Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina, Balcerzak, Phyllis, O'Brien, Kathryn, 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education There were questions surrounding the effectiveness of online trainings for teachers online teaching practices the motivation and engagement of students and the quality of learning and education in these times Action research emerged to address these concerns being a systematic process of inquiry using reflection within a cyclical model of planning acting implementing evaluating and continuous reflection This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences Using collaboration social advocacy and action research there is the opportunity to advance teaching for students families and communities without a physical context involved The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms This book showcases educational professionals action research for solutions in advancing teaching and learning the practical benefits of action research recommendations for improving online teaching and learning and a focus on professional growth as well as social justice advocacy It highlights important topics including student learning teacher collaboration authentic learning advocacy and action research in both K 12 and higher education settings This book is ideal for inservice and preservice teachers administrators teacher educators practitioners researchers academicians and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education

Action Research in Education Sara Efrat Efron, Ruth Ravid, 2019-12-11 Introduction to action research Choosing and learning about your research topic Approaches to action research Developing a plan of action Data collection tools Using assessment data in action research Data analysis and interpretation Writing implementing and sharing the research findings

Action Research Jeffrey Glanz, 2014-06-04 Action Research An Educational Leader's Guide to School Improvement Third Edition is a clear and practical guide to conducting action research in schools Although it offers neither a cookbook nor a quick fix approach this book does outline the process of designing and reporting an action research project Useful as a classroom text as well as a self teaching tool Action Research An Educational Leader's Guide to School Improvement is a comprehensive training manual It can be used by practitioners in the field by graduate students enrolled in leadership and or master's thesis courses or by anyone interested in learning how to conduct action research projects including classroom teachers who are leaders too in their own right The strategies and techniques of action research described are no different for teachers than they are for administrators The underlying assumption of this work is that research is not a domain only for academics it is also a powerful approach that can be used by practitioners to contribute to school renewal and instructional improvement Rather than being merely a philosophical

treatise or theoretical analysis Action Research provides concrete strategies and techniques for conducting action research in schools **Research Design and Methods** Gary J. Burkholder, Kimberley A. Cox, Linda M. Crawford, John H.

Hitchcock, 2019-07-26 Research Design and Methods An Applied Guide for the Scholar Practitioner by Gary J Burkholder Kimberley A Cox Linda M Crawford and John H Hitchcock is written for students seeking advanced degrees who want to use evidence based research to support their practice This practical and accessible text addresses the foundational concepts of research design and methods provides a more detailed exploration of designs and approaches popular with graduate students in applied disciplines covers qualitative quantitative and mixed methods designs discusses ethical considerations and quality in research and provides guidance on writing a research proposal **Introduction to Educational Research**

Craig A. A. Mertler, 2024 Introduction to Educational Research Craig A. Mertler, 2021-11-14 This Third Edition of Craig Mertler's practical text helps readers every step of the way as they plan and execute their first educational research project Offering balanced coverage of qualitative and quantitative methods an emphasis on ethics and a wealth of new examples and concrete applications the new edition continues to use conversational nontechnical language to help students clearly understand and apply research concepts principles procedures and terminology Expanded coverage of foundations of research an increased focus on integrating qualitative and quantitative research and updated coverage of research questions and the tools of qualitative research bring the book thoroughly up to date while streamlined coverage of statistics shows students how to do quantitative analysis in a straightforward way **Varieties of Qualitative Research Methods** Janet

Mola Okoko, Scott Tunison, Keith D. Walker, 2023-01-01 This book is a compilation of more than 70 qualitative research concepts that are used by researchers and practitioners in the social sciences and humanities The concepts include methods and methodologies applied in qualitative research in various contexts Each concept is a standalone chapter that is authored by a researcher or practitioner who has had some scholarly experience with it The chapters are alphabetized using the titles of the concepts to provide easy access for readers They follow a prescribed outline which ensures homogeneity in the layout of the book Each chapter starts with a brief historical background of the concept followed by a concise description of the concept and the process used in its application Readers are then provided with the possible ways in which the concept can be used and its benefits Each chapter concludes by providing readers with some strengths and limitations of the concept and a list of references that authors have used in the chapter *Adolescents In The Internet Age, 2nd Edition* Paris S.

Strom, Robert D. Strom, 2014-07-01 Teaching adolescents and learning from them is the paradigm elaborated throughout this second edition of *Adolescents in the Internet Age* The premise is based upon four assumptions 1 Adolescents have unique experiences that qualify them as the most credible source on what growing up is like in the current environment 2 Adolescents are more competent than many adults with tools of technology that will be needed for learning in the future 3 Adolescents and adults can support mutual development by adopting the concept of reciprocal learning and 4 The common

quest of adolescents to gain adult identity could be attained before employment Expectations are the theme for every chapter The reason expectations are so important is because they influence goals determine priorities and are used to evaluate progress and achievements of individuals and institutions When teacher expectations correspond with the abilities and interests of students achievement and satisfaction are common outcomes In contrast if teachers expect too little student potential can be undermined There is also concern if expectations that students have for themselves surpass their abilities This occurs if teachers do not inform students about their deficits Multitasking doing too many things at the same time detracts from productivity Sharing accountability depends upon complimentary and attainable expectations that can be met by students teachers and parents To support appropriate expectations this book for secondary teachers and high school students seeking a broader understanding of their own generation is organized in four parts about aspects of learning and development 1 Identity expectations introduce traditional perspectives on adolescence changes related to sources of learning evolving emphasis of schools and ways to support motivation goal setting and formation of identity 2 Cognitive expectations examine mental abilities academic standards emergence of the Internet as a learning tool development of media literacy creative problem solving and encouragement of higher order thinking skills 3 Social expectations explore the need for giving greater attention to social development importance of teamwork skills involvement with social networking adoption of civil behavior school safety and values as a basis for ethical behavior and character 4 Health expectations center on decisions that influence physical health well being and lifestyle choice Consideration is given to stress management emotional intelligence and risk assessment strategies for individual teenagers and the schools that they attend
