Social Justice in EAP and ELT Contexts Paul Breen, Michèle le Roux, 2024-02-22 This book articulates an understanding of what is meant by the term social justice from a global perspective drawing upon examples of practice from across a range of English for academic purposes EAP and English language teaching ELT higher education contexts Presently within western higher educational systems there is a drive for greater integration of approaches that lend themselves to social justice However questions still remain about what that means in practice This book seeks to answer that not by telling but by showing It presents a series of chapters that act as vignettes into a diverse set of classrooms contexts and countries offering examples of how and where an epistemology of social justice has been put into practice in teaching and learning situations Such situations range from cross continental higher educational partnerships between east and west to instances of EAP practitioners work with refugees from North Africa and the Middle East These examples are threaded together by the common goal of understanding what it is that defines an enactment of social justice and what the shared denominators are across these contexts Through looking at these various examples the authors produce a set of codes and themes that are

common to practice across contexts and discuss how these might help inform practice in other areas of language education higher education and educational development work in general **Early Language Learning in Context** David

Hayes,2022-08-19 This book critically analyses early school foreign language teaching policy and practice foregrounding the influence of the socioeducational and cultural context on how policies are implemented and assessing the factors which either promote or constrain their effectiveness It focuses on four Asian contexts Malaysia South Korea Sri Lanka and Thailand while providing a discussion of policy and practice in Canada and Finland as a comparison Concentrating on the state school sector it criticises the worldwide trend for a focus on English as the principal or only foreign language taught in primary schools founded on a rationale that widespread proficiency in English is important for future national success in a globalised economy It maintains that the economic rationale is not only largely unfounded and irrelevant to the language learning experiences of young children but also that the focus on English exacerbates system inequalities rather than contributing to their reduction The book argues for a broader perspective on language learning in primary schools one that values multilingualism and knowledge of regional and indigenous languages alongside a more diverse range of foreign languages This book will appeal to educational policymakers researchers and students interested in early foreign language learning in state educational systems worldwide **Resources in Education** ,2001 *English in Inclusive Multilingual*
