Reforming Corporate Retail Investor Protection Diane Bugeja, 2019-12-12 The spate of mis selling episodes that have plagued the financial services industries in recent years has caused widespread detriment to investors Notwithstanding numerous regulatory interventions curtailing the incidence of poor investment advice remains a challenge for regulators particularly because these measures are taken in a fire fighting

fashion without adequate consideration being given to the root causes of mis selling Against this backdrop this book focuses on the sale of complex investment products to corporate retail investors by drawing upon the widespread mis selling of interest rate hedging products IRHP in the UK and beyond It brings to the fore the relatively understudied field concerning the different degrees of investor protection mechanisms applicable to individual retail investors as opposed to corporate retail investors by taking stock of past regulatory reforms and forthcoming regulatory initiatives as well as more importantly the conclusions reached by the judiciary in IRHP mis selling claims The conclusions are particularly interesting corporate retail investors are in a vulnerable position when compared to individual retail investors The former are exposed to a heightened risk of mis selling meaning that regulatory intervention should be targeted accordingly The recommendations made as a result of these findings are further supported by insights emerging from behavioural law and economic theories This book is aimed at researchers lawyers and students with an interest in the financial regulation field who are keen to explore potential regulatory reforms to the investment services regime that address the root causes of mis selling and restore a level playing field amongst all retail investors

Regulation and Supervision of the OTC Derivatives Market Ligia Catherine Arias-Barrera, 2018-05-11 The over the counter OTC derivatives market has captured the attention of regulators after the Global Financial Crisis due to the risk it poses to financial stability Under the post crisis regulatory reform the concentration of business and risks among a few major players is changed by the concentration of a large portion of transactions in the new market infrastructures the Central Counterparties CCPs This book for the first time analyses the regulatory response of the United Kingdom and the United States the two largest centres of OTC derivatives transactions and highlights their shortcomings The book uses a normative risk based approach to regulation as a methodological lens to analyse the UK regime of CCPs in the OTC derivatives market It specifically focuses on prudential supervision and conduct of business rules governing OTC derivatives transactions and the move towards enhancing the use of central clearing The resulting analysis from a normative risk based approach suggests that the UK regime for CCPs does not fulfil what would be expected if a coherent risk based approach was taken Our comments on the Dodd Frank Act highlight that the incoherent adoption of risk based approach to regulation affects the effectiveness of the US regime for CCPs Such a regime does not follow the pace of events of innovation risk in particular the foreseeable changes FinTech will bring to the OTCDM and central clearing services The second inadequacy of the US regime concerns the dual regulatory structure of the CFTC and the SEC and the inadequate adoption of different and not well coordinated regulatory strategies We also analyse the cross border implications of the US regime for non US CCPs that provide clearing services to US market participants Finally we study the negative effects of the absence of a clearly defined resolution regime for CCPs
