Enhancing Quality in Higher Education Ray Land, George Gordon, 2013-06-19 Interest in the quality of higher education provision has been steadily increasing over the last twenty years This has been driven largely by the international creation of explicit policies and reporting requirements to review audit and evaluate provision The interest is associated in many countries with the granting by governments of greater autonomy to higher education institutions This crucially comes bound with increased requirements for accountability in the exercise of such power Enhancing provision promoting innovation cultivating exploration and adopting information led approaches to practice are at the very heart of higher education As such quality enhancement comes in many guises and is under constant scrutiny Enhancing Quality in Higher Education looks critically at recent developments in higher education taking snapshots of changing practices around the world and analysing the varied theoretical perspectives of quality enhancement that are emerging The opening section draws upon this theoretical base whilst the second section contextualises it through the analysis of a diverse range of international case studies The concluding section considers future prospects for the enhancement agenda in the light of the international pressures facing all systems of higher education in the future Policy will inevitably be shaped by the historical contexts within which national

systems are located The book draws on a wide range of international case studies examined by a host of contributing experts The movement towards quality enhancement can be seen as stimulating action at the grassroots of the academy to self generate improvement It is a counter to the prevalent view that change in higher education is essentially about the institutional response to increasing societal pressure and state control and as such is a welcome contribution to the literature This comprehensive volume is essential reading for anyone involved in higher education and educational policy

How Policies Make Interest Groups Michael T. Hartney,2022-09-28 A critical revelatory examination of teachers unions rise and influence in American politics As most American labor organizations struggle for survival and relevance in the twenty first century teachers unions appear to be an exception Despite being all but nonexistent until the 1960s these unions are maintaining members assets and political influence As the COVID 19 epidemic has illustrated today s teachers unions are something greater than mere labor organizations they are primary influencers of American education policy How Policies Make Interest Groups examines the rise of these unions to their current place of influence in American politics Michael Hartney details how state and local governments adopted a new system of labor relations that subsidized and in turn strengthened the power of teachers unions as interest groups in American politics In doing so governments created a force in American politics an entrenched subsidized machine for membership recruitment political fundraising and electoral mobilization efforts that have informed elections and policymaking ever since Backed by original quantitative research from across the American educational landscape Hartney shows how American education policymaking and labor relations have combined to create some of the very voter blocs to which it currently answers How Policies Make Interest Groups is trenchant essential reading for anyone seeking to understand why some voices in American politics mean more than others
