Iversen, Mary Gergen, 2012-12-06 discussed in this book It is clear that with an understanding of the main ideas of statistics engaged citizens can grasp what the professional number crunchers have produced and evaluate the results This book grew out of a course designed by Gudmund R Iversen to meet the challenges created by this greater reliance on statistical It was one of a series of courses designed at Swarthmore information College to fulfill the mission of a liberal arts college to educate its students for the challenges of the twenty first century The idea was that students should not become so involved with the intricacies of a single discipline that they lose sight of the big picture These courses were intended to educate students to understand how the major ideas of a field relate to the world In many respects statistics seemed an ideal subject for one such course While statistics could be a mystifying self aggrandized and esoteric discipline it could also be a key to understanding many other disciplines The course Stat 1 Statistical Thinking was created to produce this understanding The course proved to be very popular and each year it grew in size Over time the lecture notes for the course became more refined and extensive and eventually the course material served as the basis for this book Formulas As most statistics instructors are keenly aware the teaching of statistics has changed dramatically **Exercising Essential Statistics** Evan Berman, Xiaohu Wang, 2016-12-30 Through the use of critical thinking questions and data based exercises Exercising Essential Statistics helps students apply the techniques
