Language, Logic and Epistemology C. Norris, 2004-02-25 Norris presents a series of closely linked chapters on recent developments in epistemology philosophy of language cognitive science literary theory musicology and other related fields While to this extent adopting an interdisciplinary approach Norris also very forcefully challenges the view that the academic disciplines as we know them are so many artificial constructs of recent date and with no further role than to prop up existing divisions of intellectual labour He makes his case through some exceptionally acute revisionist readings of diverse thinkers such as Derrida Paul de Man Wittgenstein Chomsky Michael Dummett and John McDowell In each instance Norris stresses the value of bringing various trans disciplinary perspectives to bear while none the less maintaining adequate standards of area specific relevance and method Most importantly he asserts the central role of recent developments in cognitive science as pointing a way beyond certain otherwise intractable problems in philosophy of mind and language *Language, Logic and Epistemology* C. A Concise Companion to Realism Matthew Beaumont, 2010-04-26 *A Concise Companion to Realism* offers an accessible introduction to realism as it has evolved since the 19th century Though focused on literature and literary theory the significance of technology and the visual arts is also addressed Comprises 17 newly commissioned essays written by a distinguished group of contributors including Slavoj Žižek Frederic Jameson and Terry Eagleton Provides the historical cultural intellectual and literary contexts necessary to understand developments in realism Addresses the artistic mediums and technologies such as painting and film that have helped shape the way we perceive reality Explores literary and pictorial

sub genres such as naturalism and socialist realism Includes a brief bibliography and suggestions for further reading at the end of each section

**Epistemology: Key Concepts in Philosophy** Christopher Norris,2005-10-20 Christopher Norris attempts to make epistemology the theory of knowledge accessible to students and those with little prior knowledge of the subject through a series of debates which aim to give an balanced overview

**Derrida, Badiou and the Formal Imperative** Christopher Norris,2012-10-04 A challenge to the inherently hostile relationship between analytic and continental philosophy through the work of Jacques Derrida and Alain Badiou

*Derrida* Madeleine Fagan,2007-04-18 death of Jacques Derrida in 2004 represented a major interruption in contemporary intellectual life This death calls for an engagement with Derrida s work and an attempt to understand his legacy Such a discussion is fraught with tension between remaining faithful after death and putting Derrida s writing to work in new directions posing challenges and exposing limitations In short this legacy is necessarily a negotiation The aim of this book is to grapple with this specific theme and to explore the implications of Derrida s death for the future of critical thought itself The authors demonstrate that there is no single way to adopt or inherit Derrida s thought Rather through their engagement with contemporary themes within Politics and International Studies Philosophy Literary Studies and Postcolonial Studies each chapter illuminates the degree to which on going reflection radical critique and above all radical self critique are demanded by deconstruction This book provides the key st

*On Truth and Meaning* Christopher Norris,2006-06-15 Christopher Norris presents a wide ranging and distinctively angled perspective on many of the most challenging topics in current philosophical debate and explores a range of issues in epistemology ethics and philosophy of mind language and logic The book marks a further stage in the author s project of developing a realist truth based approach that would point a way beyond the various unresolved dilemmas and dichotomies bequeathed by old style logical empiricism In a series of closely argued chapters Norris draws out the two chief kinds of deficit normative and causal explanatory that have characterised much recent work in the analytic line of descent He gives a shrewd diagnostic account of the rift that opened up between the two traditions of contemporary philosophic thought one consequence of which was the analytic failure to develop precisely those normative resources that were needed in order to break out of that impasse The book also engages critically with the work of Donald Davidson Saul Kripke John McDowell Hilary Putnam Neil Tennant and Crispin Wright and mounts a vigorous challenge to the prominent strain of anti realist thinking developed on logico semantic and metaphysical grounds by Michael Dummett

*Platonism, Music and the Listener's Share* Christopher Norris,2006-10-09 What is a musical work What are its identity conditions and the standards if any that they set for a competent intelligent and musically perceptive act of performance or audition Should the work concept henceforth be dissolved as some New Musicologists would have it into the various ever changing socio cultural or ideological contexts that make up its reception history to date Can music be thought of as possessing certain attributes structural features or intrinsically valuable qualities that are response transcendent i e that might always elude or surpass

the best state of current or future informed opinion These are some of the questions that Christopher Norris addresses by way of a sustained critical engagement with the New Musicology and other debates in recent philosophy of music His book puts the case for a qualified Platonist approach that would respect the relative autonomy of musical works as objects of more or less adequate understanding appreciation and evaluative judgement At the same time this approach would leave room for listeners share the phenomenology of musical experience in so far as those works necessarily depend for their repeated realisation from one performance or audition to the next upon certain subjectively salient modalities of human perceptual and cognitive response Norris argues for a more philosophically and musically informed treatment of these issues that combines the best insights of the analytic and the continental traditions Perhaps the most distinctive feature of Norris s book true to this dual orientation is its way of raising such issues through a constant appeal to the vivid actuality of music as a challenge to philosophic thought This is a fascinating study of musical understanding from one of the worlds leading contemporary theorists

**Adventures in Realism** Matthew Beaumont, 2008-04-15 Adventures in Realism offers an accessible introduction to realism as it has evolved since the 19th century Though focused on literature and literary theory the significance of technology and the visual arts is also addressed Comprises 16 newly commissioned essays written by a distinguished group of contributors including Slavoj Zizek and Frederic Jameson Provides the historical cultural intellectual and literary contexts necessary to understand developments in realism Addresses the artistic mediums and technologies such as painting and film that have helped shape the way we perceive reality Explores literary and pictorial sub genres such as naturalism and socialist realism Includes a brief bibliography and suggestions for further reading at the end of each section

Re-Thinking the Cogito Christopher Norris, 2010-08-12 Re Thinking the Cogito seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book s constructive spirit Norris offers various detailed proposals for bringing the two approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza s working out of a non reductive yet metaphysically uncompromising mind body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra rationalist thinker such as Alain Badiou Thus Norris puts the case that physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self conscious reflection

The Intellective Space Laurent Dubreuil, 2015-03-20 The Intellective Space explores the nature and limits of thought It celebrates the poetic virtues of language and the creative imperfections of our animal minds while pleading for a renewal of the humanities that is grounded in a study of the sciences According to Laurent Dubreuil we

humans both say more than we think and think more than we say Dubreuil's particular interest is the intellectual space a space where thought and knowledge are performed and shared For Dubreuil the term cognition refers to the minimal level of our mental operations But he suggests that for humans there is an excess of cognition due to our extensive processing necessary for verbal language brain dynamics and social contexts In articulating the intellectual Dubreuil includes the productive undoing of cognition Dubreuil grants that cognitive operations take place and that protocols of experimental psychology new techniques of neuroimaging and mathematical or computerized models provide access to a certain understanding of thought But he argues that there is something in thinking that bypasses cognitive structures Seeking to theorize with the sciences the book's first section develops the intellectual hypothesis and points toward the potential journey of ideas going beyond cognition after and before computation The second part Animal Meditations pursues some of the consequences of this hypothesis with regard to the disparaged but enduring project of metaphysics with its emphasis on categories such as reality humanness and the soul

**Intensities** Katharine Sarah Moody, 2016-05-23 Is the affirmation or intensification of life a value in itself Can life itself be thought This book breaks new ground in religious and philosophical thinking on the concept of life It captures a moment in which such thinking is regaining its force and attraction for scholars and the relevance of thought to social cultural political and religious dilemmas about how and why to live Bringing together original contributions by highly distinguished authors in the field of Continental philosophy of religion including John D Caputo Pamela Sue Anderson Philip Goodchild Alison Martin and Don Cupitt this book has a distinctiveness based on its refusal to sit easily within either secular philosophical or theological approaches The concept of life mobilizes a thinking that crosses narrow disciplinary boundaries whilst retaining philosophical rigour Three sections explore the various dimensions of the question of life The Politics of Life Life and the Limits of Thinking and Life and Spirituality This book will be of interest to a broad range of readers in the humanities particularly to philosophers theologians cultural theorists and all those interested in philosophical or theological debates on the concept of life

**Deconstruction After All** Christopher Norris, 2015-10-01 This collection of interviews reflections and creative criticism presents Christopher Norris's vigorous polemics with Hayden White Michel Foucault Jean Baudrillard Jean Francois Lyotard Thomas Kuhn Emmanuel Levinas Pierre Bourdieu Richard Rorty and Stanley Fish Alongside Norris's uncompromising critiques there emerge passages of close and careful reading of Jacques Derrida's texts as he cites and reiterates Derrida's philosophical contexts in the works of Immanuel Kant Gaston Bachelard and Georges Canguilhem and in the current discursive fields of epistemology and philosophy of science The book also offers a coda of essays on Frank Kermode Terry Eagleton and Terence Hawkes This collection prefaced with the author's own academic memoir provides an accessible and provocative introduction to Norris's critical thought and highlights the wide range of his interests and philosophical engagements
