Environmental Practice in the Human Services Bernard Neugeboren, 2013-01-11 Environmental Practice in the Human Services points to the need for the human services to return to their historic mission of environmental change. It moves beyond the more general conceptual emphasis on person in environment toward the development of an environmental practice technology based on an intervention model which prescribes specific micro and macro roles and functions. It may open the way to recapturing the conceptual breadth which characterized the first 40 years of social work as a professional and occupational entity. The ecological perspective in social work has fostered an interest in the impact of social environments on service consumers. Environmental Practice in the Human Services tries to rectify the historical imbalance in the human services that has emphasized people changing methods giving secondary emphasis to environmental change. It instructs students preparing for practice in the human services as well as agency practitioners in the knowledge and skills necessary in environmental practice. Cases in environmental practice are used to illustrate how these skills are utilized in actual practice situations. The book's scope includes practice at the direct service administration, planning, and social policy levels; it integrates micro and macro practice and shows how these two levels of practice are interdependent. This enables human service practitioners to create and/or modify social environments to enhance the functioning of clients being served in human service programs. Topics covered include important skills in environmental practice including decisionmaking, negotiating, and leadership; community practice and resource coordination; social support; the impact of organizational environments on practice; environmental practice for the chronically disabled. Author Neugeboren's approach is unique in its in-depth focus on environmental practice, applying concepts of social environment to specific practice roles. This practice-specific content which provides tools needed for environmental practice is in contrast to existing texts on the social environment which are very theoretical and not integrated with practice. He includes material from the field of social ecology which has not been included in existing texts. It shows how practitioners and administrators, planners and policymakers can facilitate and support each other's work. Reading Environmental Practice in the Human Services will enlighten students and practitioners with specific skills for impacting on different social environments to enhance client benefit. It tells how a direct service practitioner can determine which organizational environments are suitable for particular client needs in making agency referrals. It also provides administrators with information about designing, planning, and managing agencies with functional organizational environments which achieve effective services.

Social Work in Health Settings Toba Schwaber Kerson, 1997 As the most comprehensive text of its kind, Social Work in Health Settings introduces social work students to a range of clients and provides an overview of many social work settings and services in the health arena. If you're a practitioner, you'll find the book useful for examining and evaluating your practice. This second edition features 18 new chapters and chapter subjects and rewritten and updated versions of the 14 chapters which were part of the first edition.
