*Convergence and Divergence in Language Contact Situations* Kurt Braunmüller, Juliane House, 2009 This book deals with the consequences of converging and diverging processes and their development in language contact situations It provides insights into the various forms of language contact and the conditions under which bilingual speakers master their every day life in bilingual communities Its nine contributions cover both

theoretical and typological aspects such as the classification of languages the role of language contact linguistic complexity and spontaneous speech innovations and convergence and divergence processes in translation morpho syntax and phonology phonetics Taken together these studies provide challenges for linguistic theories that generalize from situations of monolingualism suggesting instead that a sound linguistic theory cannot be a theory for just one single isolated language but must be a theory for at least two languages It must also account for the fact that some structures involved in contact situations are not kept apart but develop in such a way that the distance decreases between the languages involved

**Language Contact and Change in the Austronesian World** Tom Dutton, Darrell T. Tryon, 2010-12-14 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

*Vernacular Universals and Language Contacts* Markku Filppula, Juhani Klemola, Heli Paulasto, 2009-01-13 In this book contributors have been brought together to discuss the role of two major factors shaping the grammars of different varieties of English and of other languages all over the world so called vernacular universals and contact induced change Rather than assuming a general typological perspective the studies in this volume focus on putative universal vernacular features significant phonological or morpho syntactic parallels found in non standard varieties of English English based Creoles and also varieties of other languages all of which represent widely differing sociolinguistic and historical backgrounds These universals are then set against the other major explanatory factor contact induced change by which we understand both the possibility of dialect contact or dialect diffusion and language contact including superstratal substratal and adstratal influences

**The Mainland Southeast Asia Linguistic Area** Alice Vittrant, Justin Watkins, 2019-06-04 This book lies at the crossroads of areal typology language contact and genetic affiliation Concerned with mainland Southeast Asia in particular the various grammatical sketches lay emphasis on characteristics shared by unrelated languages

*The Cambridge Handbook of Language Contact* Salikoko S. Mufwene, Anna María Escobar, 2022-06-30 Language contact the linguistic and social outcomes of two or more languages coming into contact with

each other has been pervasive in human history. However, where histories of language contact are comparable experiences of migrant populations have been only similar, not identical. Given this, how does language contact work? With contributions from an international team of scholars, this Handbook, the first in a two-volume set, delves into this question from multiple perspectives and provides state-of-the-art research on population movement and language contact and change. It begins with an overview of how language contact as a research area has evolved since the late 19th century. The chapters then cover various processes and theoretical issues associated with population movement and language contact worldwide. It is essential reading for anybody interested in the dynamics of social interactions in diverse contact settings and how the changing ecologies influence the linguistic outcomes.

Language Contacts in Prehistory Henning Andersen, 2003. Every language includes layers of lexical and grammatical elements that entered it at different times in the more or less distant past. Hence, for periods preceding our earliest historical documentation, linguistic stratigraphy, the systematic study of such layers, may yield information about the prehistory of a given tradition of speaking in a variety of ways. For instance, irregular phonological reflexes may be evidence of the convergence of diverse dialects in the formation of a language, and layers of material from different source languages may form a record of changing cultural contacts in the past. In this volume, past problems and current advances in the stratigraphy of Indo-European, African, Southeast Asian, Australian, Oceanic, Japanese, and Meso-American languages are discussed.

Language Contacts Meet English Dialects Esa Penttilä, 2020-06-12. This book presents a collection of fresh research on language contacts and dialects and the interface between the two. The volume celebrates the work of Professor Markku Filppula, an eminent scholar in the fields of Irish English, Celtic contacts in the history of English, and language contacts and vernacular universals in nonstandard Englishes. The articles in this volume explore theories and methods employed in the study of language contacts and variation: Celtic substrata in Irish and British English, and dialect in the British Isles. The writers' perspectives range from cognitive processing to sociolinguistics and from theoretical and comparative discussions to new empirical corpus-based studies.

*Grammars in Contact* Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04. Languages can be similar in many ways: they can resemble each other in categories, constructions, and meanings, and in the actual forms used to express these. A shared feature may be based on common genetic origin or result from geographic proximity and borrowing. Some aspects of grammar are spread more readily than others. The question is, which are they? When languages are in contact with each other, what changes do we expect to occur in their grammatical structures? Only an inductively based cross-linguistic examination can provide an answer. This is what this volume is about. The book starts with a typological introduction outlining principles of contact-induced change and factors which facilitate diffusion of linguistic traits. It is followed by twelve studies of contact-induced changes in languages from Amazonia, East and West Africa, Australia, East Timor, and the Sinitic domain. Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English, Basque in contact with Romance languages in Spain and France, and language

contact in the Balkans All the studies are based on intensive fieldwork and each cast in terms of the typological parameters set out in the introduction The book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology **Afrikaans Linguistics** WAM Carstens, Nerina Bosman, 2024-10-03 Offering a contemporary exploration of the multifaceted landscape of Afrikaans linguistics *Afrikaans Linguistics: Contemporary Perspectives* marks a seminal contribution to the field This volume for the first time presents accessible insights into diverse linguistics subdisciplines inviting international scholars to familiarise themselves with Afrikaans language studies Throughout much of the late 19th and 20th centuries Afrikaans scholars predominantly communicated in Afrikaans resulting in a significant gap in the dissemination of knowledge about the language The chapters in this book written by prominent South Africans as well as international scholars working in the field of Afrikaans serve as a pivotal bridge by providing essential historical context while also paying attention to the development of Afrikaans linguistics during the 20th century The primary focus remains on illuminating 21st century research trajectories offering a comprehensive snapshot of contemporary scholarship in Afrikaans linguistics **One Speaker, Two Languages** Lesley Milroy, Pieter Muysken, 1995-08-17 Code switching the alternating use of several languages by bilingual speakers does not usually indicate lack of competence on the part of the speaker in any of the languages concerned but results from complex bilingual skills The reasons why people switch their codes are as varied as the directions from which linguists approach this issue and raise many sociological psychological and grammatical questions This volume of essays by leading scholars brings together the main strands of current research in four major areas the policy implications of code switching in specific institutional and community settings the perspective of social theory on code switching as a form of speech behaviour in particular social contexts the grammatical analysis of code switching including the factors that constrain switching even within a sentence and the implications of code switching in bilingual processing and development [The Routledge Handbook of Historical Linguistics](#) Claire Bowerman, Bethwyn Evans, 2015-03-24 The Routledge Handbook of Historical Linguistics provides a survey of the field covering the methods which underpin current work models of language change and the importance of historical linguistics for other subfields of linguistics and other disciplines Divided into five sections the volume encompasses a wide range of approaches and addresses issues in the following areas historical perspectives methods and models language change interfaces regional summaries Each of the thirty two chapters is written by a specialist in the field and provides an introduction to the subject an analysis of the relationship between the diachronic and synchronic study of the topic an overview of the main current and critical trends and examples from primary data The Routledge Handbook of Historical Linguistics is essential reading for researchers and postgraduate students working in this area Chapter 28 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9781315794013.ch28> *The Handbook of Pidgin and Creole*
