in language policy and planning LPP Through a critical examination of LPP the Handbook offers new direction for a field in theoretical and methodological turmoil as a result of the socio economic institutional and discursive processes of change taking place under the conditions of Late Modernity Late Modernity refers to the widespread processes of late capitalism leading to the selective privatization of services including education the information revolution associated with rapidly changing statuses and functions of languages the weakening of the institutions of nation states along with the strengthening of non state actors and the fragmentation of overlapping and competing identities associated with new complexities of language identity relations and new forms of multilingual language use As an academic discipline in the social sciences LPP is fraught with tensions between these processes of change and the still powerful ideological framework of modern nationalism It is an exciting and energizing time for LPP research This Handbook propels the field forward offering a dialogue between the two major historical trends in LPP associated with the processes of Modernity and Late Modernity the focus on continuity behind the institutional policies of the modern nation state and the attention to local processes of uncertainty and instability across different settings resulting from processes of change The Handbook takes great strides toward overcoming the long standing division between top down and bottom up analysis in LPP research setting the stage for theoretical and methodological innovation Part I defines alternative theoretical and conceptual frameworks in LPP emphasizing developments since the ethnographic turn including ethnography in LPP historical discursive approaches ethics normative theorizing and transdisciplinary methods and the renewed focus on socio economic class Part II examines LPP against the background of influential ideas about language shaped by the institutions of the nation state with close attention to the social position of minority languages and specific communities facing profound language policy challenges Part III investigates the turmoil and tensions that currently characterize LPP research under conditions of Late Modernity Finally Part IV presents an integrative summary and directions for future LPP research **The Routledge Handbook of**

Kamwangamalu, 2016-04-23 This book addresses the perennial question of how to promote Africa's indigenous languages as medium of instruction in educational systems Breaking with the traditional approach to the continent's language question by focusing on the often overlooked issue of the link between African languages and economic development Language Policy and Economics argues that African languages are an integral part of a nation's socio-political and economic development Therefore the book argues that any language policy designed to promote these languages in such higher domains as the educational system in particular must have economic advantages if the intent is to succeed and proposes Prestige Planning as the way to address this issue The proposition is a welcome break away from language policies which pay lip service to the empowerment of African languages while by default strengthening the stranglehold of imported European languages

Advancing a rapidly growing field of social science inquiry the anthropology of policy this volume extends and solidifies this body of work focusing on education policy Its goal is to examine timely issues in education policy from a critical anthropological ethnographic and comparative perspective and through this to theorize new ways of understanding how policy does its work At the center is a commitment to an engaged anthropology of education policy that uses anthropological knowledge to imagine and foster more equitable and just forms of schooling The authors examine the ways in which education policy processes create reflect and contest regimes of knowledge and power sorting and stratifying people ideas and resources in particular ways In contrast to conventional analyses of policy as text based dictated linear and rational an anthropological perspective positions policy at the interface of top down bottom up and meso level processes and as de facto and de jure Demonstrating how education policy operates as a social cultural and deeply ideological process on the ground

each chapter clearly delineates the implications of these understandings for educational access opportunity and equity Providing a single go to source on the disciplinary history theoretical framework methodology and empirical applications of the anthropology of education policy across a range of education topics policy debates and settings the book updates and expands on seminal works in the field carving out an important niche in anthropological studies of public policy
