Latecomers Latecomers:

The Economics of the Latecomers Jang-Sup Shin, 2013-05-13 This book examines the spectacularly successful economies of East Asia Japan and South Korea The comparison of the catching up process in Japan and South Korea includes studies of the iron and steel and semi conductor industries The author shows the difficulties involved in trying to detect general patterns of development as both countries appear to respond to different technological imperatives As a result general models of development should be treated with caution given the need to consider different historical and institutional contexts

The Other Latecomers Javier Papa, 2024-10-03 In recent years developing countries have seen the emergence of successful and innovative firms albeit often with state support Argentina which faces challenges including industrial decline and macroeconomic turbulence offers an intriguing context for studying latecomer firms as few have managed to innovate and compete globally without significant state backing This book examines why and how latecomer firms facing adverse policies and hostile macroeconomic conditions can nevertheless survive grow and catch up with global competitors while many other firms lag or fall further behind It presents on one hand a theoretical framework that builds on contributions made by Gerschenkron 1962 and Hobday 1995 on latecomer catch up in economic development theory and on those by Nelson 1991 2008 on firm level differences in evolutionary theory on the other it provides a contextual framework for the catching up experiences of firms from East Asia and Latin America which ends with a description of Argentina's main detrimental policy regimes over the past 50 years Further the book presents an statistical analysis of manufacturing firms performance along with the corporate characteristics that underlie it within the context of Argentina's worst economic crisis to determine which firm characteristics stood out during times of crisis e.g innovation and organizational capabilities To supplement the quantitative analysis and offer additional insights it introduces two in depth case studies on iconic latecomer firms TENARIS and IMPSA which bolstered by the examination of over nearly half a million newspaper articles illustrate their global success amidst numerous challenges It emphasizes the importance of long term corporate strategy a flexible organizational structure and a coherent set of technological and organizational capabilities while also addressing policy implications making it a valuable asset for researchers policymakers and corporate managers alike

Innovation-Development Detours for Latecomers Keun Lee, 2024-02-22 Many developing countries still face difficulties initiating and sustaining economic development Such difficulties have been exacerbated by the COVID 19 pandemic resulting in an increasing divergence between rich and poor countries One crucial question is whether to follow the trajectories of present day rich countries or seek out different new trajectories Although this is a fundamental question scholars offering mainstream prescriptions have not sufficiently explored it Drawing on extensive empirical studies of firms and industries Innovation and Development Detours for Latecomers proposes an effective alternative to prevailing development thinking It presents a rich menu of development pathways including a new role for Schumpeterian states

whereby they do not follow the paths of technological development already taken by advanced countries Rather they can skip certain stages and even create their own detours thereby leapfrogging advanced countries in both manufacturing and service sectors This title is also available as Open Access on Cambridge Core

Latecomers Andrew L. Yarrow,1991 Illuminated by real life stories and anecdotes Latecomers sensitively describes and explores what it means to be a child of older parents in the early years as an adolescent and as an adult A reporter for The New York Times Yarrow draws from questionnaires and interviews with over 800 people whose parents were over 35 when they were born

Latecomer Development Banji Oyelaran-Oyeyinka,Padmashree Gehl Sampath,2009-12-16 The most important issue for development centres on the debate about the centrality of knowledge technology and innovation to the process of economic development While this much is broadly agreed what is at issue is the precise mechanics of overcoming economic development challenges in different contexts At the heart of it all is about how economies at different levels deploy the unending streams of information and knowledge to developmental ends In time the notion of income convergence between the poorer South and the wealthy North has proved a mirage while a new economic divide has in fact occurred within the South itself and as well between regions and within regions The debate relating to latecomers is thus framed in discussions about regions and countries that arrive late to mastering industrialization in achieving economic prosperity through the use of knowledge In other words a new divide has emerged among the latecomers themselves and with it greater conceptual complexity in the ways of our understanding of the divergent ways of economic development We have thus separated fast followers and new late comers This book enters this debate acutely aware of the complexity of this process The authors argue that economic development is largely driven by innovation concentrating on the dynamics of process product and organizational changes and how they are embedded within specific and varied contextual institutions

Global Manufacturing And Secondary Innovation In China: Latecomer's Advantages Xiaobo Wu,2020-12-17 Innovation studies have long been confined to the theoretical system established by the scholars of developed countries in the West It is difficult to use these studies to understand the real nature and law of technological innovation in developing countries This book in an innovative manner studies the theoretical system of secondary innovation and reveals the evolution law and dynamic innovation mode of the activities carried out by technologically backward countries It does so by laying an important foundation for the development of management science theory on the basis of the standpoint and characteristics of developing countries

Economic Development John Eatwell,Murray Milgate,Peter Newman,1989 First published in the New Palgrave a dictionary of economics in four volumes 1987 T p verso Includes bibliographical references

Delinquency, Its Roots, Careers, and Prospects Donald James West,1982 Delinquency evaluates one of the largest longitudinal observational studies of juvenile delinquents ever conducted Utilizing a normal population sample and conducting individual interviews repeatedly over many years the author and his colleagues followed the development of 400 British working class boys from age eight to twenty five of whom one third eventually had criminal records Five factors were found to predict most delinquent behavior the most

powerful statistically being the presence of a criminal parent By measuring the accumulated pressure of these factors D J West demonstrates the extent to which delinquency can be predicted from classroom observations or social background at an early age He outlines policy guidelines that would tailor intervention to a youth's age and circumstances and he argues persuasively that positive change in the parents' situation usually produces good effects on the children

Economic Growth Tai-Yoo Kim, Almas Heshmati, 2013-11-29 This book shows that the existing theories on economic growth have clear limitations in terms of how much they can effectively contribute to actual economic growth Therefore this book presents a more effective theory on economic growth for countries and leaders looking to promote economic growth It is essentially centered around the theory of economic growth and theory of national development written for agricultural developing countries pursuing industrialization and late starting industrialized countries pursuing their own development Nevertheless it also makes a significant contribution to the very development of human civilization through the growth of developing countries late starting industrialized countries and early industrialized countries throughout the world

Institutions and Chinese Economic Development

Li Tan, 2021-11-10 China's rise as an economic power has posed some challenging questions how did China achieve GDP growth that was even faster than the Four Asian Tigers Is the Chinese model superior Why hasn't the rapid economic growth lead to democracy in the country as many observers expected And can China sustain its rapid economic growth with its existing social system Institutions and Chinese Economic Development A Comparative Historical Approach explores these questions by studying the historical relationship between institutions and economic development in China drawing comparisons with England Japan and other Asian economies as appropriate The investigation focuses on several junctures in China's economic development the starting point of the divergence between China and the West the externally provoked industrial development in the late 19th century and the contemporary Chinese Miracle The analysis foregrounds the role played by Chinese institutions and examines their effects on both the country's failure to industrialize in the past and its economic achievements in recent time The book also asks whether without reform to the existing state institutions China might still be subject to the historical dynastic cycles today despite its recent economic success This work is of great interest to students and scholars of the Chinese economy economic history and institutional economics as well as comparative history and Chinese studies more broadly

Convergence Innovation in Asian Industries

Kong-Rae Lee, 2018-04-19 This book deals with both the understanding of and the explanation of knowledge about the causes processes and patterns of convergence innovation It argues that the process of convergence innovation is a continuous disequilibrium between reference technology and its matching technology adjusting the optimal balance between the functions of the two technologies Contributors describe how convergence innovation is a learning process that requires both vertical and horizontal convergence and case studies explore the different types of convergence innovation such as outside in and inside out Convergence innovation has been taking place mainly by applying IT technologies to vast areas of conventional technologies so that individuals or firms reap the benefits of the convergence between IT and conventional technologies Such innovations are made possible by convergence and they ultimately improve the welfare of human beings as companies solve diverse problems and increase employment Examples in this book include biochemical companies in Indonesia who were able to increase their market shares in bio fertilizer and bio pesticide products through bio based technological convergence and textile machinery firms in South Korea who have been survived by achieving convergence innovation on their core competences This book was originally published as a special issue of the Asian Journal of Technology Innovation
