reveals the elitist underpinnings of literary realism At the book's center is the Atlantic group of magazines whose influence was part of the cultural machinery of the Northeastern urban bourgeoisie and crucial to the development of literary realism in America Glazener shows how the promotion of realism by this group of publications also meant a consolidation of privilege primarily in terms of class gender race and region for the audience it served Thus American realism so often portrayed as a quintessentially populist form actually served to enforce existing structures of class and power
