Action Research Craig A. Mertler, 2024-05-20 *Action Research Improving Schools and Empowering Educators* Seventh Edition serves as a comprehensive guide on action research for both beginning and experienced educators. Instead of focusing on theoretical aspects of research, the book provides detailed yet practical information guiding readers step by step through the iterative process of action research in a classroom or school-based context. The text adopts a highly sequential manner, beginning with topic conceptualization, reviewing related research, designing the study, executing the investigation, developing an action plan, and ultimately disseminating and reflecting on the results. A distinguishing feature of this book is the integration of numerous relatable examples, hands-on exercises, case studies, and explorations of published action research entries to ensure material comprehension. Each chapter of this Seventh Edition has been updated with a new Action Research Case Study featuring the move to virtual instruction for the COVID-19 pandemic and beyond. Throughout the author has added more on alternative strategies for disseminating research and expanded discussion of research topics, problems, questions, data, and analysis. Additionally, the entire book has also been updated for the Seventh Edition of the Publication Manual of the American Psychological Association to be current with the latest best practices in research. Included with this title LMS Cartridge. Import this title's instructor resources into your school's learning management system LMS and save time. Don't use an LMS. You can still access all of the same online resources for this title via the password-protected Instructor Resource Site. Select the Resources tab on this page to learn more.

Guide to Transforming Teaching Through Self-Inquiry James Pelech, 2013-07-01 In the past twenty years, the importance of reflection has been recognized by all professions, especially the education profession. In the field of education, terms and practices such as reflective practice, action research, journaling, collaborative observation, professional development, peer observation, and professional portfolios have become organizing units of discussion and practice. This book extends knowledge in the field not just by providing prompts and examples of things to do, but also by presenting an organized and cohesive system consisting of definitions, principles, and guidelines that can be used for all reflective practice activities. This system blends ideas and concepts from phenomenology, the Constructivist philosophy, experiential learning, critical reflection, theories on turning knowledge into action, and transformative learning. Moreover, the book creates a logical system for reflective practice that provides a foundation for a framework that organizes teacher transformation through reflection. This system is anchored by the practical examples provided, thus making this book practical for all those interested in improving student learning. The strength of this book is that it is not a recipe-type publication; rather, it is a cohesive system which creates a rationale for the system, presents the system, and provides many examples. The intended audience includes practitioners, teacher educators, teacher candidates, and administrators.

Teacher Action Research Gerald J. Pine, 2008-10-31 This is a wonderful book with deep insight into the relationship between teachers' action and the result of student learning. It discusses from different angles the impact of action research on student learning in the classroom. Writing samples provided at the back are wonderful examples. Kejing Liu
